J. W. JUNG SEED CO.

FAIRFIELD SEED FARM,

RANDOLPH, WIS.

Instructions About Ordering. Kindly use the order sheet enclosed with each catalog, this will greatly facilitate the filling of your order. Write plainly and you will be sure to have your order filled promptly and correctly. **Be sure to sign your name and FULL address on every order and keep a copy of same.** If your express office or freight depot has a different name from your postoffice, give that also. This is important, as we cannot forward goods if we do not know where to send them.

Remitting Money. Cash should always accompany the order. Remittances may be sent by Money Order, Bank Draft, Express Order, or Registered Letter. When money is sent by any of the above methods the cost of remitting may be selected in extra seeds. Remittances sent in any other way are entirely at the senders risk. Clean Postage stamps will be accepted the same as cash for small amounts.

Free Delivery. We deliver free to any Express or Post Office in the United States, all seeds quoted in this catalog by the packet, ounce, quarter-pound, pound, half-pint, pint and quart. On seeds in larger quantities purchasers must pay the Freight or Express charges.

25 cents worth of seeds free is allowed for each \$1.00 sent for seeds in packets and ounces. This premium must be selected in packets and ounces and does not apply on orders sent for farm seeds, potatoes, special offers or collections.

Warranty. We use every effort possible in the selection of our seeds, and feel justified in saying that our seeds are as pure as the best to be found, but at the same time, there being so many things beyond the control of man that spoil the best seeds and cause poor crops, that it is impossible to guarantee seeds. **Therefore, while we exercise great care to have all seeds pure and reliable, we sell no seeds with warranty, expressed or implied, further than the amount actually paid for such seeds as prove unsatisfactory, should there be just cause for complaint.** It must, however, be plain to everyone who gives the matter the slightest thought, that it is to our best interests to send out only such stock as will not only grow but also prove true to name and description.

Extras. As is our custom we will include some free packets with your order. The larger your order the more extras you will receive.

Safe Arrival of Packages. We endeavor to secure the safe arrival of packages of Seeds and Bulbs in good condition in every case. If a package is injured or lost, by Mail or Express, we will replace it as soon as notified of the fact. Frequently it happens that orders never reach us, or are without a signature or address. When customers fail to receive their packages in a reasonable time, they should inform us, and at the same time send us a copy of their order and any other information necessary to trace the goods. Complaint must be made on receipt of order.

Order Early. It will greatly facilitate shipments if orders are sent early. We aim to send off all orders the same or next day after receipt, but during the busy season this is impossible—hence the advisability of ordering early.

"IDEAL" SPRAYING OUTFIT.

This outfit has been designed to fill the requirements of the small Gardener and Fruit Grower.

It is light, compact and easy to operate. The tank holds fifteen gallons, is mounted so that the liquid will not slop or spill, and in a way that makes it easy to handle. The pump spreads across the top of the tank and is held firmly in place by a thumb nut.

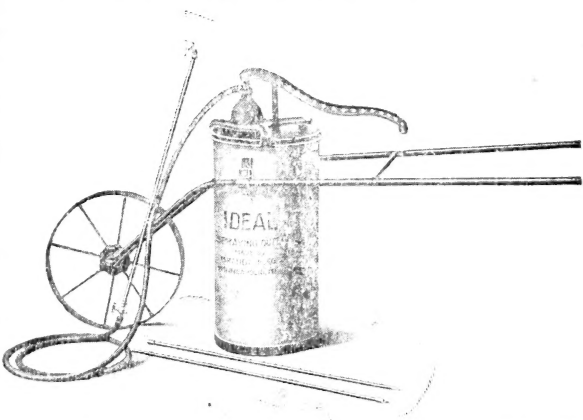

It has the largest air chamber of any spray pump of corresponding size.

This enables the operator to keep a uniform pressure at the nozzle. The pump barrel is 1 1/4 in diameter, 7 inches in length. The valves are bronze balls five-eighth inch in diameter which allows free passage for the liquids and prevents clogging.

Both valves are removable.

A pressure of 150 pounds can easily be maintained. A mechanical agitator keeps the liquid well stirred. The pump has the following equipment:

10 feet 3/8 inch Pressure Hose; 10 feet Pipe extension, three pieces; 1" T Handle Shut-off cock; 1 Brandt "IDEAL" Nozzle. Shipping weight, crated, 65 pounds. Shipped direct from factory in Minnesota. **Price by freight or express, \$20.00.**

PARTIAL VIEW OF FAIRFIELD FARM

Randolph, Wis., Jan. 1, 1912.

To our Friends, Our Customers:-

It is with pleasure that that we again place before you our Seed Annual, for 1912. Our catalogue is different from others in many ways as it does not contain overdrawn descriptions or illustrations, **WE BELIEVE IN TELLING THE TRUTH.**

In no other business transaction does a person place as much confidence in the party with whom they are dealing as in the buying of seeds, and when you entrust your orders to us you may rest assured that you will get the best seeds it is possible to procure. That our seeds are giving satisfaction is proved by the fact that our business is more than doubling each year. While we are not as old in years of business as some of our competitors we have the **ACTUAL EXPERIENCE** among the growing crops of seeds and when it comes to **Quality in Seeds** we are here to **"Deliver the Goods."** At our Fairfield Seed Farm we grow a larger percentage of the seeds we retail than any other seedsmen in America, here we employ the very best methods in improving, testing and growing seeds.

We do not claim to be the only seedsmen selling good seeds but we do claim that no matter what price you pay you cannot get better seeds.

Our great pleasure and best advertisement is a pleased customer and we always do our very best to please.

Promptness is proverbial with us, practically all seed orders are on their way to our customers within 24 hours after they are received.

Wishing you a happy and prosperous year,

Cordially yours,

J. W. Jung Seed Co.

SPECIALTIES FOR 1912.

On the following eight pages we are listing specialties that we know cannot fail to please our customers. It is our aim to supply our customers with the best of everything and we do not offer any variety that does not have special merit. All of these varieties are "first class" and you will make no mistake by giving them a trial.

NEW KIDNEY WAX

Brittle Wax BUSH BEAN.

The earliest of all Wax Beans. Of such excellent quality it might well be termed "best of all!" The plants are very hardy and vigorous, of true bush growth, about fifteen inches high and heavily laden with magnificent long straight round and very solid pods from five to seven inches long. The pods are of a rich golden color, very tender and entirely free from strings at all stages of its growth. It will stand longer than any other bean without becoming hard. The pods are unexcelled as snap-shorts, while having white seeds showing only a small black dot at the eye, any pods allowed to ripen will be readily saleable as winter shell beans. Include this great bean in your order. Pkt. 10 cts.; 1 pt. 20 cts.; pt. 35 cts.; qt. 50 cts., postpaid.

New Early Cabbage. Copenhagen Market.

An extreme-early Cabbage of unusual merit. It matures as early as Wakefield and will give a much heavier yield per acre than that popular variety. The plant is short-stemmed, the heads being produced almost on the ground level. The leaves are light green, rather small, saucer-shaped, and always tightly folded. The plants, therefore, can be set closer than is usual with varieties of similar size. The splendid solid heads weigh as much as eight pounds each, are of exceptional fine flavor, and show no signs of cracking. The type is thoroughly fixed, the heads maturing all at the same time, this is a great consideration to Market Gardeners, entailing less labor in harvesting the crop and allows the ground to be cleared at the first cutting. This Cabbage has come to stay and will surely please everyone who tries it. Pkt. 10 cts.; oz. 50 cts.; 1 lb. \$1.75.

COPENHAGEN MARKET

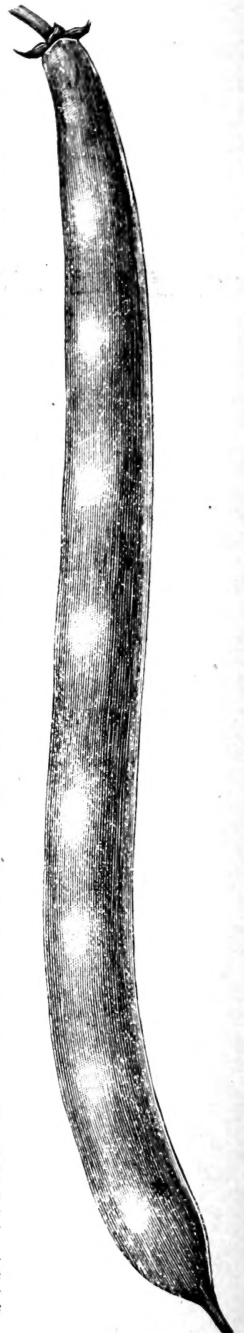

THE BEST WAX BUSH BEAN.**New Kidney Wax.**

Without any exceptions the finest flat-podded wax bean in cultivation. A great improvement on Wardwell's Kidney Wax, being more robust and prolific, and having longer pods which are much handsomer and of finer quality.

The plants are of erect bush habit, reaching eighteen to twenty inches in height. Their thick foliage is free from blight, while the pods are free from rust. The fleshy pods are flattened in form, six to seven inches long, one-half inch broad, and three-eighths of an inch thick; the color is a rich lemon yellow. The pods are remarkable for their meatiness, fine flavor and absolute freedom from strings. The pods hang in rich clusters from the vines, making picking quite easy.

Plants of this variety have been grown on the Fairfield Seed Farm bearing forty large pods each. It is without any doubt the best variety to plant for either the home or market garden.

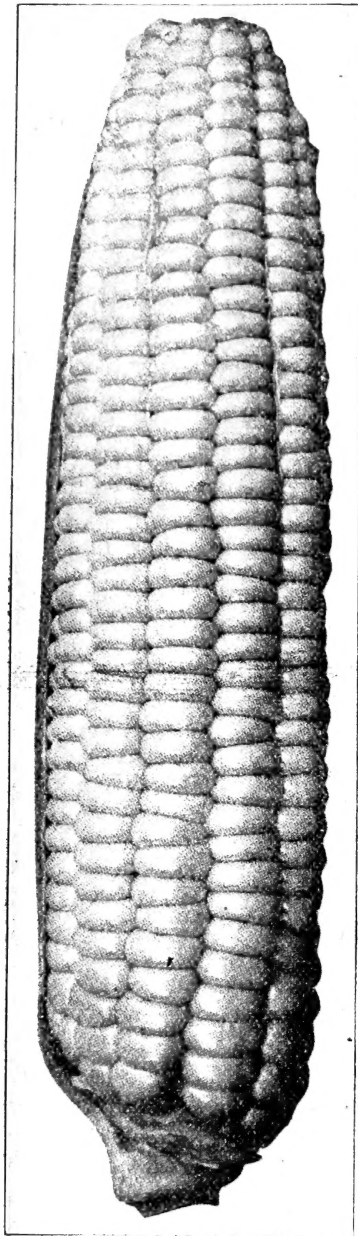

Pkt. 10 cts.; 1 pt. 20 cts.; pt. 35 cts.; qt. 50 cts., postpaid.

BRITTLE WAX

Success with Vegetables and Flowers

is the title of a little booklet which we have printed for your benefit. It contains full cultural instructions on growing vegetables and flowers and will be sent free with every order if asked for.

GOLDEN BANTAM

Fairfield Giant Cucumber.

Without any exceptions the darkest green and most nearly seedless Cucumber in cultivation. The vines are unusually vigorous in growth and produce an enormous crop of the handsomest of all Cucumbers. The fruits are smooth, of a very deep green color and grow from fifteen to twenty six inches in length, being one of the largest cucumbers grown. When the fruits are from eight to ten inches in length, or just the right size for slicing, they are practically solid, there being hardly a trace of seed to be found. The pure white flesh is very firm, sweet, crisp, and of the finest flavor. As shown in the illustration the fruits are very long and slim which together with their deep green color will make them bring the top prices on all markets. It is sure to become popular with all gardeners. Pkt. of 100 seeds 10 cts.

Danish "Roundhead" CABBAGE.

An earlier shorter stemmed type of the famous Danish Ballhead. It is slightly larger than Danish Ballhead and produces more weight per acre. The foliage is lighter in color; the handsome hard heads are beautifully white when trimmed.

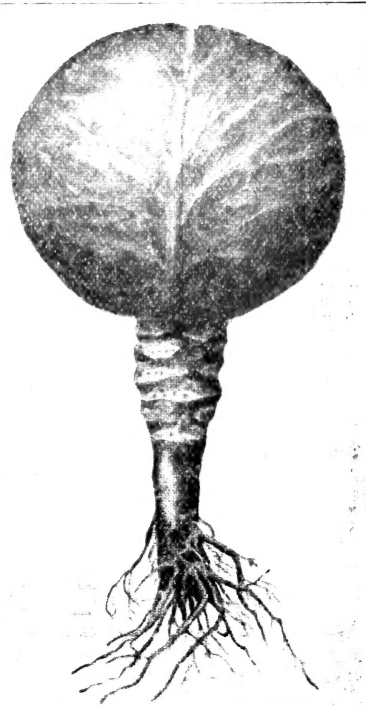

The heads are produced about two weeks earlier and while perfectly round in form are not quite so deep through. It is shorter stemmed than even the Short-Stemmed Ballhead, which is sometimes sold as Danish Roundhead. The magnificent hard heads are splendid keepers always bring the highest prices on market. Pkt. 10 cts.; oz. 20 cts.; 1 lb. 50 cts., postpaid.

Golden Bantam Sweet Corn.

This is without any exceptions the sweetest and most tender Sweet Corn on the market. It is not only very early, but also extra hardy. Although the grain in its young and tender state is rich and sweet beyond comparison, the dry seed is quite solid permitting of the earliest planting.

The stalks grow from three to four feet high and produce one to two good ears on each stalk. The ears are from five to seven inches in length; but what it lacks in size is more than made up in quality and productiveness. The color of the grains is a bright golden yellow. In flavor it is exceptionally rich and sugary.

Pkt. 10 cts.; 1 pt. 15 cts.; qt. 25 cts.; qt. 40 cts., postpaid.

DANISH ROUNDHEAD

Davis Perfect Cucumber.

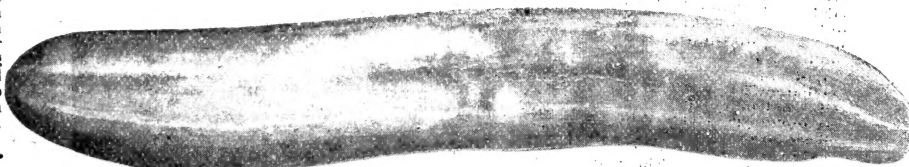

A Cucumber which for shape, quality, color, and forcing indoors, or growing outside is unexcelled. The type is perfectly fixed, it has an ideal shape, being slim and symmetrical. The eating qualities surpass all other varieties.

The vines are strong, rampant growers and enormously productive, outyielding any variety at present on the market. It does not change its dark rich color when grown outdoors, in fact it resembles the hothouse product so closely that dealers cannot detect the difference. The seeds that are contained in it when it is in slicing condition are so small and tender that they are unnoticed. It will be a big money maker for anyone engaged in growing cucumbers in the open ground, as they will bring double the price of any other outdoor variety.

Pkt. 10 cts.; oz. 15 cts.; 1 lb. 35 cts.

DAVIS PERFECT

Jung's All Cream Lettuce.

This remarkable Lettuce does not head, but makes a large loose bunch of leaves of superlative fine quality. The leaves grow upright, the upper part of the outer leaves turning outward very gracefully, and are handsomely wrinkled. The inside leaves are almost white and wonderfully crisp and tender. It grows very quickly, is ready to use early, and remains for weeks. It is the cream of all sorts and should be in every garden. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

Earliest Wayahead Lettuce.

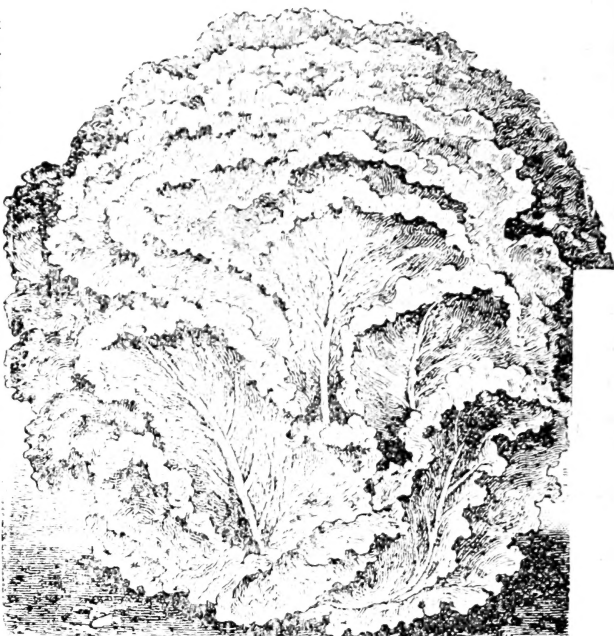

This is the finest Lettuce ever offered to the American public. It is the quickest growing and most attractive extreme early Lettuce, producing handsome, solid heads fully one week earlier than Black Seeded Tennis Ball.

Its earliness makes it the ideal variety for market gardeners; as the early heads always bring the best price. Its quality is unsurpassed; the heads are very solid; specimen heads have weighed six ounces when trimmed. The interior of the heads is blanched to a beautiful creamy color; while the leaves are tender, juicy and sweet-flavored. The quality of this remarkable variety is unequaled among the early sorts.

Pkt. 10 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 40 cts.

WAYAHEAD

JUNG'S ALL CREAM

New Fordhook Musk Melon.

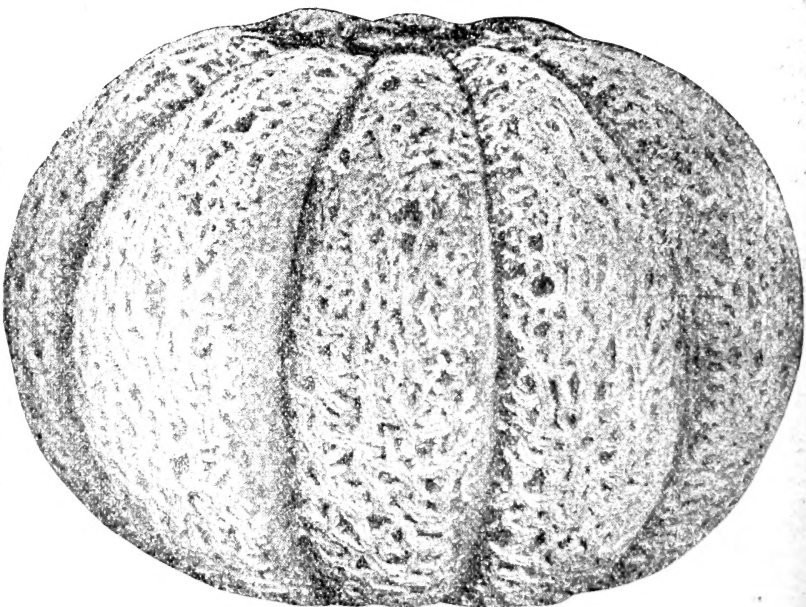

The finest flavored and sweetest Musk Melon in cultivation. Fully equal to Emerald Gem in flavor. So firm is the rough-netted skin, and so solid the thick salmon flesh, that the melons carry to market even better than Emerald Gem.

New Fordhook is a cross between Emerald Gem and Jenny Lind. The flesh is very thick, of an attractive deep-salmon color and surpassingly sweet to the very rind. The flesh is not only very thick, but also extremely solid.

The rind, although thin, is unusually firm, so that the fruits carry well to market. It is most vigorous in growth, very early and extremely prolific. Each vine sets from 5 to 9 melons immediately around the stem; frequently the fruits touch one another.

The melons are remarkably even in size, weighing from $\frac{1}{2}$ to 2 pounds each. For handsome appearance, extreme earliness, great productiveness and superb quality it is unexcelled. Be sure to give New Fordhook a trial.

Pkt. 10 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 40 cts., postpaid.

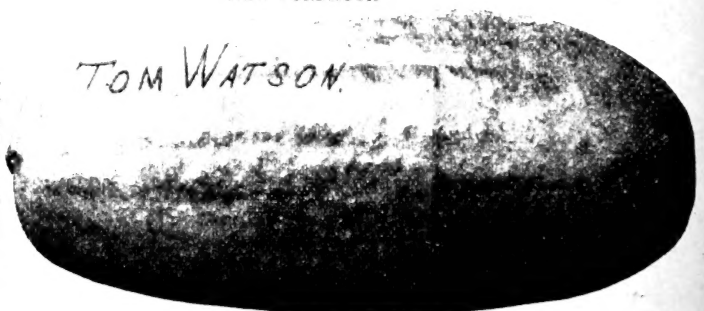

NEW FORDHOOK

Tom Watson Water Melon.

BEST QUALITY. BEST SHAPE. BEST SHIPPER. BEST APPEARANCE. BEST SIZE. The Tom Watson is an extra large melon of attractive appearance, uniform in shape and quality. The luscious crimson flesh is "sweet as honey," melting, and of superb flavor.

The average melon weigh from 35 to 40 pounds and measure about 20 inches in length and 12 inches in diameter. It is very prolific, producing in greatest abundance the delicious fruits. The dark green rind is tough but thin and easily withstands shipment to far distant markets.

The heart is large with no sign of core. Seeds are brown tipped with white. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

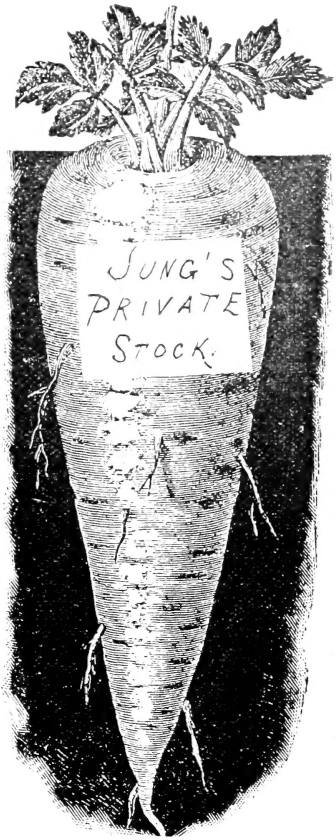

Extra Early Dwarf Pea **HARBINGER.**

A dwarf Pea of English origin which rarely grows over eight inches high and is **IMMENSELY PRODUCTIVE.** It is quite distinct from all other varieties in habit of growth and appearance, the vines being unusually robust and stocky. The vines are literally covered with pods which are well filled with peas of delicious quality. The even regular habit of the plants is of great advantage particularly to market growers. Pkt. 5 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 55 cts., postpaid.

Jung's Private Stock **PARSNIP.**

This is a highly improved type of the Half-Long, producing uniformly large and handsome roots of stocky form, heavy at the shoulder, well rounded, gradually tapering to the base, so that they are easily dug, and if grown in properly pulverized soil the roots will be smooth and free from wrinkles and side roots. The flesh is white, of fine texture, free from core and stringiness, and especially fine flavored, cooking tender, sweet and rich, rendering it one of the finest of table vegetables for winter use. The roots may remain in the ground all winter, being hardy, or some may be dug late in the fall and stored in sand or soil, so that they can be gotten at easily when the ground is frozen. Frost improves their quality. It is a heavy cropper. The shape is well shown in the illustration. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 90 cts.

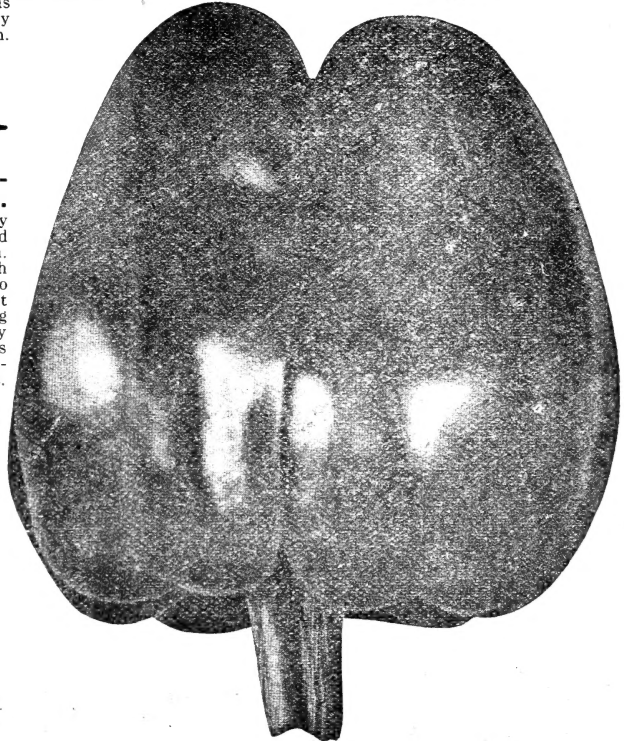

A Grand New Pepper.

SWEET UPRIGHT.

The best Pepper for the family gardens and almost unequalled for market.

It produces fine large fruits of nearly square or blocky form, with exceptionally thick flesh of the mildest and sweetest flavor. The plants are of sturdy erect growth.

The fruits are borne stiffly erect, and form at each fork of the branches; they are very broad, divided into four lobes, and when fully ripe are deeply indented at the blossom end. The color when ripe is rich glowing scarlet both in the thin tender skin and in the unusually thick flesh. The flesh is as crisp, mild, and sweet as an apple. It ripens early, the fruits are large, weighing from six to seven ounces each. Pkt. 10 cts.; $\frac{1}{2}$ oz. 20 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.20.

Our Great 25 c. Specialty Collection.

This is the greatest Bargain ever offered.
60 cents worth of seeds for only 25 cents.
6 Full-Sized packets as follows.

CABBAGE, Danish Ballhead	.10

TOMATO, Fairfield First	.10

Regular Value .60

We make this exceptional offer to induce you to try these special varieties.

A SPLENDID NEW MAIN- CROP PEA.

Improved Senator.

A splendid second-early variety; very productive of large well filled pods. It is of the same season as McLeans Advancer, but the pods are much larger and the vines much more prolific.

The vines grow about two feet high; are very hardy and carry a large crop. The large handsome pods contain from seven to ten peas which are sweet and tender even when large. This is one of the finest peas ever introduced. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 60 cts.

A NEW MAM- MOTH PODDED PEA.

Jung's Aristocrat.

This grand new Pea is of the large podded type as the Telephone, but the pods are even larger and the peas are sweeter in flavor.

The vines are of a rich green color, very stocky in growth, from sixteen to eighteen inches tall, and do not require brushing.

The pods are borne in great profusion and mostly in pairs. In size of pods it is an undisputed leader, single pods often measure six inches and over in length. The immense pods are straight and of fine appearance, and contain from eight to twelve large wrinkled peas, closely packed, tender, sweet and of exquisite flavor. Quality is always to be preferred to quantity but in this new Pea you have both. The Peas, too, possess the admirable merit of preserv-

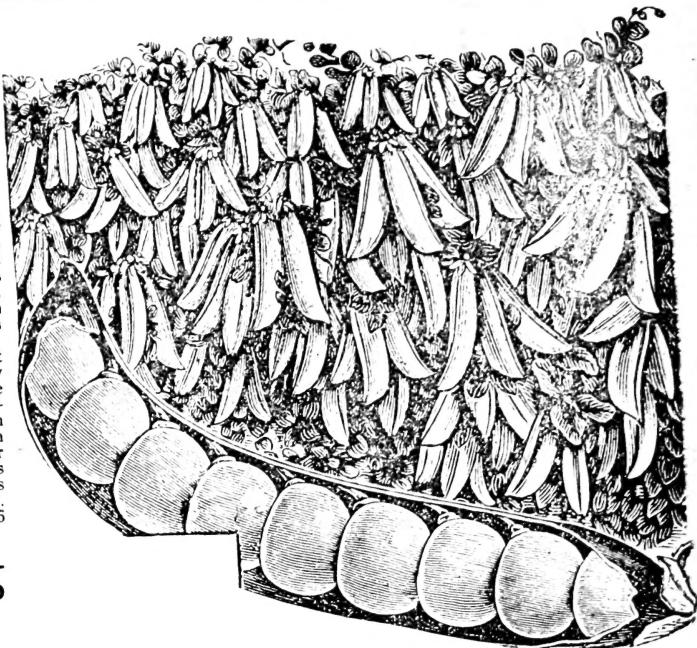

JUNG'S ARISTOCRAT ing their tenderness and superb flavor long after they are young, and also retain their attractive dark green color when served at the table. On our Fairfield Farm it was the largest podded variety grown. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 60 cts., postpaid.

THE SMOOTHEST AND FINEST FLAV- ORED EXTRA EARLY TOMATO.

Fairfield First.

The one great fault with other extra early tomatoes is that they do not have sufficient foliage, and as a result the fruits will sunburn which greatly detracts from their appearance and quality. Fairfield First is fully as early as any other variety and in addition is abundantly supplied with foliage which protects the fruits from the sun and preserves its fine appearance and quality. This variety has been carefully bred for extreme earliness, productivity, and smoothness of fruit.

Fruits are of good size, smooth, and borne in clusters—see illustration. It is a very heavy cropper. Although one of the first to ripen, the vines continue to bear until frost; the size and smoothness of the fruits is maintained until the end of the season. The color is an intense velvety scarlet, fruits are almost globe making it a splendid variety for slicing. The fruit is remarkably solid and firm; flesh is thick and heavy, of fine flavor, and contains but few seeds. Vines are strong healthy growers. Pkt. 10 cts.; $\frac{1}{2}$ oz. 25 cts.; oz. 40 c.; $\frac{1}{4}$ lb. \$1.30.

IMPROVED SENATOR

A CLUSTER OF FAIRFIELD FIRST AS GROWN AT FAIRFIELD FARM

A Page of Jung's Superb ASTERS.

Asters are our great Specialty in the flower seed line and the degree of perfection to which we have brought the strains we are offering is unsurpassed. We are the largest growers of ASTER SEED in the Northwest. No other flower can approach the Aster in beauty, color, form, or profusion of bloom. They are very hardy, easily grown, and may be had in bloom from early summer until severe frost. We are **ASTER SPECIALISTS** and our seed of these grand flowers is absolutely unexcelled.

Jung's New Aster "Fairfield."

We take pleasure in offering our customers this new Aster, which is in a class by itself.

The flowers of this grand variety are immense, single flowers measure 6 inches across; and being borne on long stiff stems they rival Chrysanthemums for bouquets. A bed of these Asters looks like a snowdrift. The petals are very long, and are curled and twisted to a remarkable degree. Bushes are strong and healthy. **White and Shell-pink. Each 10 cts. per pkt.**

Jung's American Beauty.

The petals of this grand new Aster are almost a-half inch wide. It is almost identical in color to the popular American Beauty Rose, hence its name. The plants are strong growers, from 35 to 40 inches tall, well supplied with heavy foliage, and is a prolific bloomer. The immense fluffy flowers are borne on stems from 12 to 18 inches long. Specimen plants carried from 8 to 12 flowers, each measuring over 4 inches across. **Pkt. 10 cts.**

Violet King. This is a popular variety, vigorous in growth, with long stiff stems, and luxuriant foliage of richest green.

In form the flower is entirely distinct; petals resemble the quilled varieties, but are much larger and broader, those in the center being twisted, curled, and incurved, completely covering the crown. The bloom is round, full, and very large, many of the flowers measuring from 4 to 5 inches across. Color is a soft violet-lilac. **Pkt. 10 c.**

Rose King. The same as Violet King except in color. It is vigorous in growth, with stems frequently 2 feet in length, flowers as large as saucers, crowns completely covered, a good keeping variety and unsurpassed for cutting. Petals are strong and stiff. **Pkt. 10 cts.**

Quality Aster Collection.

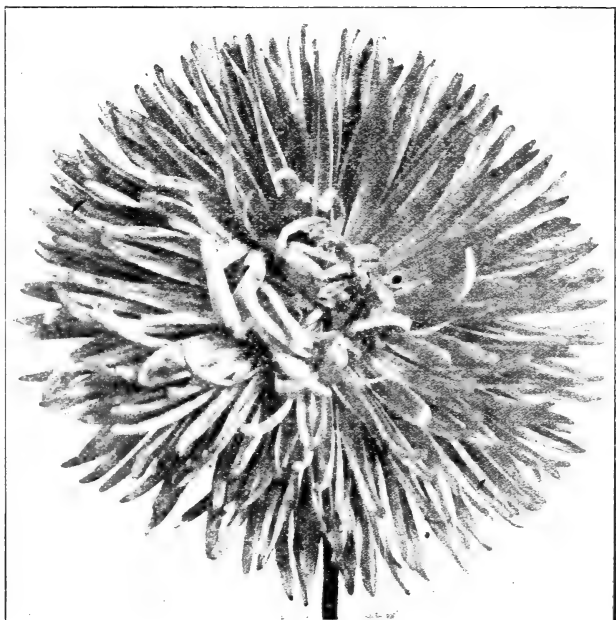

For only **25 cents** we will send you, postpaid, one packet of each of the above five grand new varieties.

JUNG'S FAIRFIELD

JUNG'S AMERICAN BEAUTY

VIOLET KING

Gigantic "Orchid Flowered" SWEET PEAS.**THE GIANTS OF THE SWEET PEA FAMILY.**

These new Sweet Peas are of such enormous size, which, together with their charming colors and waved or fluted appearance, entitles them to be put in a class by themselves. The flowers are distinct in having the outer edges of the wings and standards waved or fluted as the tissue is so full that there is not room for it to lie flatly expanded or smoothly rolled.

Some of the flowers grown on our farm measured two and one-fourth inches across. The plants are vigorous in growth and should stand at least 18 inches apart.

These grand Sweet Peas were the delight of everybody who saw them growing at Fairfield.

SPENCER SWEET PEAS AS GROWN AT FAIRFIELD FARM

Mrs. Routzahn Spencer.

A dainty blending of soft straw color, tinted with bluish pink and shading to apricot and rose at the edges, with quite a distinct rose margin. Flowers are of the largest size and are thoroughly crimped and waved. Stems are 12 to 14 inches long and generally produce four blossoms each. Pkt. 10 cts.

Asta Ohn Spencer.

The color throughout both standard and wings is a charming soft lavender. The flowers are of large size, pronouncedly waved and fluted in the standard, with unusually large wings. Stems are long and sturdy. Invaluable for cut flowers. Pkt. 10 cts.

King Edward Spencer.

The color is a deep rich glossy scarlet. The enormous flowers are frilled, waved and crinkled to a remarkable degree. The standard measures from 1½ to 2 inches across by 1½ inches deep. Pkt. 10 cts.

Beatrice Spencer.

The ground color is white, tinted with soft pink and buff on the standard, while each wing has a blotch of brighter pink near the base. Flowers are of large size. Stems long and heavy. Pkt. 10 cts.

Waverly Spencer.

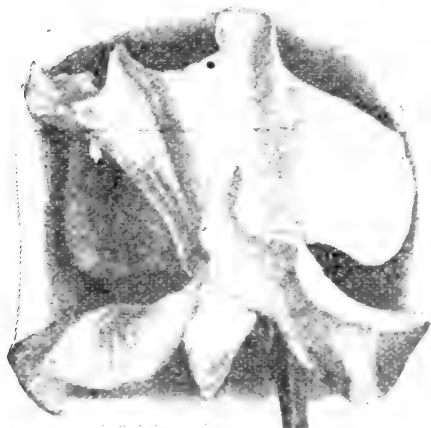

The standard is purplish maroon, the wings bluish purple, showing veins of rosy purple. The flowers are of immense size and always waved. Pkt. 10 cts.

Othello Spencer.

The long stems are thick and carry well either three or four fine flowers of a deep rich maroon. Blooms are beautifully crinkled. Pkt. 10 cts. Two pkts. 15 cts.

ASTA OHN SPENCER

MRS. ROUTZAHN

25 c. The Greatest Sweet Pea Offer EVER KNOWN. 25 c.

For 25 cts. we will send you, postpaid, one packet of each of the above six grand new varieties. **6 pkts. for 25 c.**

SEE PAGE 40 for other new varieties of Sweet Peas.

Jung's

UNRIVALED VEGETABLE SEEDS.

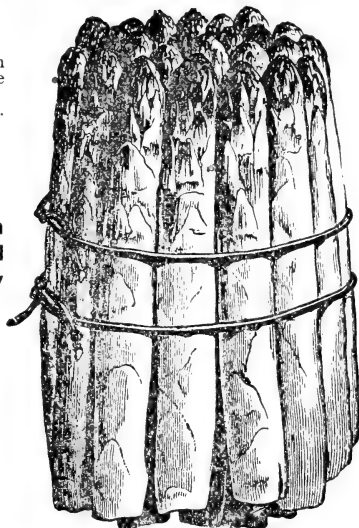

In the following list you will find only such varieties as have been thoroughly tested and found to be of special merit. All of our seeds are grown from the finest select stocks and for quality are unexcelled by any others. **WE HANDLE ONLY THE VERY BEST SEEDS and QUALITY** rather than price is our first aim.

25 cents worth of seeds free is allowed for each \$1.00 sent for seeds in packets and ounces. This premium must be selected in packets and ounces and does not apply on orders sent for farm seeds or collections.

ASPARAGUS. Barr's Mammoth.

This is an excellent variety. The stalks are of a green color, almost an inch in diameter from the bottom completely to the tip. They are of quick growth and free from woody fibre. We do not offer seed as the roots give much better satisfaction.

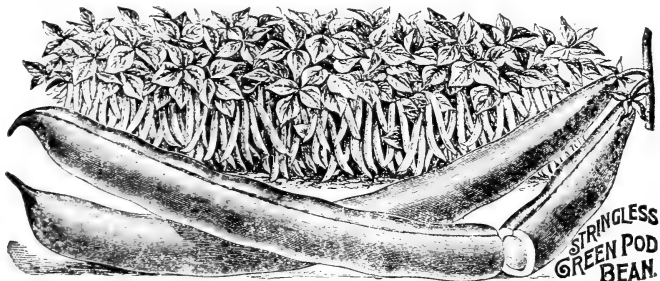

Price two year old roots, 25 cts. per dozen postpaid. Not prepaid 80 cts per 100.

ASPARAGUS

Unrivalled Bush Beans.

Our **SEED BEANS** are extra fine! They were grown on the **Fairfield Seed Farm**, were thoroughly rogued, hand picked and are worth much more than the less carefully selected strains as are usually sold.

Burpee's White Wax.

A large white seeded Butter Bean with handsome yellow pods which are absolutely stringless. The plants make strong robust bushes 15 inches high, with strong branches, which hold the pods well up from the ground and insures them from rusting. The pods are produced in great profusion, measuring from 5 to 6 inches in length, $\frac{1}{2}$ inch broad and are very meaty when ready for table use. They are always of fine flavor and attractive appearance served in any way. It is a general purpose variety of superior merit. Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 30 cts.; qt. 45 cts.

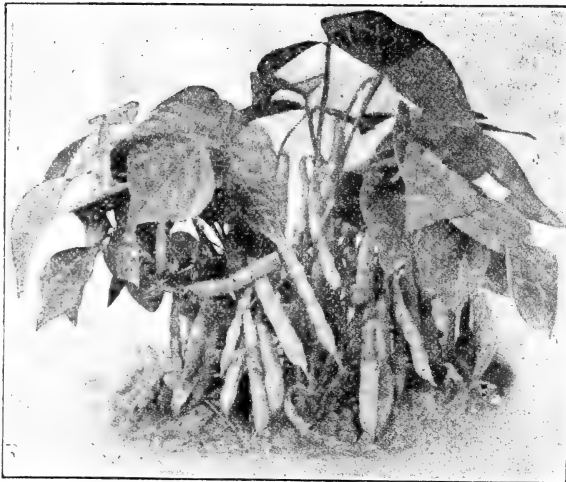

Stringless Green Pod.

This variety combines the following essential points; extreme earliness, being the first to produce pods, unusual hardness and great productiveness. The pods are from 5 to 6 inches long, very round, of a rich green color and entirely stringless even when matured.

They are tender, brittle and of the finest flavor. It is without any exceptions the finest green podded bean in cultivation. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15c.; pt. 25c.; qt. 40c.

Profusion Wax.

The leaves of this bean distinguish themselves from other varieties by their beautiful willow shape. It is very hardy having withstood frosts which seriously checked other varieties. The bushes are literally covered with the fine transparent yellow pods which are from 4 to 5 inches long, remarkably brittle, as it has no strings whatever. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

BURPEE'S WHITE WAX

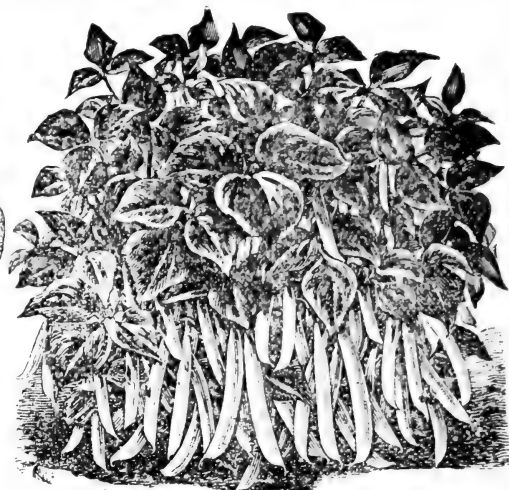

CURRIE'S RUST-PROOF WAX

Currie's Rust Proof Golden Wax.

ONE OF THE EARLIEST AND MOST PROLIFIC WAX BUSH BEANS.

The bushes are strong vigorous growers and bear an immense load of long, flat, many pods which are of the most handsome appearance. Not only does this variety possess the merit of being rust-proof but it is also extra early. The pods are exceedingly crisp and tender and of a most delicious flavor. Pkt. 5 cts.; ½ pt. 15 cts.; pt. 25 cts.; qt. 40 cts., postpaid.

PENCIL POD WAX

Pencil Pod Black Wax.

We consider this one of the best Wax Beans yet introduced. It is very productive, and of most excellent flavor. The pods are long, straight, and round like a pencil, fleshy and of a bright yellow color, tender, brittle and absolutely stringless.

The plants are of true bush growth 15 inches high, with abundant foliage. The magnificent pods are from 5 to 7 inches long. Pkt. 5 cts.; ½ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

WONDER BUSH LIMA BEAN.

We have grown this strain for four years and can truthfully say that it is the very best "Bush Lima Bean." It is a great improvement on

Burpee's Bush Lima. While the bushes are fully as productive, the pods are borne more at the center of the plant. This is a great advantage as the pods are held up from the ground. The bushes grow eighteen to twenty inches high, requiring no poles or stakes whatever. The pods are of truly mammoth size and contain from three to four large beans each. There is nothing quite so delicious in the vegetable line as nice fresh Lima Beans. Pkt. 10 cts.; ½ pt. 20 cts.; pt. 30 cts.; qt. 50 cts.

WONDER BUSH LIMA

POLE LIMA BEAN.

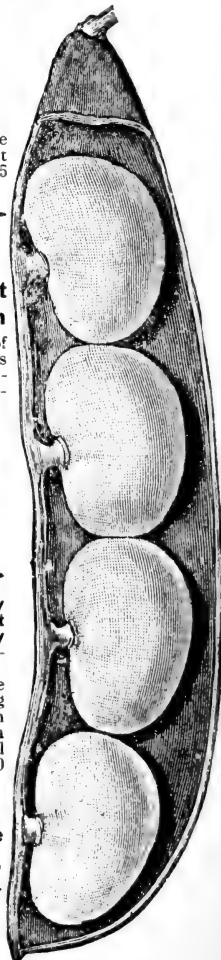

Henderson's Early Leviathan.

This is the very earliest. It will not only give pods earlier than any other strain, but it is also much more productive, both early and throughout the season. It is a strong grower, clinging well to the poles, and is a sure cropper.

The pods differ from those of other early pole limas in being straighter and longer. The pods hang out from the foliage in large clusters and contain three to four and sometimes five large beans to a pod.

It bears until frost, and a small patch will supply a family. Pkt. 10 cts.; ½ pt. 20 cts.; pt. 30 cts.; qt. 50 cts., postpaid.

Don't forget that we prepay the postage on all seeds by the packet, ounce, quarter pound, pound, half-pint, pint and quart. Remember this when comparing prices.

Pole Beans. Kentucky Wonder Wax.

The merits of the old Kentucky Wonder Pole Bean are well known.

This variety has all its superb qualities with the addition of a beautiful transparent yellow pod.

It is a rampant grower, one plant filling a pole with vines densely loaded with almost a solid mass of pods from bottom to top.

The pods are very large, being from 8 to 10 inches long, exceedingly tender and very fleshy.

The pods are so plump and fleshy that frequently they are of greater thickness than width. Deliciously rich and buttery when cooked.

Pkt. 10 cts.; ½ pt. 20 cts.; pt. 30 cts.; qt. 50 cts.

Prolific Green-Podded.

The best green-podded Pole Bean in cultivation.

It is earlier than most other varieties and covers a longer season of productiveness.

The vines are vigorous growers, being loaded with pods from summer until frost. It is a very sure cropper, even in unfavorable seasons producing large crops.

The pods, borne in clusters, average 6 to 8 inches in length, are uniformly straight, of a dark rich green color, and so meaty as to be nearly saddle-backed. The pods are entirely stringless, very tender and sweet and of mild flavor. The dry beans are of a pearly whiteness.

Pkt. 5 cts.; ½ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

FIELD BEAN Improved Prolific Tree.

A Wonderful, Productive, White Field Bean.

It is a sure cropper, and not only more prolific than the common white bean, but also of better quality. Vines are large, spreading, with small

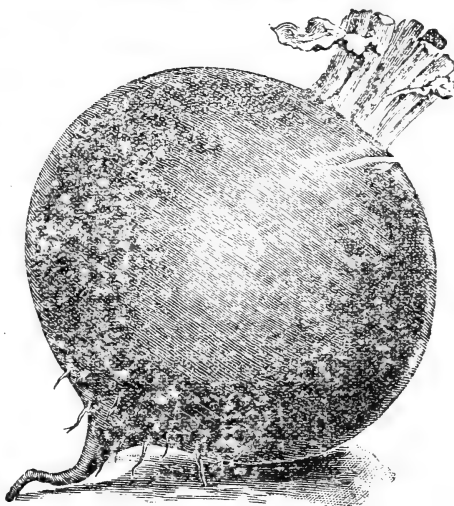

thin leaves, and occasional runners. The plants grow upright and bear the pods well up from the ground, thus keeping them away from the soil and making them more easily gathered.

Beans are pure white and of small size.

Pkt. 5 cts.; ½ pt. 15 cts.; pt. 25 cts.; qt. 40 cts., postpaid.

KENTUCKY WONDER WAX

EARLY MODEL

Garden Beets.

Our packets each contain one-fourth ounce of seed.

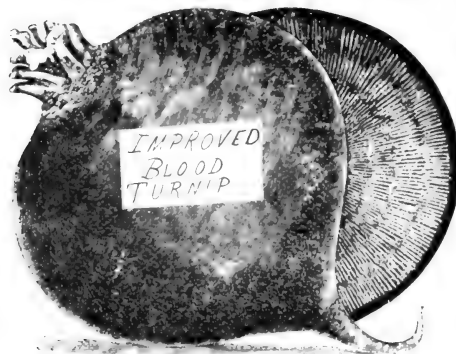

Early Model. This splendid variety has attained perfection for table use. It is extremely early, of perfect globe shape and finest quality. It is a fine selection of blood red beet, extremely smooth and of symmetrical growth, fine rich color and desirable shape.

The roots of Early Model are of good size and run uniformly perfect, almost round, with small dark crimson colored leaves and a slim tap root. It makes a rapid growth and matures very early.

In quality and color it is peerless; very fine grained tender and sweet, never woody or stringy. The tops are small making it a good forcing variety.

Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.

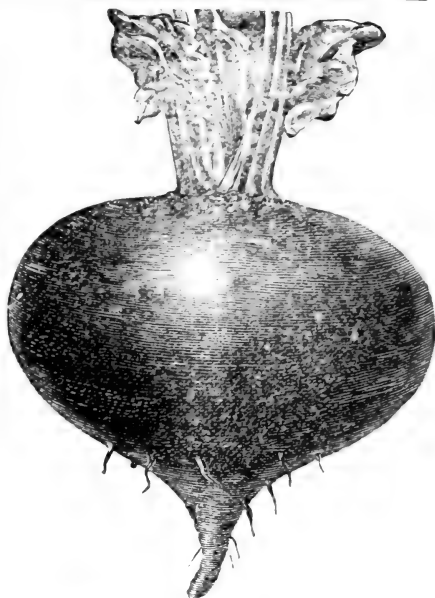

OUR SEED IS TESTED FOR GERMINATION AND IS SURE TO GROW.

Columbia.

An excellent early beet for all purposes. The roots are always smooth, from 4 to 5 inches in diameter, end of a neat turnip shape. The flesh is a deep red color and of fine quality remaining tender until the roots have reached their full size. The foliage is small and of a rich bronze color.

The roots can be used early in the season, when only partially grown. Pkt. 5 c.; oz. 10 c.; $\frac{1}{4}$ lb. 30 c.

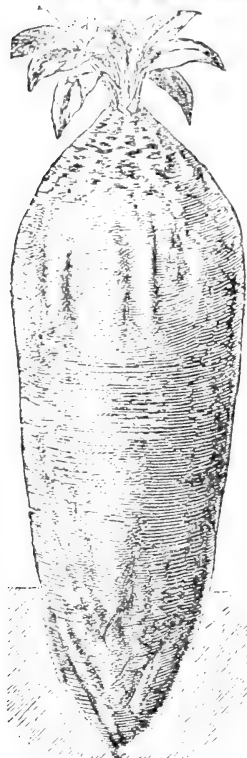

COLUMBIA

Improved Blood Turnip.

This is an improved strain of the popular Blood Turnip. It is very early, of perfect globe shape and free from side roots. The flesh is a deep red color, fine grained, sweet, and of a dark color when cooked. Tops are small and of uniform growth, the leaves, stems, and veins being a dark red. It grows quickly and is of fine quality. Excellent for summer, fall or winter use.

Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Mangels.

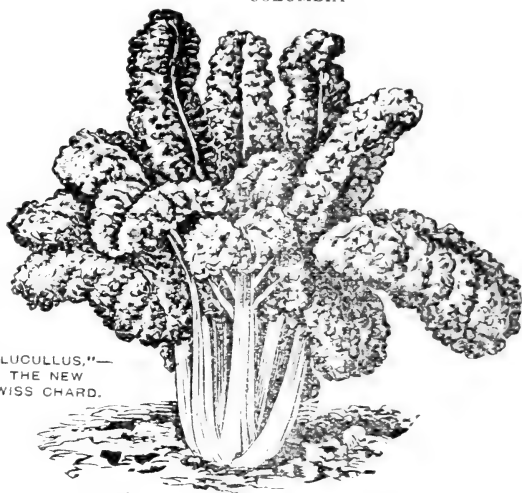

Mammoth

Long Red.

The best mangel for deep soil; large size; wonderfully productive and of superior quality. Specimens of this variety have been grown weighing 50 pounds. Oz. 5 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 55 cts., postpaid.

Golden Tankard.

A smooth yellow fleshed mangel; the roots are of large diameter, tapering quickly at the bottom, which is quite broad, with only a small tap-root. It is easily pulled and yields large crops. Oz. 5 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 55 cts.

"LUCULLUS,"—
THE NEW
SWISS CHARD.

Swiss Chard.

Lucullus. Plants grow two feet high and consist, when fully developed, of about a dozen creamy white, attractively curled leaves. These leaves are carried on broad, thick stalks about 12 inches long. The leaves may be cooked in the same manner as Spinach. Pkt. 5 c.; oz. 10c.

BORECOLE, or KALE.

DWARF GERMAN. Useful for furnishing greens or boiling during the early fall, winter, and spring months. The leaves are very curly, bright green, tender, and delicate in flavor. The plants are hardy and the quality is improved by freezing. Pkt. 5 c.; oz. 10 c.

BRUSSEL SPROUTS.

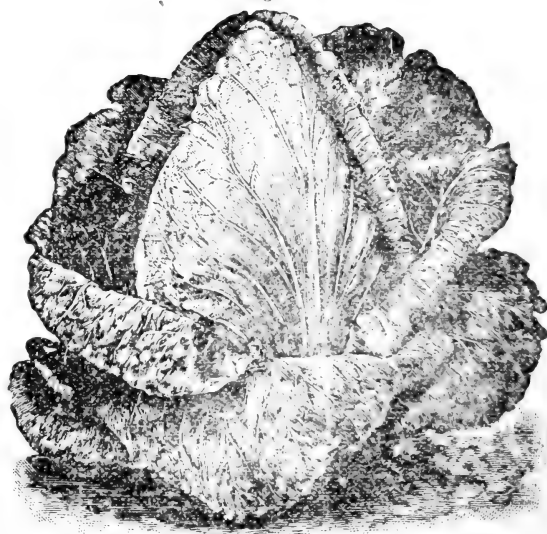

LONG ISLAND IMPROVED. The "sprouts" resemble small cabbages growing closely on the stalk of the plant. They are palatable and nutritious. It may be boiled like cabbage or cooked in cream like cauliflower. Long Island grown. Pkt. 5 c.; oz. 25 c.

Cabbage.

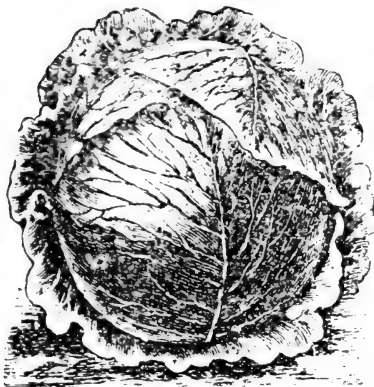

The Cabbage seed we are offering was grown with exceptional care. The plants were grown from the best stock, and were carefully inspected before being set out. Our packets contain seed enough to produce 500 plants.

Extra Early Express.

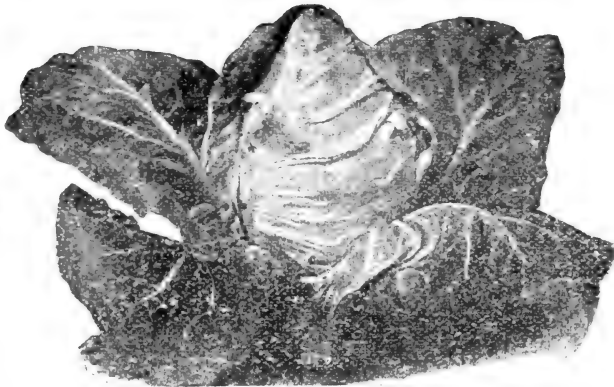

The earliest cabbage on earth. It produces heads of good size 7 to 10 days earlier than most other varieties. There are few loose leaves, and almost every plant forms a head of good size and fine quality. It can be planted close, and yields a large crop. A fine variety for shipping as the heads remain solid for a long time. Pkt. 5 c.; oz. 20 c.; $\frac{1}{4}$ lb. 60 c.

EXTRA EARLY EXPRESS

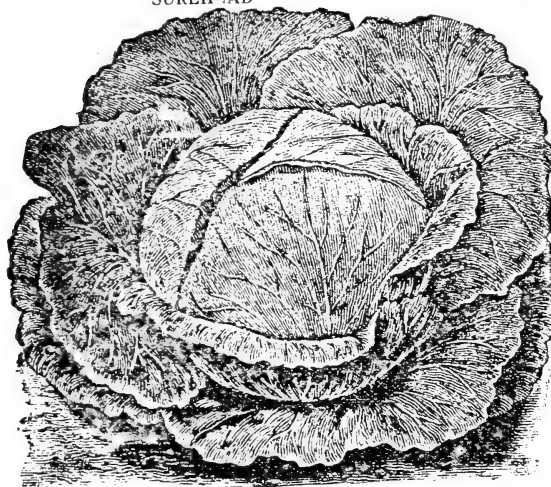

SUREHEAD

EARLY JERSEY WAKEFIELD

Early Jersey Wakefield.

The standard pointed-headed early cabbage throughout the U. S. The heads are uniformly large and solid. They are pyrarnidal in form, generally pointed at the ends, with but few outside leaves. The outside leaves are unusually thick and heavy, and it is thereby enabled to stand more cold weather without injury when carried through the winter. Pkt. 5 cts.; oz. 20 cts.; 1-4 lb. 60 cts.

ALLHEAD EARLY

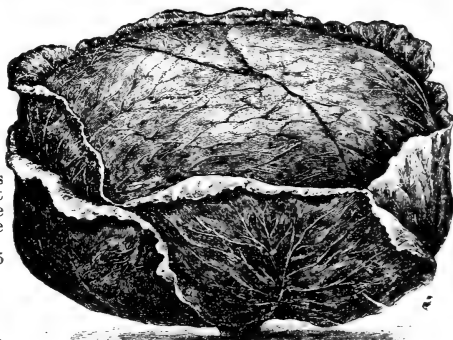

Surehead.

A leading late variety. It produces large round flattened heads of the Flat Dutch type, and is remarkable for its certainty to head. The heads are remarkably uniform, extremely solid, fine in texture and flavor, and ordinarily weigh from ten to fifteen pounds each. It has but few loose leaves and is an excellent keeper. Pkt. 5 cts.; oz. 20 cts.; 1-4 lb. 60 cts., postpaid.

Short Stem Drumhead.

This variety is extremely uniform in heading, and dwarf in growth, so that a great number of heads can be grown on a small area. The heads appear to rest on the surface of the soil. It grows with little outer foliage, the leaves all folding in closely about the head which is very solid. It is a standard sort for winter keeping, and sells readily in the winter and spring markets.

With good cultivation heads attain a weight of twenty to thirty pounds and are of the finest quality. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 60 cts., postpaid.

SHORT STEM DRUMHEAD

Danish Ballhead.

A GRAND HARD HEADED CABBAGE.

This type of winter Cabbage has become very popular of late years on account of its **UNEQUALED KEEPING QUALITIES** as well as for the great **SOLIDITY** and **WEIGHT** of the heads. It is strong and vigorous in growth, and produces large, round, compact heads, exceedingly hard and solid, weighing when trimmed, fully one-fourth more than any other cabbage of equal size. For boiling, slaw, sauerkraut, etc., it is unequaled, being crisp, tender and sweet.

It seems to grow well on all soils and under most conditions, withstanding hot, dry weather, and does not rot from the effects of wet seasons, neither do the heads burst. It is a splendid keeper. Our seed is imported from Denmark which is the finest and best grown.

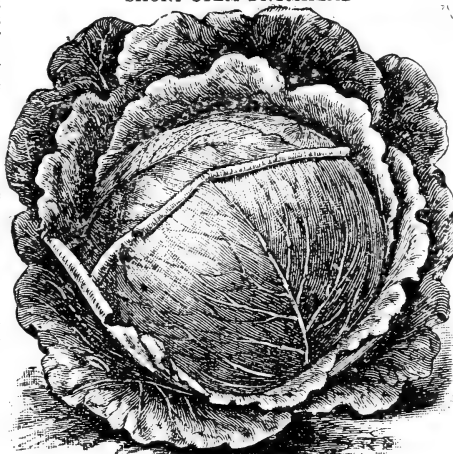

Pkt. 10 cts.; oz. 25 cts.; 1-4 lb. 80 cts.

Red Drumhead.

Heads are of large size, slightly rounded, and from 7 to 8 inches in diameter. Valuable for pickling. Sweet and tender. Pkt. 5 c.; oz. 15 c.

Perfection Savoy.

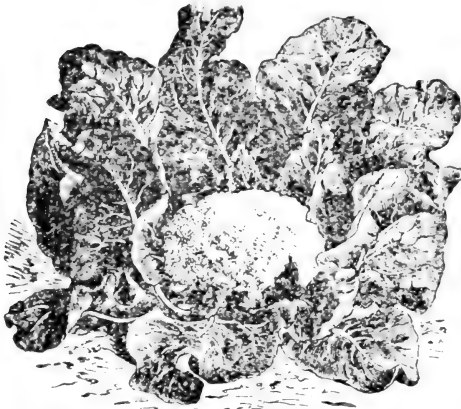

This is the hardest-heading and best all-round Savoy. It is very sweet and crisp and always tender. Pkt. 5 cts.; oz. 15 cts.

DANISH BALLHEAD,—from a Photograph.

Cauliflower.

Our Cauliflower seed is imported from Denmark. Danish grown seed is the finest and best in the world. Our packets each contain enough seed to produce 150 plants.

EARLY SNOWBALL

Early Snowball. For earliness, and reliability to produce a head of good size, and rich, white, curdy appearance it is unequalled. It forms snow white heads, six to ten inches in diameter, of good quality. While originally recommended and used as an early variety, it has not only supplanted all other sorts for spring planting, but it has largely driven out the large late sorts for fall use, being much finer in quality, and the one Cauliflower that is absolutely certain to head when conditions are ordinarily favorable. The heads are so solid, compact and deep that they will outweigh those of any other strain. There is a great difference in the strains of this variety offered, but our stock is the very best. Pkt. 15 cts.; 1/4 oz. 60 cts.; 1/2 oz. \$1.10; oz. \$2.00.

Dry Weather. Especially Adapted to Resist Drought. Reaches Perfection When Ordinary Sorts Fail. Pre-eminently the best early variety for the family garden and also for market gardeners in sections which are not especially adapted for Cauliflower. Plants are of vigorous growth producing large solid heads of snowy whiteness and fine quality. It has heavy foliage and is not liable to blight in hot weather. It is in all respects a first-class cauliflower, but is especially and peculiarly adapted to dry situations and to resisting the effects of droughts. It will also do well in moist or wet seasons, making heads equal to the best. Pkt. 15 cts.; 1/4 oz. 70 cts.; 1/2 oz. \$1.25; oz. \$2.40.

Autumn Giant.

This is a large variety, with fine, well proportioned heads. The heads are so well protected by the foliage as to remain fit for use a long time. Suitable for late planting. Pkt. 10 cts.; oz. 50 cts.; 1-4 lb. \$1.60, postpaid.

Carrots.

Our stocks of Carrot seed are true of type, being far superior to the common stock generally offered by most dealers. Our packets each contain 1-4 ounce of seed.

Early Scarlet Horn.

This is a popular early variety, three to four inches long and stump rooted; it is a favorite for bunching for market and is sometimes forced. The flesh is fine grained and the color a deep orange. It has small tops and grows well in shallow soil. A fine table Carrot and when pulled young is excellent for soups. This variety is considered by many people to be the best early table sort. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 50 cts.

Oxheart.

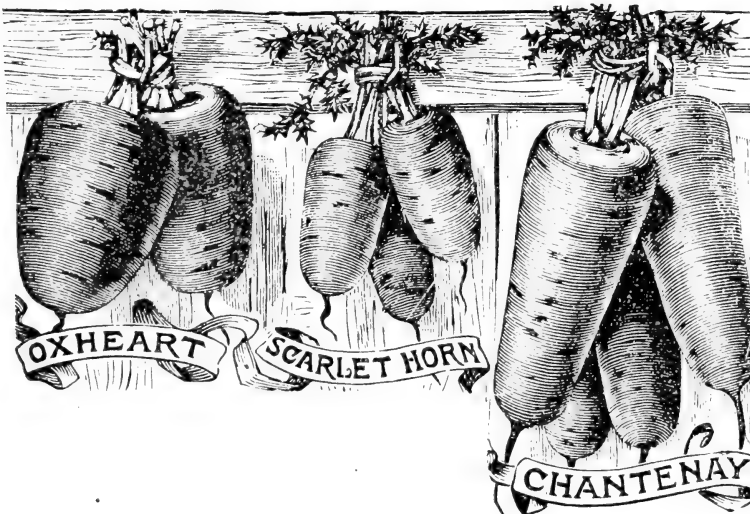

The most popular and best cropper among the short carrots. It runs fully 3 to 4 inches in diameter, and specimens have been raised measuring 7 inches in diameter. The quality is extra fine and satisfactory for home or market use. Oxheart can be easily pulled, which makes harvesting easy and inexpensive. It yields a heavy crop. Always of a good shape and rich orange color. Flesh fine grained with little or no core. Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 50 cts.

Chantenay.

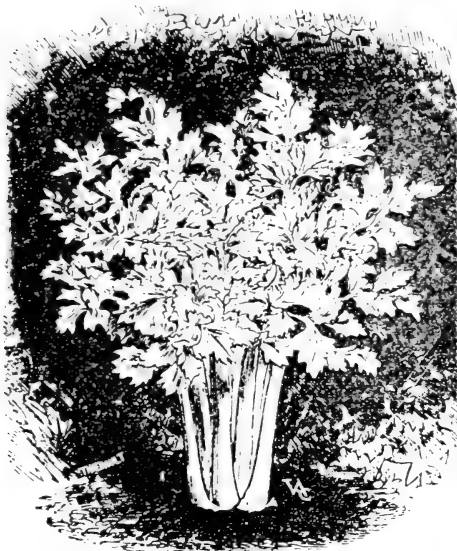

This variety is desirable in all respects; it is stump-rooted and therefore very easily dug. Roots are very smooth, fine in texture, and of a beautiful orange color. For table use it is considered to be the best of all, both on account of shape and quality. The flesh is very tender when cooked. It is a heavy cropper. Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 50 cts.

DRY WEATHER

WHITE PLUME

Giant Pascal.

One of the most popular sorts for winter use. It grows about two feet high; the stalks are thick, solid and stringless, and almost as brittle as glass. It is of strong growth, producing large perfectly blanched stalks when hilld up properly. Unequaled for rich nutty flavor. Blanches very easily. A fine keeper an excellent shipper, retaining color and fresh appearance as long as any other. For mid-winter and early spring use it is excellent. Pkt. 5 cts.; oz. 20 cts.

Golden Self-Blanching.

The best of all self-blanching varieties. It is without doubt the most popular celery grown. The ribs are perfectly solid, crisp, brittle, and of a delicious flavor surpassed by no other variety, while it has the decided merit of being self-blanching to a remarkable degree. This variety is being extensively grown both for market and private use, not only on account of its ease of culture, but for its superior quality. The hearts are large and solid, blanching to a beautiful golden yellow. When grown in moist soil the stalks are numerous and large in size. French grown seed. Pkt. 10 cts.; oz. 65 cts.

Winter Queen.

The most popular of all Celeries for winter. It grows very stout, thick and heavy, with a much larger heart than any other variety. It is a close, compact grower, branches to a beautiful creamy white and is showy and attractive in appearance when ready for table use. The stalks are solid, crisp and of a rich nutty flavor. It bunches up handsomely and presents an attractive appearance on the market. Pkt. 5 cts.; oz. 20 cts.

CELERIAC, or Turnip Rooted Celery.

This is an excellent vegetable. It produces large turnip-shaped roots which keep well for winter use. It is highly esteemed either cooked in the same manner as other vegetables, for flavoring soups, or sliced and used as a salad. Pkt. 5 cts.; oz. 15 cts.

CRESS. Fine Curled.

An annual making a good salad. Leaves are finely cut and feathery, like a good parsley. It is dwarf and compact in growth. Very ornamental; of quick growth; crisp and refreshing. Pkt. 5 cts.; oz. 10 cts.

Select Cucumbers.

Our Cucumbers were grown from the finest select stock, carefully rogued and true of type. The most of our seed was grown on the Fairfield Seed Farm, which for quality and productiveness is unexcelled. Our packets each contain 1-4 ounce of seed.

Extra Early White Spine.

A dark green, handsome cucumber, often attaining a length of twelve inches; straight and attractive in shape. It makes a hard brittle pickle when small, and a grand table variety when large.

Excels in earliness, often ready for slicing when other sorts are only pickles. Vines are vigorous; growers and bear large crops. It makes a valuable variety to plant for early market. Pkt. 5 cts.; oz. 10 cts.; 4 lb. 50 cts.

Celery.

Our packets each contain seed enough to produce 500 plants.

White**Plume.**

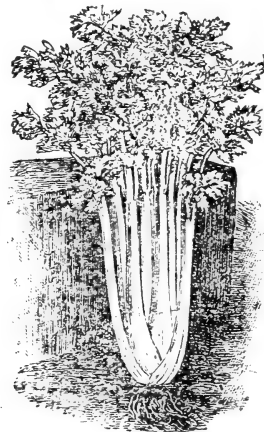

This is the earliest and most easily blanched Celery. The plants grow rapidly and blanch easily during the summer months.

Later in the fall the central stalks and leaves are of pure snowy whiteness even without earthing up, but stalks should be gathered together and earthed up as in other varieties, so as to produce close attractive bunches. As for succulence, crispness and quality, the White Plume is unequaled.

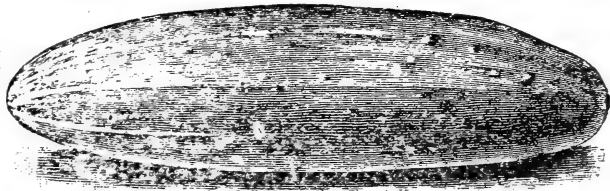

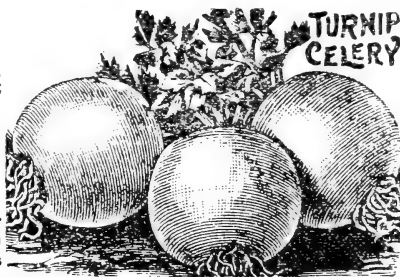

Pkt. 5 cts.; oz. 30 cts.

WINTER QUEEN

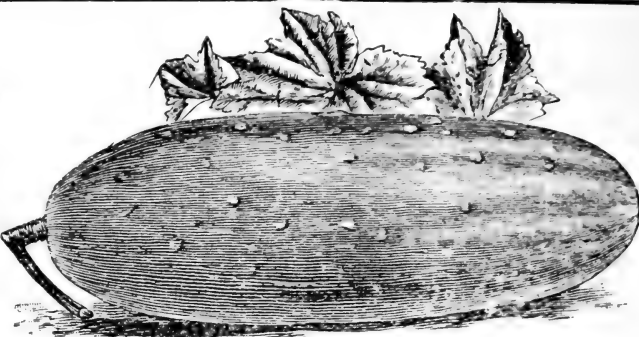

GOLDEN SELF-BLANCHING

CUCUMBERS--Continued, Fordhook Famous.

**The longest White Spine, finest
flavor of all Cucumbers.**

This is the handsomest of all long green cucumbers; always straight and well formed, they never turn yellow. Critical buyers are willing to pay an extra price on market for these unequalled fruits. The vines are of strong vigorous growth, with heavy foliage, and set the extra large fruits freely throughout the season. The cucumbers are smooth and regular in form, averaging twelve to fourteen inches in length, and have a very thin and tender skin. The flesh is very thick, crisp and exceptionally mild in flavor. The cucumbers are about all flesh as the seed spaces are very small. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 30 cts.

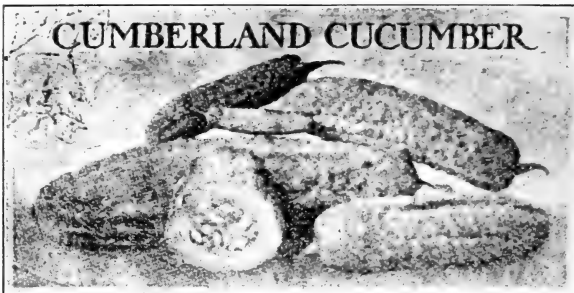

EXTRA EARLY WHITE SPINE--See page 15

Cumberland.

The vines are hardy, of strong vigorous growth, and very productive. The young cucumbers are thickly set with small spines, and are equally attractive for making small gherkins, medium-sized or large pickles. The straight young fruits possess the distinct roughened surface so much desired for small pickles. When matured the fruits average nine to ten inches in length, two and one-half inches in diameter, have well rounded ends, and are of excellent quality for slicing. We can honestly recommend this as one of the best pickling cucumbers.

Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 30 cts.

CUMBERLAND CUCUMBER

Emerald.

A symmetrical dark green cucumber which holds its color a long time after being picked.

It is strictly an evergreen retaining its color until quite ripe, making it an attractive variety.

The fruit sets early, and its vigorous vines abound in long, straight handsome fruits of the most desirable qualities. As a slicer, the flesh is perfectly crisp and tender, and the flavor most pleasing.

The young fruit being dark green, straight, slender and almost spineless, makes an excellent pickle, and when ripe none excel it for making sweet pickles. Good for forcing under glass, or for long distance shipping.

Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 30 cts.

Everbearing.

This is a very early variety and extremely prolific. If the fruits are kept gathered, vines will continue in bearing throughout the season.

The fruits, of a rich dark green color, average from four to five inches in length by an inch and a half in diameter. Owing to its great productiveness it is a fine variety to plant for producing small pickles.

Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 30 cts.

Sweet Corn.

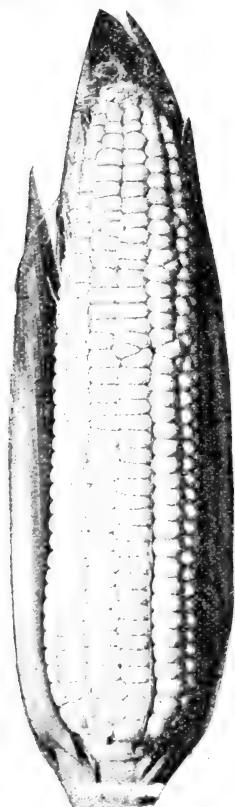

We offer FAIRFIELD³ Grown Stock which for quality and earliness is unsurpassed. Our packets each contain one and one-half ounces.

Early Fordhook.

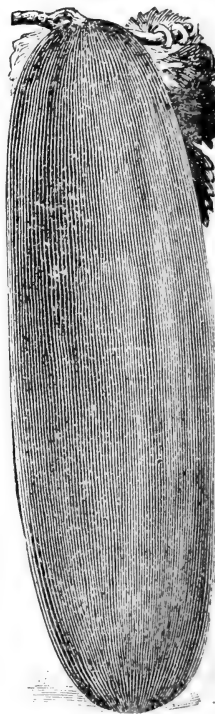

This is one of the earliest varieties of Sweet Corn in cultivation. The ears are large, averaging from six to eight inches in length.

It is a few days earlier than Cory, and has both grains and cob of a pure white color. Ears are eight-rowed, with quite small cobs and deep grains. The seed is of exceptional hardness, admitting to earlier planting than the later and more tender varieties. The stalks are of sturdy vigorous growth, three to four feet high, with abundant foliage, and generally produces two fine ears to a stalk.

Pkt. 10 cts.; 1 pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

EARLY FORDHOOK

EMERALD CUCUMBER.

Don't Fail to Take Advantage of Our Bargain Collection Offered on Page 22.

Get Acquainted with our Seeds. It will be to your Benefit.

Premo. Sweet Corn.

A LEADING EARLY VARIETY. It combines all the merits of the leading early varieties, but is superior to them all in size, quality and yield.

PREMO

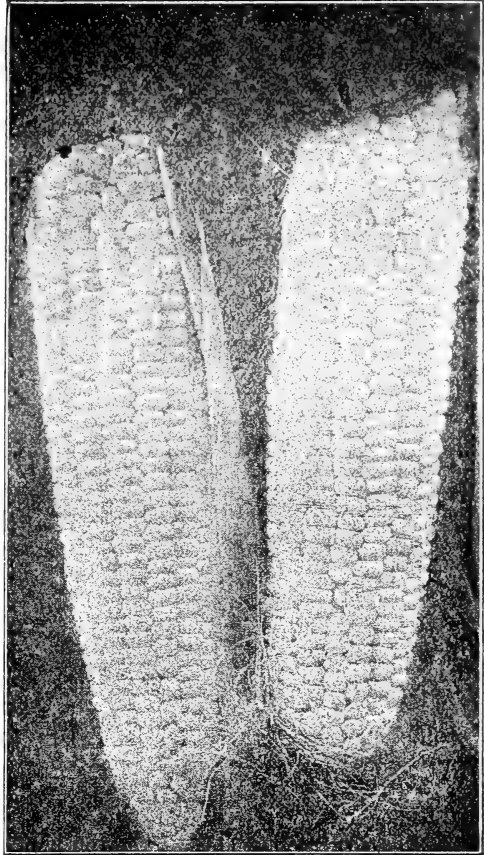

Premo is very hardy and may be planted sooner than other varieties. The stalks grow about five feet high and are very vigorous, generally bearing two well developed ears to a stalk. Its earliness and table quality is sure to bring it into favor with all gardeners.

Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

Howling Mob.

THE LARGEST-EARED, SWEETEST-FLAVORED EARLY VARIETY IN CULTIVATION. This variety is of exceptional hardness and productiveness. It produces an ear of large size, combined with an unusual sweet flavor for so early a corn.

The stalks are strong and vigorous, four to four and one-half feet high and generally produce two fine ears to each stalk. The ears are seven to nine inches in length, with fourteen or more rows of medium-sized pearly-white grains. The grains are sweet and rich in flavor. The ears are protected by a heavy husk which extends beyond the tip of the ear and forms a safeguard against the destructive green worms. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

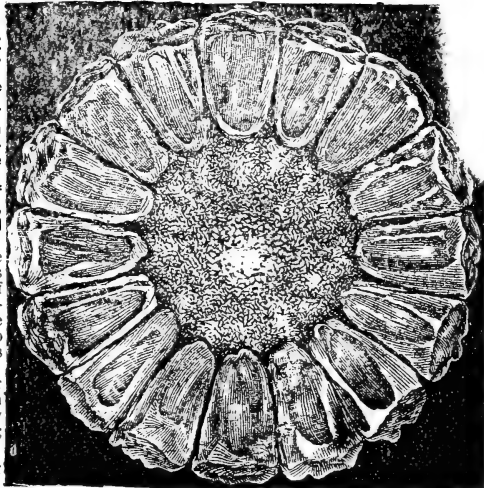

HOWLING MOB

White Evergreen.

THE LEADING LATE VARIETY OF SWEET CORN. The most valuable Sweet Corn ever introduced. White Evergreen is much superior to Stowell's. It retains all the most desirable features, with the added merits of pure whiteness in color, a more tender grain, and distinctly sweeter flavor.

The ears average very large and are well filled to the tips with the long sweet grains, of pure whiteness and most delicious flavor. The stalks are strong growers, from six to seven feet high, and sometimes bear three fine ears to a stalk. The ears contain sixteen or more rows of deep grains, which are protected by a thick heavy husk. Pkt. 5 cts.; $\frac{1}{2}$ pt. 15 cts.; pt. 25 cts.; qt. 40 cts.

Write for prices on larger quantities.

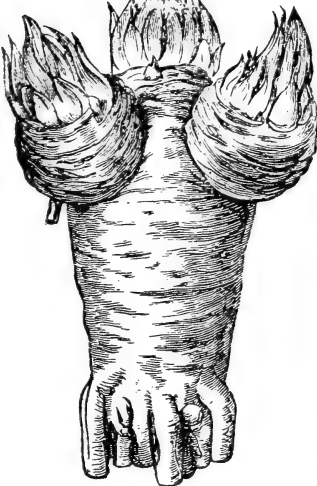

WHITE EVERGREEN

Pop Corn.

White Rice.

This variety is the best for popping; grains pointed; pops full and white; ears large sized, very handsome; productive; excellent quality; very crisp and delicious. Pkt. 5 cts.; pt. 20 cts.; qt. 35 cts., postpaid.

 For description and price of Horse Radish see page 18.

Rhubarb, or Pie Plant.

Victoria. A splendid variety, stalks very large and tender. For best results roots should be planted three feet apart each way. Ready about April 1. Price, 20 cts., each; 3 for 50 cts.; by mail postpaid.

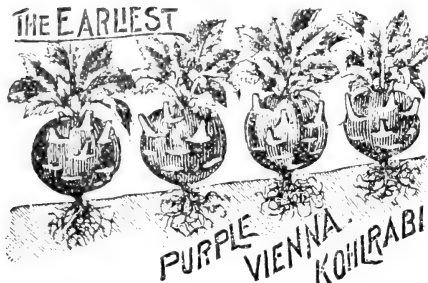

Kohl Rabi.

White Vienna.

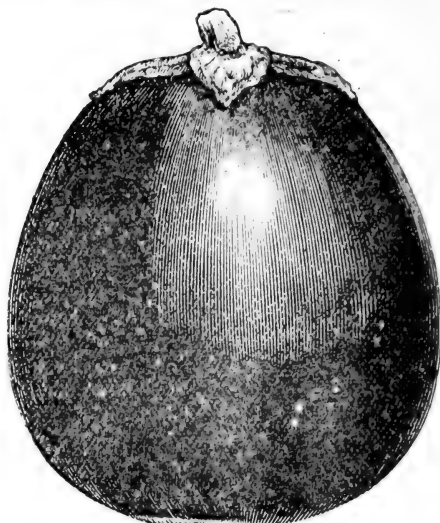

This vegetable is grown for its turnip-shaped bulb, which is formed above the ground. Excellent for soups or cooked in the same manner as turnips. The bulbs should be used while young and tender. The best for table use. Pkt. 5 cts.; oz. 15 cts.

THE EARLIEST

Purple Vienna.

Grows to large size and of juicy quality. Very early, of fine shape and delicate quality. Pkt. 5 cts.; oz. 15 cts.

BLACK BEAUTY EGG PLANT.

Egg Plant.

Black Beauty.

The earliest and best of all large-fruited Egg Plants. It is an extra early variety with fruits of a beautiful jet black color.

The fruits set freely and develop quickly so that the entire crop can be gathered before there is any danger of frost. It is of dwarf growth and bears its fruit, which weighs from one to three pounds, close to the stem. The calyx is entirely free from spines and thorns. The intensely brilliant coloring is uniform over the whole fruit. Pkt. 10 cts.; oz. 40 cts.

Lettuce.

You should grow Lettuce largely for your table! Nothing is more wholesome, and if you once acquire the habit you will wonder how you ever enjoyed a dinner without this salad. Our stock is extra fine. Our packets each contain 1-4 ounce of seed, sufficient to sow 25 feet of row.

May King.

This new variety has proved capable of satisfying the most exact requirements that could be made of an early head Lettuce. It is not in the least affected by cold or wet weather, but produces large solid heads, 10 to 14 days ahead of most other varieties. The plants grow from six to seven inches in diameter, with the outer leaves folded closely, forming the plant into a solid head. The outer leaves are light green, slightly tinged with brown; the inner leaves are light yellow and of a fine, rich, buttery flavor. Each head will weigh nearly a pound when trimmed. Pkt. 5 cts.; oz. 10 cts.; 1 lb. 40 cts.

DEACON
LETTUCE,
from a
Photograph

For description of Deacon see page 19.

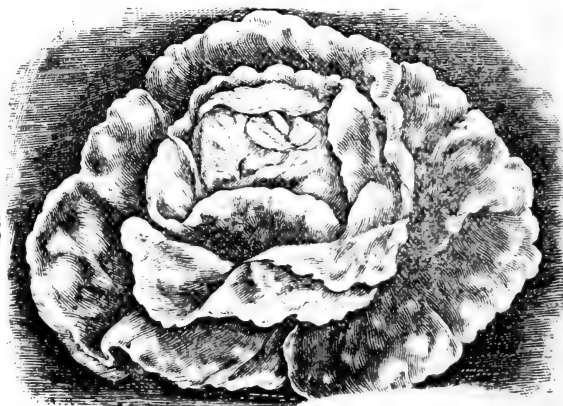

Horse Radish.

Maliner Kren.

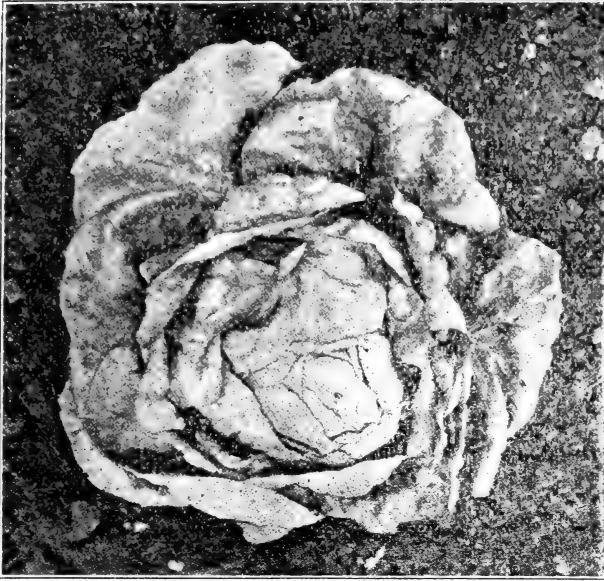

A new, very quick-growing, large-rooted variety. Cuttings set out in April will yield large bottoms in October. Its flavor is the best, this is very noticeable in the fall when the old variety would be too old and juicy for use. Roots are as white as chalk. It is as easily grown as potatoes and should be grown in every garden. Per dozen, 25 cts., postpaid. Ready for shipping about April 1.

LEEK. Long Mezieres.

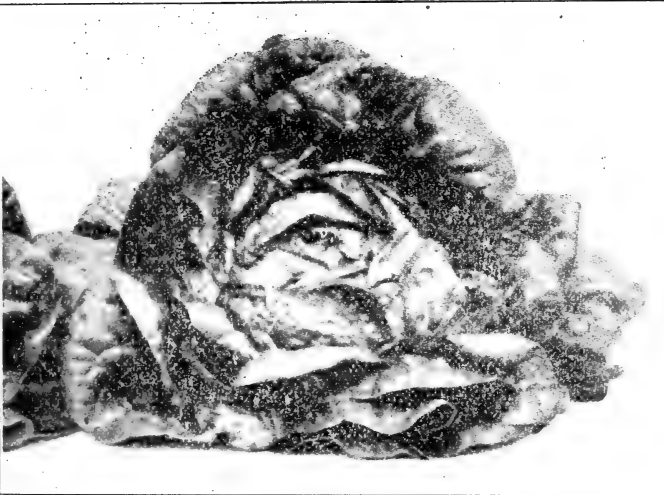

Most highly esteemed for flavoring soups, stews, etc. The plants are of strong, vigorous growth, and have extra long stems, which blanch to a snowy whiteness and are of delicious flavor. Pkt. 5 cts.; oz. 15 cts.

May King

NAUMBERGER

CALIFORNIA CREAM BUTTER

Deacon.

This magnificent lettuce stands hot weather better than any other of the rich butter varieties and is therefore most popular. Plants make firm heads, nearly as large and almost as solid as a cabbage. The heads are light green outside, while the inner blanched portion is beautiful cream-yellow and of delicious rich buttery flavor. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts. See cut on page 18.

All Heart.

An exceptional hardy variety producing medium sized heads quite early. It is a very desirable variety for hot-bed culture in winter and for withstanding heat in summer. The heads are from five to six inches in diameter, very solid, and the inner leaves blanched to a rich creamy white. The large solid heads are exceedingly crisp and tender and of fine quality. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

Naumberger.

This new variety is sure to become famous for its remarkable certainty to produce a fine solid head of large size. It might aptly be called "SUREHEAD." It is also extra early, being one of the first to head; the heads will stand longer without rotting or bolting to seed than any other variety. The quality is all that can be desired, being tender, buttery and of very mild flavor. Most highly recommended. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

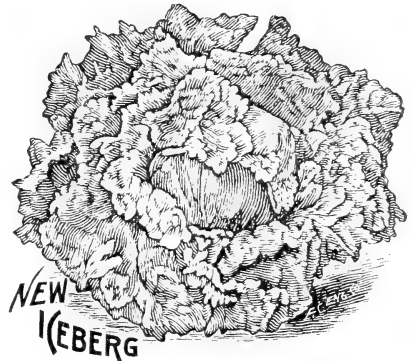

Butterhead. A grand, mammoth hard-heading Cabbage Lettuce.

Plants have extra large solid round heads, sometimes measuring twelve inches across, that are particularly rich and buttery in flavor; always well blanched and tender. The inner leaves are beautifully white and finely curled. Splendid for summer use, both for the home table and for market. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

California Cream Butter.

A GRAND CABBAGE LETTUCE.

A Grand, Good, Butter Lettuce for summer use. The heads are of good size, round and solid. The outside leaves are medium green, while those within are of a rich cream yellow, Rich and buttery in taste. It produces large solid heads even in hot weather. Easy to grow and a good shipping variety. This is one of the finest and best sorts ever offered. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.

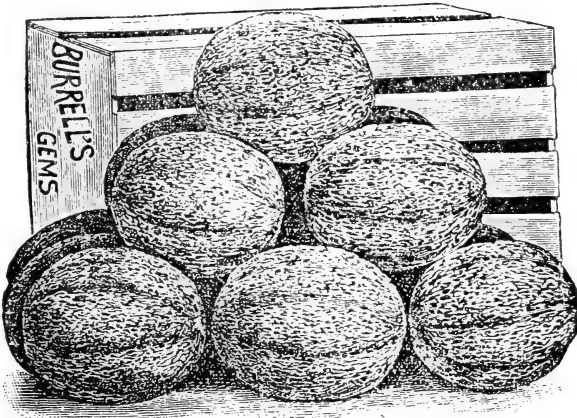

New Iceberg.

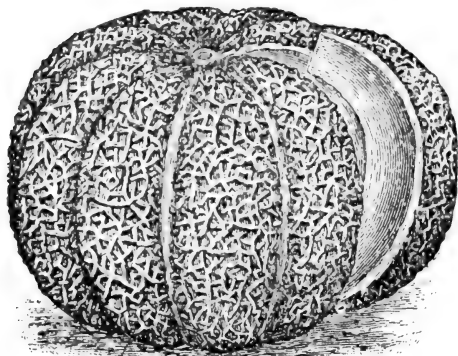

The unusual solidity of the heads is assured by the large white main ribs of the leaves, each of which, curving strongly into the center, acts like a truss, making it impossible for the leaves to open outward and expose the center, which is always thoroughly blanched. It is quick growing and always crisp and tender whether propagated in early spring or in the hot days of summer. The heads are of good size. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.

Grand Rapids.

A well known forcing variety for the middle West where butter head varieties do not grow well under glass. It does not form heads, but makes large bunches of light green leaves with fringed edges. Its delicious quality and handsome appearance makes it the most popular for early spring or fall sowing. Its upright habit of growth permits close planting. It will make a quick growth under adverse conditions and is not subject to rot. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts., postpaid.

For description of Burrell's Gem see next page.

EXTRA EARLY HACKENSACK

ROCKY FORD

Musk Melons.

NEW MODEL CANTALOUPE

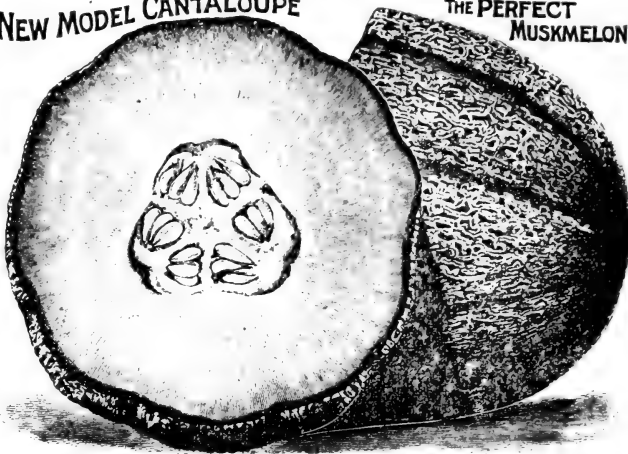

THE PERFECT MUSKMELON

Our packets each contain 1-4 ounce of seed.

New Model.

SPICY GREEN FLESH. SMALL SEED CAVITY. A PRODIGIOUS CROPPER.

The Model is an early cantaloupe, about twice the size of Rocky Ford, and more productive. It is almost round; the flesh is thick and firm, green-colored, while in delicacy and flavor it is unexcelled. The flesh extends from the rind almost to the center of the melon. The Model bears transportation well, and can be carried to distant cities without injury. The average weight per melon is over two pounds. No one who wants good melons for home or market use should fail to plant this variety. Pkt. 5 cts.; oz. 15 cts.; 4 lb. 50 cts.

Burrell's Gem.

A very popular salmon fleshed melon in all leading restaurants. The melons are six to seven inches long by four and a half to five inches in diameter, rather sharply sloping at the ends. They are quite well ribbed and covered with a fine grayish netting. The skin is a rich

dark green, contrasting finely with the deep orange-salmon colored flesh, which is very sweet and tender. The flesh is thick and firm, ripening close to the skin, leaving only a thin rind. See cut on page 19. Pkt. 5 cts.; oz. 15 cts.; 4 lb. 30 cts.

Extra Early Hackensack.

This is a selection of the popular Hackensack, but ripens fully 10 days earlier. A bountiful yielder and one of the most extensively grown of all musk melons. It is a large, round variety, flattened at the ends, well ribbed and deeply netted. The flesh is green, inclining towards yellow at the center, and of the most delicious flavor. Fruits attain a good size. The vines make good strong growth and bear abundantly. It is also considered a good shipping melon. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 30 cts.

Paul Rose.

This variety combines all the good qualities of Netted Gem and Osage, the varieties from which it originated; possessing the sweetness of the latter with the finely netted appearance of the Gem. The fruits are nearly round or slightly oval and of a light green color when fully ripe. The flesh is thick, of a rich orange color, and ripens close to the rind. Its firm flesh makes it an ideal shipper. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 30 cts.

Netted Gem, or "Rocky Ford".

The most popular green fleshed musk melon. The vines are exceedingly strong and healthy, bearing an enormous quantity of fruits during the entire season. The color of the skin is a rich greenish gold; the netting is prominent and light in color. The flesh is very deep, ripening clear to the rind, solid and of fine quality. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 30 cts.

Water Melons.

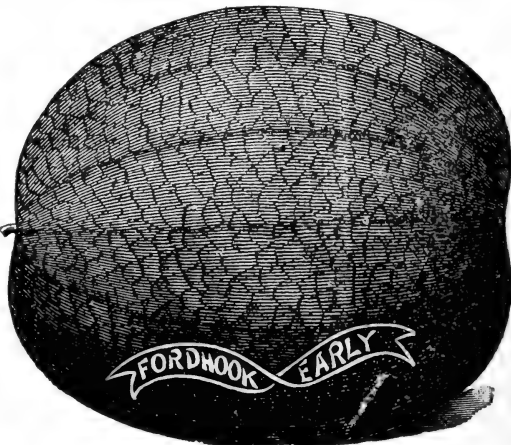

Our packets each contain 1-4 ounce of seed.

Fordhook Early.

This is the only extra early water melon we have that is of good size and quality. From seed planted May 10, large ripe melons were picked the last days of July. The vines are of strong vigorous growth, setting melons in good numbers. Flesh bright red, crisp, sweet and of splendid quality. The quality continues to improve after ripening. The heart is large, there is little or no seed cavity, and very few seeds—all solid flesh, the quality of which is sustained clear to the rind. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.

Dixie.

A water melon of highest quality and value. The size is large, specimens of 50 pounds being not infrequent. Flesh is scarlet, very fine and extra firm. This variety is the most prolific known, often producing six to eight melons on a single vine. The vines root at the joints, and thus become more drought resisting and vigorous. This is a famous Southern melon and is grown largely for the markets. See cut on page 11. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 20 cts.

Halbert Honey Water Melon.

**THE VERY FINEST
MELON IN CULTIVATION
FOR HOME USE OR
NEARBY MARKET.**

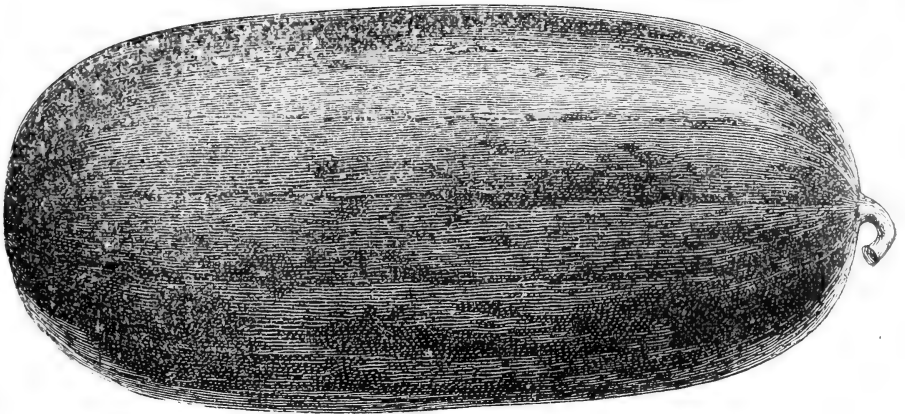

A melon that has no equal in beauty, quality, and productiveness.

The melons are smooth and regular in outline, fourteen to eighteen inches long and six to eight inches in diameter.

Color of the rind is a clear, glossy deep green. The flesh is a beautiful crimson, extending to within less than half an inch of the rind, which like the rind is so tender that it will not stand shipping a long distance unless carefully handled.

The first melons ripen early and the vines continue to develop fine fruits throughout the season; even the late fruits are of the same large size and regular form.

The sweet flesh melts away in the mouth like honey. Pkt. 5 cts.; oz. 10 cts.; 1 lb. 25 cts.

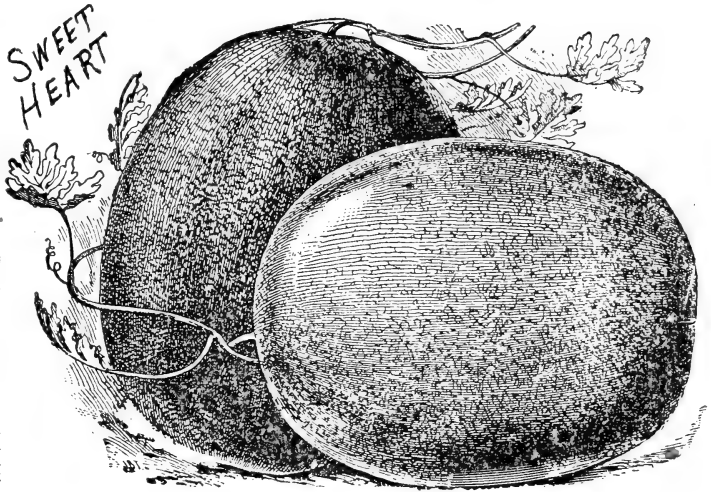

HALBERT HONEY

Sweet Heart.

A large water melon nearly globular in shape, but a little longer than thick. Fruits are large and heavy, skin very pale green, with distinct netted lines of a slightly richer shade. The solid flesh is a deep rich red, crisp and melting; its excellent quality has made it a leading favorite on the market. The vines are vigorous and productive, ripening the fruits quite early.

A good keeper and a good selling melon, being attractive and of good quality. The handsome fruits bear shipping well. Pkt. 5 cts.; oz. 10 cts.; 1 lb. 20 cts., postpaid.

Dark Icing.

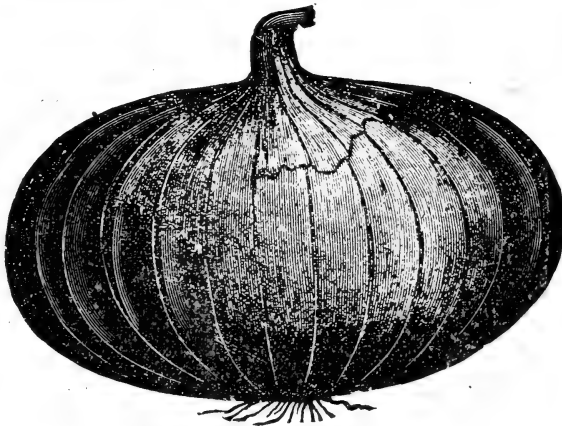

A nearly round white seeded water melon, with very thin rind. The flesh is deep pink and of delicious sweetness. Fruits large, very dark skinned and of attractive appearance. The vine is a remarkably strong grower and a heavy bearer. It is an excellent shipper notwithstanding its thin rind.

Pkt. 5 cts.; oz. 10 cts.; 1 lb. 20 cts.

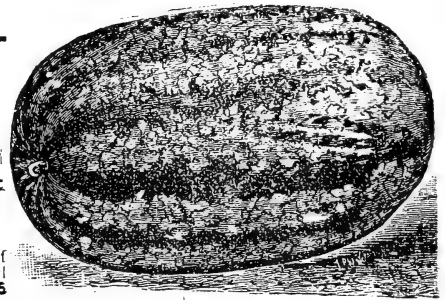

Onions.

We make a specialty of "HIGH GRADE" Onion Seed.

It is better to plant no Onions at all than to sow seed of poor quality. Our seed is grown from the finest selected bulbs and is of strong vitality.

LARGE RED WETHERSFIELD

A package of
Onion seed will
sow about 35
feet of drill.

DIXIE See page 21

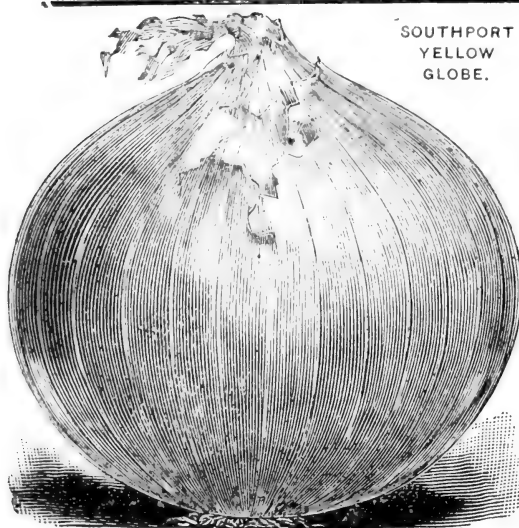

Large Red Wethersfield.

The most popular red variety. It is very productive having yielded over 1,000 bushels per acre. It is not an early ripening sort, but continues in growth throughout the season and consequently makes very large onions.

The bulbs are large though somewhat flattened as shown in the illustration. The outer skin is a deep purplish red; flesh white slightly tinged with rose. It is a fine keeper; suitable for late winter markets.

The best variety for poor or dry soils. You will make no mistake by giving this variety a trial. Pkt. 5 cts.; oz. 15 cts.; 1 lb. 45 cts.; lb. \$1.60.

REMEMBER THAT OUR SEED STANDS FOR "QUALITY." AND DON'T FORGET THAT OUR PACKETS ARE "LIBERAL" SIZE.

SOUTHPORT
YELLOW
GLOBE.

Three True Globe Onions.

THE SOUTHPORT GLOBE ONIONS HAVE INCREASED WONDERFULLY IN PUBLIC FAVOR DURING THE LAST FEW YEARS, AND THEY WELL DESERVE THEIR POPULARITY. In almost all markets they will invariably bring top prices.

They are not only of handsome appearance, remarkable solidity, and good keepers, but also fully equal in yield to the **BEST STRAINS OF ANY VARIETIES.**

Southport Red Globe.

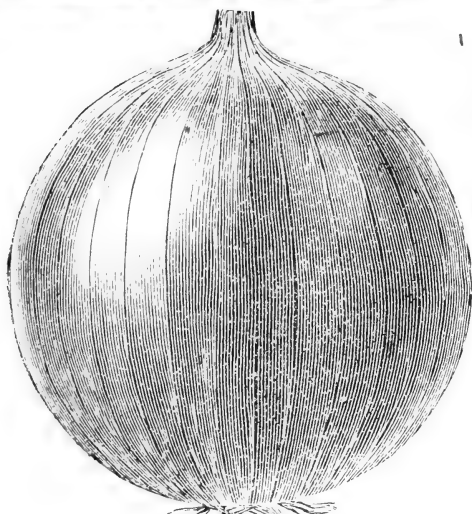

A handsome Onion of immense size, averaging nine to ten inches in circumference, solid, heavy, and of perfect globe shape. The skin is a glossy deep purplish-red color. The flesh is close-grained, sparkling white, cooking tender and mild. It is hardy, a splendid keeper, and a big yielder, averaging, under good culture, from 800 to 1,000 bushels per acre. Our strain of this seed is unsurpassed, the bulbs being selected for largest size; solidity, brilliant rich color, and typical globe shape, with small necks, thus insuring thorough and regular ripening and curing. **Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 45 cts.; lb. \$1.60, postpaid.**

Southport Yellow Globe.

This is one of the most satisfactory and popular varieties raised for family use or for market. It is an enormous yielder, hardy and reliable, making under normal conditions, often up to 1,000 bushels per acre. The onions are models of perfection, growing uniformly deep and globular in shape, veritable globes of gold, and are extra large, averaging nine to ten inches in circumference. The color of the skin is an attractive golden-yellow; the flesh snow-white, firm, mild and juicy. The small necks enable the onions to ripen down evenly; insuring good keeping qualities. **Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 45 cts.; lb. \$1.60.**

Southport White Globe.

The most beautiful Onion grown, being of symmetrical globe shape with a smooth satiny-like skin, forming a perfect silver ball. It grows to a large size, averaging 7 to 9 inches in circumference and is solid and heavy; the flesh is purest white, close and fine grained, mild and of delicate flavor. Owing to its large size it is later in ripening than the White Portugal or Silverskin. As soon as ripe the bulbs should be stored in a cool dark shed or dry cellar. It is a heavy cropper. For the family garden as well as for market it is a valuable Onion. **Pkt. 10 cts.; oz. 20 cts.; 1-4 lb. 50 cts.; lb. \$2.00.**

YELLOW GLOBE DANVERS

Yellow Globe Danvers.

This is a standard yellow onion and is more largely grown than almost any other variety. The bulbs grow to about two and one-half inches in diameter, are nearly globe shaped, and of a light golden brown color. The flesh is pure white. The bulb is extremely hard and solid, and its earliness, sure cropping character, handsome appearance and excellent quality, have placed Yellow Globe Danvers among the leading varieties for the home or market garden. **Our strain of this variety is UNSURPASSED. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 45 cts.; lb. \$1.40., postpaid.**

Our Great 25c.

BARGAIN COLLECTION.

Here is a **REAL BARGAIN**, one that can't be beat at such a low price. **8 Regular Full-Sized packets for 25c. as follows.**

RADISH, Non Plus Ultra
TOMATO, Earliana

SOUTHPORT RED GLOBE

Onion Sets.

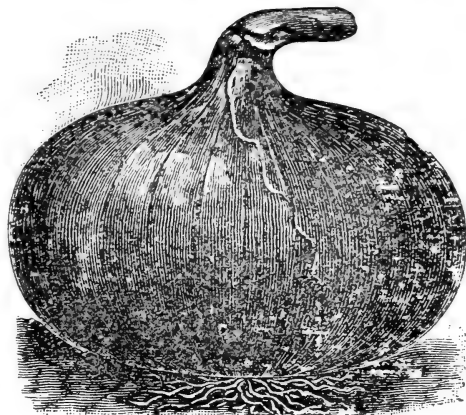

The planting of Onion Sets is increasing rapidly year after year. By planting sets you can have onions ready for use several weeks earlier than can be had by sowing seed.

White Bottom Sets. These are small, solid and of a beautiful silvery white color. A favorite sort in private and market gardens. Pint, 15 cts.; qt. 25 cts. postpaid.

Yellow Bottom Sets. Produced from seed which makes the finest yellow sets. Fine and dry, medium in size and unsprouted. Pint, 15 cts.; quart, 25 cts.

Red Bottom Sets. These are planted to produce both early green and late eating onions. Pint, 15 cts.; qt. 25 cts., postpaid.

We can supply you with Onion Sets in any quantities. Write for special prices

AUSTRALIAN BROWN

Australian Brown.

This remarkable onion is of medium size, wonderfully hard and solid and most attractive for market, both in form and appearance. They are extremely early in ripening and make no stiffnecks or scallions. Every seed seems to produce a good sized onion, and the bulb begins to form very quickly, when the plant is not over three inches high. It has the reputation of keeping indefinitely, and we think from its firmness and hardness that it will keep in good condition longer than any other onion known. The color of the skin is a clear amber-brown.

Bulbs of this variety have been kept in fine condition for a year after being harvested. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 40 cts.; lb. \$1.40, postpaid.

Mustard.

Gigantic Thick Leaved.

This new variety has proved itself superior to anything yet offered. Each plant produces a great number of large thick leaves which are of the finest flavor. Grown rich soil the leaves attain a length of two feet. A single plant will produce sufficient leaves for a large mess of greens. It is excellent for boiling. Pkt. 5 cts.; oz. 10 cts.

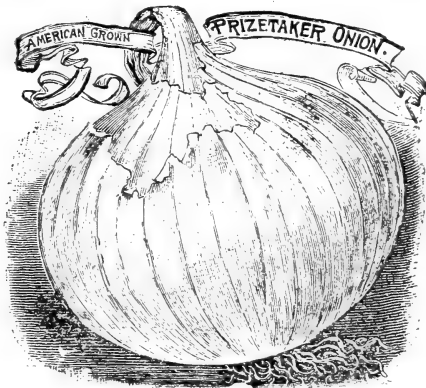

Okra.

White Velvet. The long, tender pods of okra are very delicious when sliced and cooked in soups. While this is its chief use it is also boiled and served like other vegetables. The pods should be gathered while young, as they are then very tender. The plants are of tall growth, with long pods, which are round, smooth, and white. Pkt. 5 cts.; oz. 10 cts.

PARSLEY. Moss Curled.

The leaves are of an extra dark green color. It is very productive, and on account of its densely curled character of its leaves a large quantity can be gathered in a short time. It is much used for flavoring and garnishing. Pkt. 5 cts.; oz. 10 cts.

Prizetaker.

THE KING OF ALL YELLOW GLOBE ONIONS.

This is one of the largest onions in cultivation. It is the large, beautiful Spanish variety so often seen in the fruit stores and markets of all large cities. Bulbs are nearly globe shaped, with bright straw colored skin, growing to an immense size the first season from seed.

They ripen up without stiffnecks and present a very handsome appearance. The flesh is pure white, fine grained, delicious and mild in flavor; fine for fall and early winter use. Bulbs measure from twelve to fourteen inches in circumference and under special cultivation specimens have been raised weighing five pounds each.

In the markets they attract special attention and sell readily at good prices. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 40 cts.; lb. \$1.50, postpaid.

Silverskin.

The leading White Flat Onion. For the family garden it is one of the best. The bulbs attain a good size, ripening evenly; the color is a beautiful silvery-white when cured. Its shape is flat but symmetrical. For a white variety it is not only early but also a good keeper. For slicing and boiling it is one of the best, the flesh being mild and tender. It is largely grown for pickling, being sown three or four times as thick as usual, and is also extensively sown for sets. Pkt. 5 cts.; oz. 15 cts.; 1-4 lb. 60 cts.; lb. \$2.00, postpaid.

PARSNIP.

Improved Half-Long.

This variety is an improvement on the old Hollow Crown, forming roots shorter and thicker than that variety and is also more easily gathered. The flesh is white, of fine texture, free from core and stringiness, and of the finest flavor when cooked. This parsnip is one of the heaviest croppers and we recommend it both for garden and field culture. Its quality is improved by freezing. Pkt. 5 cts.; oz. 10 cts.; 4 lb. 20 cts.; lb. 65 cts.

Choice Garden Peas.

Our Peas are Northern Grown and free from bugs. They are the earliest, hardiest and most productive. They were grown from the finest selected stock, are bright, handsome, of perfect growth, were critically rogued and carefully hand-picked. The Pea crop never was as small as this year so we will advise our friends and customers to send their orders early so they may be filled before our stocks are exhausted. Packet of Peas contains TWO OUNCES.

Jung's Best Extra Early.

The best strain of Extra Early and remarkable Extra Early Peas yet developed. The vines are quite slender, of very quick growth, and average eighteen to twenty five inches in height. The pods are well filled and the entire crop can generally be gathered at one picking. Every seedsman claims to sell an "earliest" Pea, but after testing them all, we know that **not one equals our own strain.** It is equally as early as the choicest stock of Alaska, and is much sweeter in flavor. Pkt. 10 cts.; 1/2 pt. 20 cts.; pt. 35 cts.; qt. 55 cts.

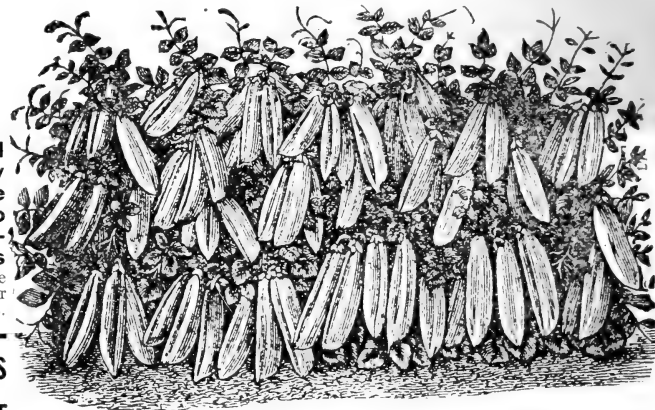

Early Excelsior.

The leader of the early dwarf wrinkled Peas. It grows to a height of about twelve inches; of compact growth being similar to Nott's Excelsior in this respect but superior to it in the following particulars; first, vines are more dense and sturdy; second, the peas and pods are decidedly larger, measuring from three and one-half to four inches in length; and contain from six to eight peas of delicious quality; it is a much surer cropper. It is also very early, the past two seasons it was ready for use 45 days after sowing. Pkt. 5 cts.; 1/2 pt. 20 cts.; pt. 35 cts.; qt. 55 cts.

Best Extra Early

Nott's Excelsior.

The sweetest and most prolific of all Early Dwarf Peas. A very fine variety of dwarf compact growth, with pods three inches in length, which are well filled to the squared ends with large peas of unusually sweet flavor. It is of vigorous growth and wonderfully productive. It grows from twelve to fourteen inches high. The best sort for the home or market garden. Pkt. 5 cts.; 1/2 pt. 20 cts.; pt. 35 cts.; qt. 55 cts.

EARLY EXCELSIOR

DONT FORGET THAT JUNG'S SEEDS GROW AND ARE THE BEST THAT GROW. DONT RISK YOUR GARDEN BY PLANTING SEED OF DOUBTFUL QUALITY. PLANT JUNG 'QUALITY SEED' AND YOU WILL NOT BE DISAPPOINTED.

DONT FAIL TO TRY Jung's Fair-field First Tomato THE EARLIEST AND FINEST TOMATO GROWN. FOR DESCRIPTION AND ILLUSTRATION SEE PAGE SIX.

British Wonder.

THE SWEETEST FLAVORED PEA IN CULTIVATION. Even sweeter in flavor than either Gradus or Thomas Laxton.

The growth is similar to Carter's Daisy, except that the foliage is darker green and pods are not so sharply pointed. It is, however, much more reliable, and is a **SURER CROPPER.**

The vines are very stocky, twelve to eighteen inches tall and are well supplied with light green foliage, which indicates great vigor. The pods are produced in the greatest profusion, measuring about four inches in length, and contain from eight to ten large dark green peas each which are of a most luscious flavor. It matures a little earlier than Dwarf Telephone. Most highly recommended.

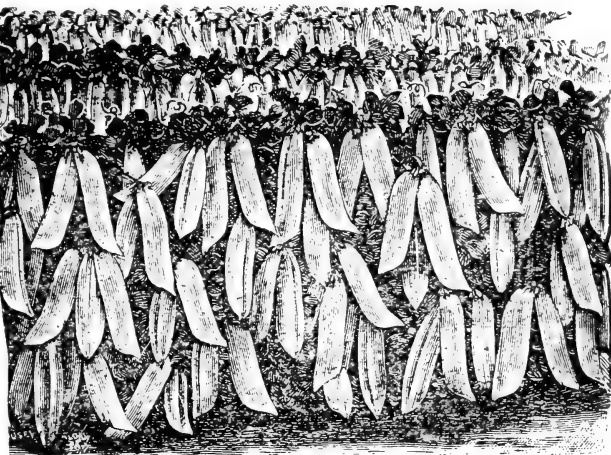

Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 60 cts.

Mammoth Melting Sugar.

An Edible Popped Pea.

The vines grow four to five feet high. It is very productive and produces enormous pods which average five to six inches in length and one and a half inches broad; thick and fleshy. When broken and boiled like string-beans and served with butter sauce they have a luscious flavor. It is a delicious vegetable and should be better known and more generally used.

Pkt. 10 cts.; $\frac{1}{2}$ pt. 20 cts.; pt. 35 cts.; qt. 60 cts., postpaid.

BRITISH WONDER

Dwarf Telephone.

A GIANT PODDED PEA. This is one of the finest dwarf green wrinkled Marrow Peas in cultivation, and one that ought to be grown in every garden.

A strong luxuriant-growing variety, attaining a height of about eighteen inches. The pods, which grow five inches long, are packed with immense wrinkled marrow peas, eight to ten being the average, while twelve to fifteen to a pod are frequently found.

The quality is superb, rich sugary and meltingly tender. As high as eighteen large handsome pods have been grown on a single plant. Pkt. 10 cts.; 1-2 pt. 20 cts.; pt. 35 cts.; qt. 60 cts.

DWARF TELEPHONE

Chinese Giant Pepper.

THE FINEST, LARGEST AND HANDSOMEST PEPPER OF THEM ALL. CHINESE GIANT IS CERTAINLY A WONDER.

Not only is it immensely productive for so large a pepper, but its enormous size and magnificent appearance make it sell most readily.

The plants are vigorous in growth but of stocky habit, seldom more than two feet in height.

It produces monstrous peppers of thick blocky form which are of the most brilliant scarlet. They grow four to five inches broad at the top and are of equal length, divided into four or more ridges; when ripe they are indented at the blossom end.

Frequently half a dozen peppers touch each other as if on a single bunch. The flesh is thick and very mild, being entirely free from any fiery flavor.

They can be sliced and eaten like tomatoes. See cut.

Pkt. 10 cts.; $\frac{1}{2}$ oz. 35 oz. 60 cts.

Pepper.

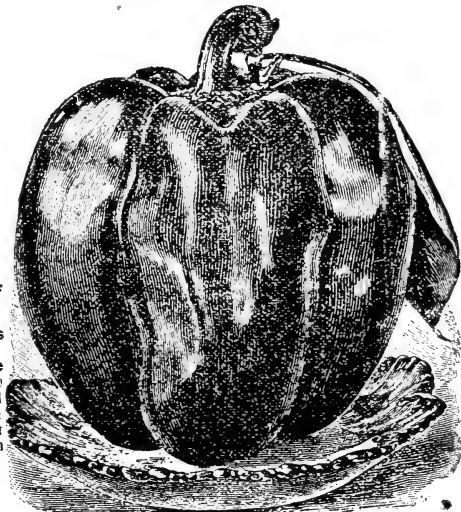

A package of Pepper will produce about 300 plants.

Golden Queen.

GOLDEN QUEEN is the best of all yellow Peppers. It is always large and sometimes remarkably so, specimens reaching six to ten inches in length and four to five inches in diameter are not uncommon.

A single plant sometimes carries **TWENTY LARGE PEPPERS AT THE SAME TIME.** The flavor is mild and pleasant and it may be eaten raw. It always commands the highest price on account of its large size and fine appearance. It is unexcelled for stuffing.

Pkt. 5 cts.; oz. 30 cts.

CHINESE GIANT

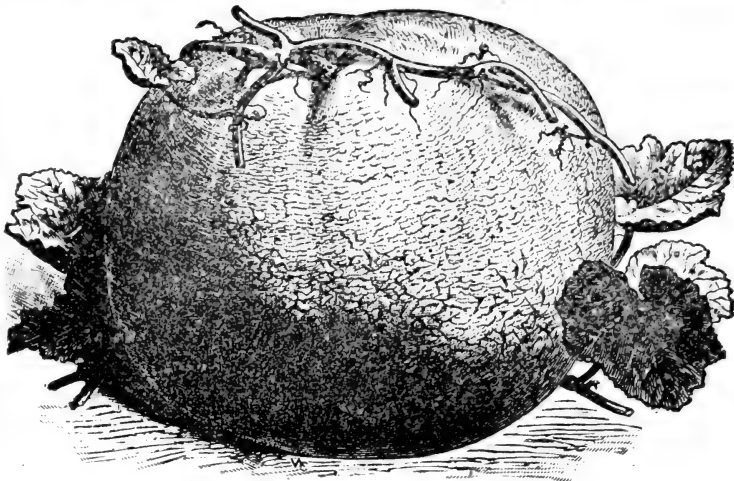

DONT FAIL TO TRY JUNG "QUALITY SEED."

Early Neopolitan PEPPER.

The earliest sweet large Red Pepper. Immensely productive and so extreme early, this grand new pepper is of exceptional value to market gardeners. The plants are of open-branched spreading growth, two and one-half feet in height when full grown, but begin to form fruits when only a few inches in height.

The plants continue in growth and fruiting until cut down by frost, at which time they are still heavily loaded with fruits. Fruits average four and a half inches in length by two to two and a half inches in breadth at the stem end, retaining the thickness for a good portion of the length.

After reaching full size the green fruits change to a rich scarlet, and have quite thick flesh of a very mild sweet flavor. Single plants will show from 35 to 50 peppers of marketable size at one time. Pkt. 5 cts.; $\frac{1}{2}$ oz. 15 cts.; oz. 25 cts.

TRUE MAMMOTH

Pumpkins.

Quaker Pie. Most prolific variety. The fruits are broad pear shaped or slightly oval in form. The flesh is very thick and fine grained, of a beautiful golden yellow color, and in texture and flavor peculiarly adapted for pie making purposes. It is very prolific, a single vine often producing six or eight large pumpkins.

As a winter keeper it is unexcelled, as the pumpkins will remain in good condition until late in the spring. It is sweet and delicate in flavor. Skin is a rich creamy-buff, which gives it a handsome appearance. It makes a superior quality of pies. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 70 cts., postpaid.

True Mammoth.

THE LARGEST PUMPKIN in CULTIVATION.

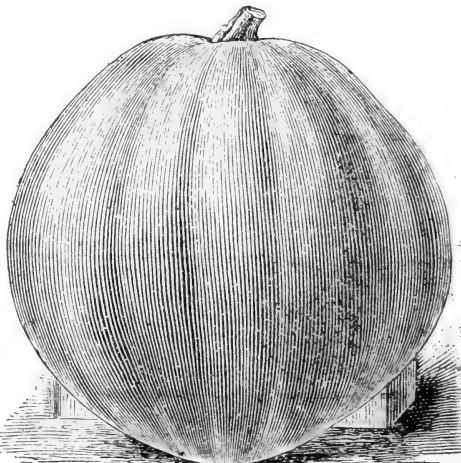

This is the very best strain of the True Mammoth Pumpkin.

Fruits grow to enormous size, specimens have been grown weighing one hundred pounds and over. The skin is a light yellow russet color, flesh very thick, bright-yellow, fine grained, sweet and tender and of excellent quality for pies. If you wish to see just how large a pumpkin you can raise try this variety. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.00

FIELD PUMPKIN. Big Tom.

This variety is extensively grown for stock feeding, and is generally planted in with the corn. Vines are of strong vigorous growth and wonderfully productive. Fruits will average fifteen to twenty inches in diameter; round or oval in form. The skin is smooth and hard, of a reddish-orange color, slightly ribbed, with thick, rich orange-yellow flesh. It is the hardiest of all pumpkins and is good for pies. When planted on good soil it yields enormous crops. Oz. 5 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts.

QUAKER PIE

EARLY NEAPOLITAN

BIG TOM

RADISHES.

One packet of Radish seed will sow 30 feet of row.

Earliest Scarlet.

A fine bright red radish of quick growth. It is especially fine for bunching for early market from plantings in the open ground, being ready for market in from 18 to 25 days. It is solid in character, and very uniform in size and shape. The tops are very small thereby making it the best of all for forcing under glass. The flesh is purest white, firm and crisp in texture and of mild flavor. The roots are entirely free from the hollow center or pithy fibre so often found in radish. The shape is well shown in the illustration. Pkt. 5 cts.; oz. 10 cts.; 1 lb. 25 cts.; lb. 70 cts., postpaid.

French Breakfast.

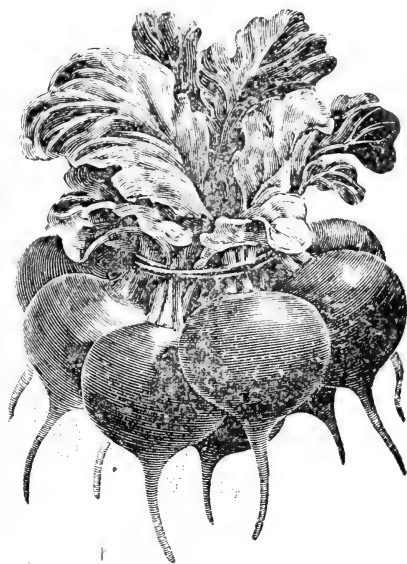

An early, medium sized Radish; olive shaped, very crisp and tender, of a beautiful scarlet color, tipped with white. It grows about two inches long and is decidedly stump-rooted. A splendid variety for the table, for its excellent quality and beautiful color are unexcelled. It is a quick growing and exceedingly popular variety. Pkt. 5 cts.; oz. 10 cts.; 1 lb. 20 cts.; lb. 70 cts.

Rosy Gem.

One of the most popular and attractive short varieties ever grown. Ready for the table in from 17 to 25 days after sowing. It is a rich deep scarlet at the top, beautifully blended into pure white at the bottom. Exceedingly tender and crisp. Flavor very mild and delicious. A gem in earliness, beauty and quality. Its smooth skin and fine color gives it an appetizing appearance when served. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.; lb. 70 cts.

Non Plus Ultra.

One of the earliest forcing Radishes in cultivation. The roots are round and deep rich scarlet in color. They make a very quick growth, and are ready for use in from 20 to 25 days after sowing. The flesh is white, crisp and tender, and of remarkable fine quality. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 20 cts.

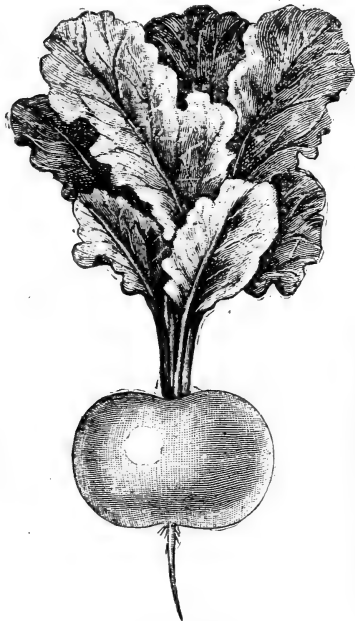

EARLIEST SCARLET

Hailstone.

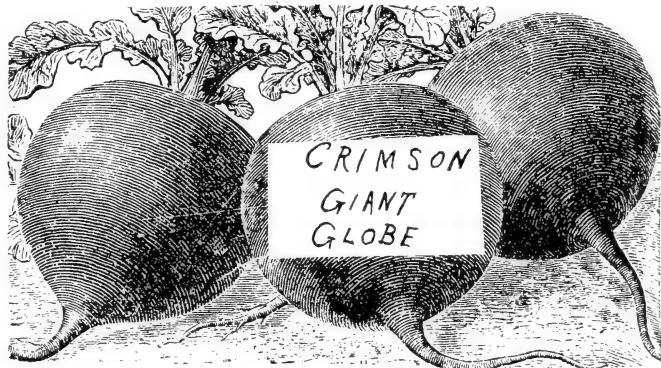

The earliest and quickest growing White Radish in cultivation--ready for use in from 15 to 18 days after sowing. The radishes are regular turnip-shaped, measuring one inch in diameter and about half an inch in depth. Flesh is solid, crisp and of mild flavor. The foliage is unusually small. Its unusually small foliage, combined with extreme earliness, handsome appearance, solidity, and superb quality, cannot fail to make it the most popular first early white turnip radish. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.; lb. 80 cts.

Crimson Giant Globe.

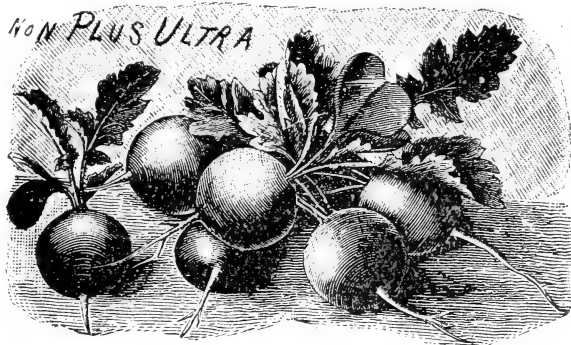

This new variety is suitable for forcing or growing outdoors. It is a fine shaped bright-red radish, growing quickly to large size,--see illustration. This radish is a deep globe in shape. It measures two inches in depth and one and one half inches in diameter. Skin is thin and tender and of a deep crimson color. The flesh is purest white, crisp and of mild flavor. The roots are entirely free from the hollow center or pithy fiber of overgrown small extra early sorts,--even when twice as large. It is sure to become a leading variety. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.; lb. 90 cts.

HAILSTONE

FRENCH BREAKFAST

New White Icicle Radish.

Long, Slender, Crisp, Tender, Mild, Purest White. Unexcelled as a Money Maker. An entirely distinct variety from Germany, and derives its name from the almost transparent whiteness of the roots.

It produces long, slender, pure white radishes very early in the season very uniform in shape, smooth, very bright red in color. The shape is well shown in the illustration. The leaves are short and few, making it an excellent variety for forcing.

It is of the best flavor, very brittle and crisp. The roots grow about four inches long and are ready for use in about twenty-five days after sowing. It is a desirable variety for the home garden and market gardeners will find it a money maker. It is destined to become very popular with growers. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts.

Early Long Scarlet Short Top.

Excellent sort either for private gardens or for market. The roots grow half above ground, are very uniform in shape, smooth, very bright red in color, and continue crisp and tender until fully matured when they are about six inches long. It matures beautiful radishes, which are always brittle and sweet, twenty-five to thirty days from the sowing of the seed. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 60 cts.

WINTER RADISH.

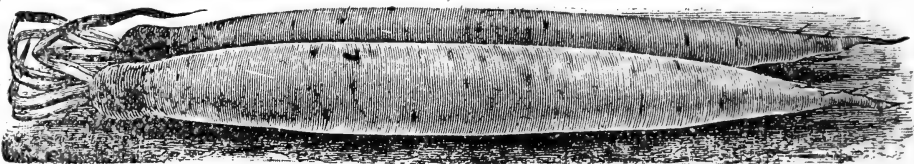

Chinese Rose.

This variety is becoming very popular with market gardeners. It is a large and fine shaped radish, growing partly above the ground. The portion above the ground is darker than that below the ground. It is of a half long shape with a blunt point; rose-colored skin; flesh white, solid as an apple. It has not the strong flavor of the Black Spanish and keeps equally as well. Grows about 4 inches long. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 c.; lb. 70 cts.

SALSIFY. Mammoth Sandwich Island.

One of the most delicious winter vegetables, and also one of the most nutritious; the flavor is sweet and highly esteemed whether served boiled with butter or other suitable sauce, or sliced and fried, or used in soup. This new variety, where known, is entirely superseding the old type, as it produces roots nearly double the size and weight and of equally good quality. Seed sown in spring produces large, fine roots that may remain in the ground all winter or may be dug and stored in sand or earth in

November, thus keeping them plump and sweet, to be used as desired during the winter. We have a fine stock of seed which was grown from selected roots. On package will sow fifty feet of row. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.25., postpaid.

WHITE ICICLE

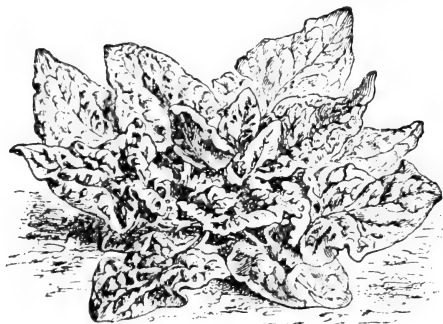

SALSIFY

Spinach.

One package of Spinach will sow about 50 feet of row.

Victoria.

This is a handsome variety with exceedingly dark green color and has very long standing qualities. The foliage is heavy, the wide dark green leaves being of the true Savoy appearance and of the finest quality. It remains in prime condition two or three weeks after most other varieties have run to seed. Highly praised by market gardeners. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 15 cts.; lb. 40 cts.

Squash.

One package of Squash will plant 10 hills.

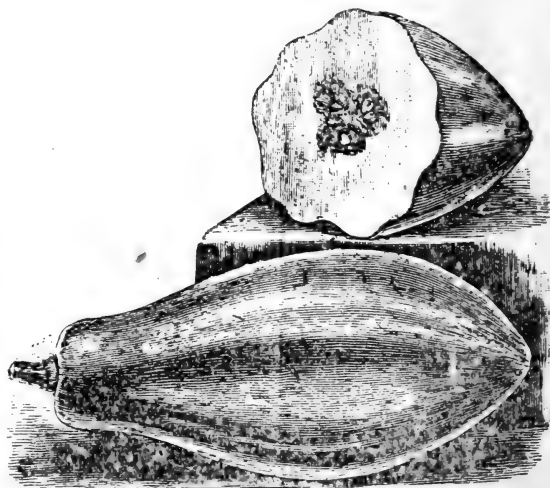

BUSH FORDHOOK.

The Most Desirable Squash for either Summer or Winter Use.

It is of true bush type and can be grown much closer together than the running sorts.

The vines are of strong vigorous growth and wonderfully productive. The fruits are pear-shaped, seven to nine inches long, slightly ridged, smooth thin yellow skin. Flesh is very thick and of a light straw-yellow color. An important advantage is that any fruits not wanted for summer use can be left on the vines to store for winter. For frying, baking, or pies they are unsurpassed.

Stored in a dry place they will keep until the following spring. It is early and has proven to be one of the hardiest and most dependable squash for all localities. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.10.

BUSH FORDHOOK

NEW DELICIOUS

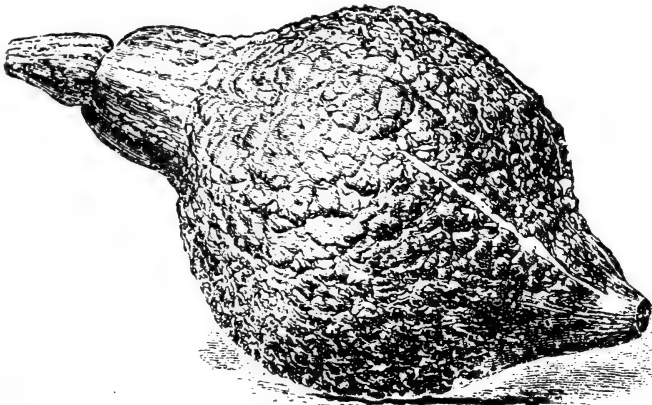

GOLDEN
HUBBARD

Giant Summer Crookneck.

This magnificent strain is equally as early as the common small fruited varieties. It is of a bright yellow color, and from eighteen inches to two feet long.

Fruits are solid, heavy and freely produced on healthy vigorous plants of compact bush habit. The flesh has a greenish yellow color, is dry and of most agreeable flavor. A most profitable variety to grow for market as it grows very rapidly and is of extra large size. It is very productive and of superior quality. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.

IMPROVED HUBBARD

Golden Hubbard.

AN ELEGANT WINTER SQUASH.

This splendid Squash, of recent introduction, is a sport from the well known old Hubbard, which it closely resembles in every respect except in color, which is a bright golden orange.

Flesh deep golden yellow, much richer in color than Hubbard, fine-grained, cooks very dry and is of excellent flavor. In keeping quality it has no superior. Its productiveness combined with its sweet, rich flavor, attractive color and shape, are bound to make it a popular Fall and Winter variety. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.

Improved Hubbard.

This is the old standard squash, now grown throughout the country. Flesh is deep golden-yellow and fine-grained, and whether boiled, steamed or baked, it is always richly flavored, sweet and dry.

The vines are strong, of luxuriant growth and very productive, yielding large heavy squashes weighing from 10 to 25 pounds each. The toughness of the rind makes it a good keeper. The color varies somewhat, being sometimes green and sometimes reddish when mature; but the color and quality of the flesh is fixed and unchangeable—always a deep golden yellow or orange. If properly stored they will keep until spring.

Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.; lb. 90 cts., postpaid.

New Delicious.

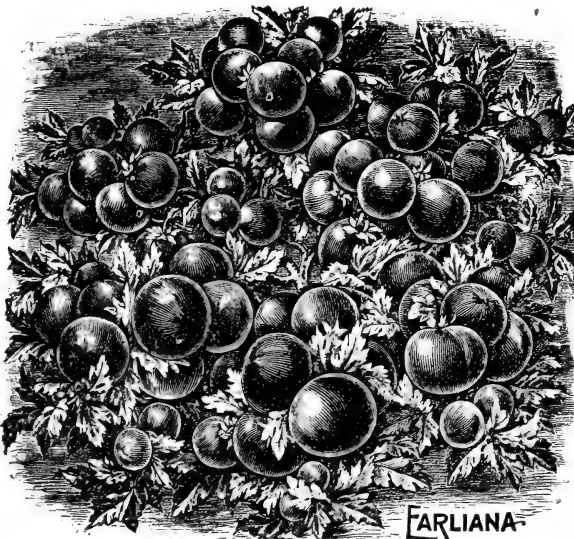

This is One of the best flavored squashes in existence. In thickness of flesh it surpasses nearly every variety. The color is a dark orange.

For table use no other variety compares with it in compactness of flesh, dryness, sweetness, and exceeding richness of flavor. It is a fall and winter squash. The squash vary in color and form, but are uniformly delicious in flavor. The vines are strong and vigorous in growth and set the fruits quite freely. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 30 cts.; lb. 90 cts.

Golden Bronze.

Another good winter squash. The fruits are oval in form, thickest at the blossom end; skin dark grayish green; deepening to bronze green when ripened.

Flesh thick, deepest orange yellow in color, fine grained, and exceptionally sweet in flavor. It is early in maturing, a good keeper, and yields a large supply of fruits of uniform size and appearance. Fruits average from eight to ten pounds each. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 25 cts.; lb. 80 cts.

EARLIANA

Tomatoes.

Our packets each contain seed enough to produce 350 plants.

Earliana. A perfect early Tomato, large in size and beautiful in color, nearly seedless and very solid, a vigorous grower and prodigious bearer, yielding its splendid fruit until frost. Its solidity and fine quality are equal to the best medium and late sorts. The plants are compact in growth, with short close-jointed branches, setting fruits very freely in the center. Quality is excellent. Pkt. 5 cts.; oz. 30 cts.; 1 lb. 90 cts.

Jack Rose.

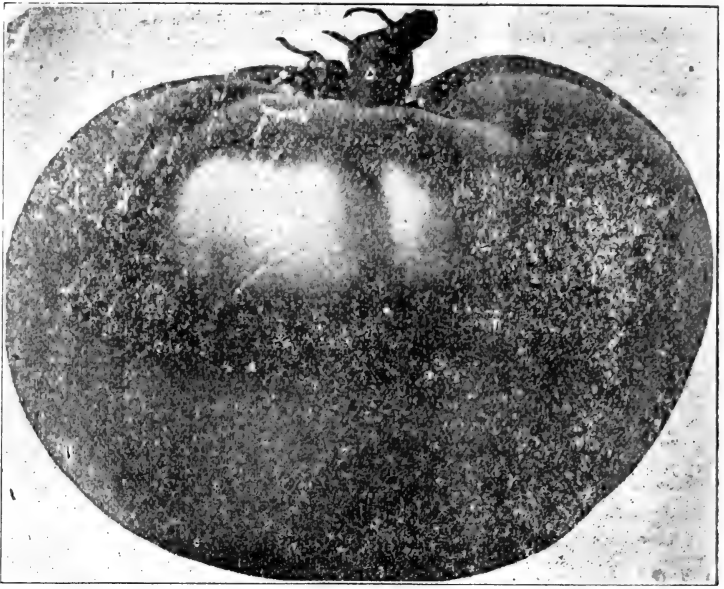

Next to Fairfield First it is the **EARLIEST RED TOMATO IN THE WORLD.**

It is from three to five days earlier than Earliana, which means much additional profit when planted for market as every trucker strives to have the earliest tomatoes.

The vines are vigorous growers and are well supplied with heavy foliage which protects the fruits from the sun. The fruits are smooth, solid, and of good size some measuring four inches in diameter.

It is almost all solid meat, producing but a very small quantity of seed and for this reason the seed will always be expensive. The later fruit on the vine is just as large and solid as the first.

If you want an abundant supply of large, solid, fine-flavored, rich-colored, meaty tomatoes do not fail to order **JACK ROSE.** Pkt. 10 cts.; oz. 40 cts.; 1-4 lb. \$1.00.

Truckers Favorite.

The finest large-fruited purple tomato. Very uniform in size and shape, thick-meated and solid; one of the largest tomatoes grown. The fruits are of a beautiful purplish-red or pink color, always smooth and fleshy. They hold their size to the very last picking and ripen well to the stem.

Vines are of strong vigorous growth, ripening the first fruits early. The vines are not subject to blight or rust, and produce enormous crops until killed by frost. Delightful in quality and flavor and unexcelled for slicing or cooking.

As a dependable main-crop pink tomato Truckers Favorite can't be beat. Pkt. 5 cts.; oz. 30 cts.; 1-4 lb. 80c.

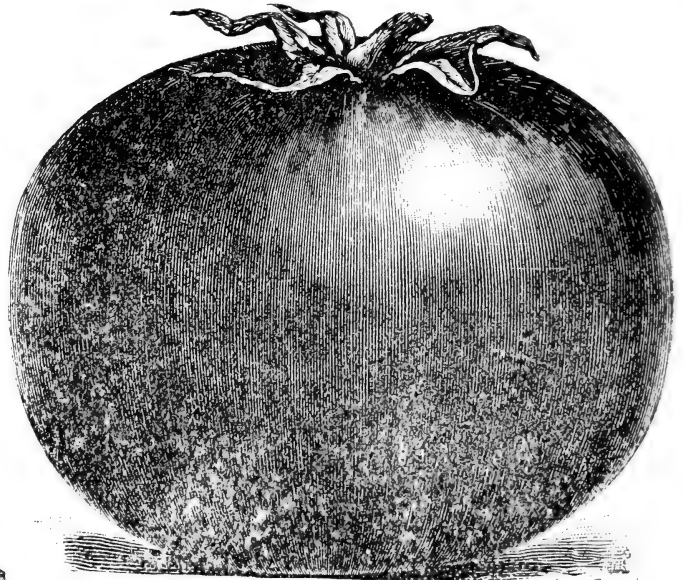

Matchless.

A fine large fruited red Tomato. The vines are strong vigorous growers, and produce immense crops of large smooth juicy fruits.

The fruits are truly immense in size, specimens having been grown measuring five inches in diameter, and the large size of the fruit is maintained during the whole season; they are free from core, of a rich cardinal-red color and free from cracks and blemishes. The flesh is very solid, ripe fruits picked from the vines having kept for two weeks, this fact should not be overlooked by growers who ship their tomatoes. Pkt. 5 cts.; oz. 30 cts.; 1-4 lb. 80c.

JACK ROSE

TRUCKER'S FAVORITE

TREE TOMATO. Dwarf Stone.

EARLY. EXTREME LARGE FRUITS. ENORMOUS YIELDER. BRIGHT RED. The best variety for the home garden.

It is the largest fruited dwarf or tree tomato. The plants grow to a height of about two feet and are stiffly erect until they become overloaded with fruit. The fruit is produced in clusters of three to five, and as the growth is close-jointed each plant produces a large number. The tomatoes are of large size, and are very smooth and solid. Fruits have a solid neat center and no hard core and produce but very little seed. We consider Dwarf Stone invaluable for the home garden, market garden, or for shipping purposes. Pkt. 5 cts.; oz. 30 cts.; 1-4 lb. 80 cts.

Golden Dwarf Champion.

The famous Golden Dwarf Champion owes its wide popularity to its stiff, vigorous, upright growth, with fruit well above the soil, its large fruit and beautiful color, and to the earliness with which it reaches maturity. Plants are bushy and compact, with heavy dark-green, potato-leaf foliage. The tomatoes are always smooth, round and solid, and of a beautiful lemon color. Nothing makes a more tempting dish than red and yellow tomatoes sliced together. Pkt. 5 cts.; oz. 25 cts.; 1-4 lb. 80 cts.

MAGNIFICENT TOMATO

Magnificent.

A TRULY MAGNIFICENT RED MAIN-CROP TOMATO. It has been tried in various climates and different soils and always came out successfully. It is different from all other tomatoes in the following particulars-

First, the plants root well from the very beginning of their growth.

Second, as the result of this strong

growth of root there is a large and vigorous growth of stalk to support the weight of the fruit. Third, as the result of the strong stalk the spreading branches produce a great abundance of fruit from each plant. Fourth, the fruits are large, solid and smooth, easily prepared for market on account of its perfection. Fifth, the plants are hardy, can be set out early and not be injured by the cold if protected from frost. Sixth, the fruits ripen early and the later fruit on the vines is just as large and perfect as the first.

The color is bright red; skin always smooth, free from cracks and blemishes. Flesh is of exceptional fine flavor.

Pkt. 10 cts.; oz. 30 cts.; 1-4 lb. \$1.00., postpaid.

New Coreless.

A LARGE MAIN-CROP, GLOBE-SHAPED, BRIGHT RED VARIETY. Its shape is almost round, being about the same diameter each way. The depression at the stem end has been almost

eliminated, making it the most profitable variety for canning.

It is immensely productive, clusters of four to seven fruits are produced at six to eight inches apart along the stem.

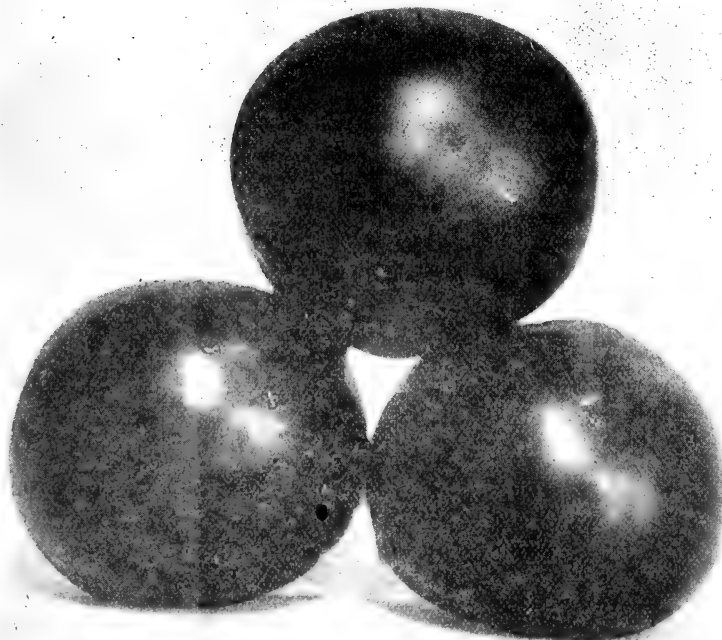

All the fruits are of marketable size, and many of them are quite large—12 to 15 ounces.

A good slicing variety, the seed cells being surrounded by bright red, heavy, meaty and delicious flesh. Its color is

bright red and the fruits ripen all over and all at the same time. Always free from green core. Every gardener should give this new tomato a trial.

Pkt. 10 c.; oz. 35 c.; 4 lb. \$1.00

One packet of each for 15 c.

NEW CORELESS TOMATO

Magnificent and Coreless are Two of the Greatest Tomatoes.

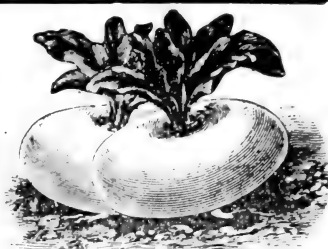

Turnips.

Our packets each contain
1-4 ounce of seed.

Purple Top

Strap Leaf.

The most popular sort. A general favorite with all, and more largely grown than any other turnip; will do well if sown either broadcast or in drills, and will form good sized bulbs in seven or eight weeks. Rather flat and of medium size. (The color is purple above ground, white below; flesh white, fine-grained and tender. Leaves short, narrow and erect. A heavy cropper and an excellent keeper. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 20 cts.; lb. 50 cts.

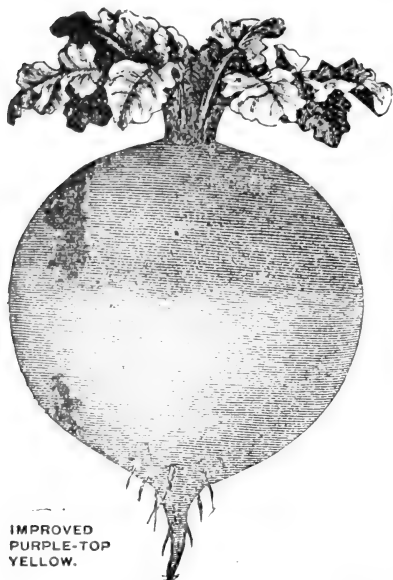

WHITE FLAT DUTCH

White Flat Dutch.

A very popular sort for either table use or for market. The roots are of medium size, very handsome, smooth and of clear ivory-white both inside and out. The flesh is fine-grained, tender, and of mild, sweet flavor. It is one of the best varieties for the family garden, as, in addition to the heavy crop assured by its adaptability for close planting, it will be found to be the best sort for spring use. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 20 cts.; lb. 50 cts.

STRAP LEAF

IMPROVED
PURPLE-TOP
YELLOW.

Ruta Baga.

Improved Purple Top Yellow.

A hardy and productive variety widely grown for market and stock feeding. It is of fine quality and keeps perfectly all winter, and even into the following summer. Bulbs are large, smooth, round and solid, with a small tap-root. Flesh richly colored, fine-grained and very sweet. Its shape is well shown in the illustration. It is justly held in high esteem for both table and stock feeding purposes. Pkt. 5 cts.; oz. 10 cts.; 1-4 lb. 20 cts.; lb. 50 cts.

Lawn Grass.

Fairfield Special Mixed.

Our mixture combines the very best varieties of grasses suited for the purpose of making a Lawn beautiful in appearance, durable and lasting, and which will stand the frosts of winter, and the hot sun of summer, showing a deep rich green at all seasons.

The seed used is PURE and HEAVY and especially cleaned. This mixture weighs 25 to 27 pounds per bushel, is of strong vitality and makes a quick healthy growth.

One pound of our mixture weighs as much as two quarts of most other seedsmen's brands. Pound, 35 cts., postpaid. Not prepaid, lb. 25 cts.; 5 lbs. \$1.20.

Jung's Unrivalled Flower Seeds.

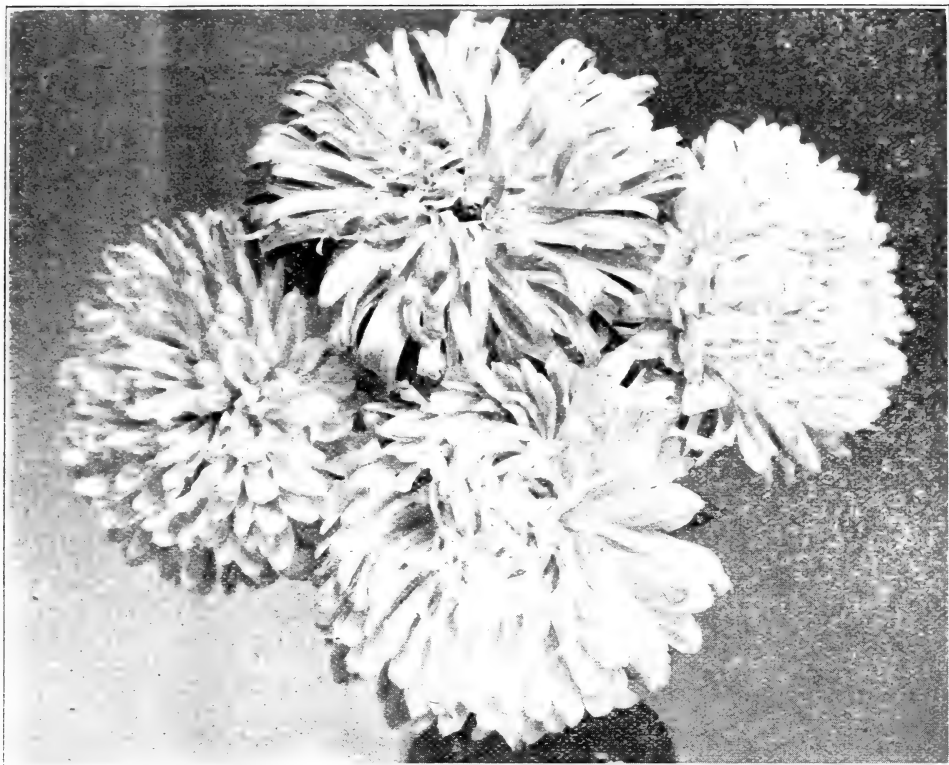

The same great care and selection governing the the growing of our Garden and Farm Seeds is exercised in the growing of our Flower Seeds. If our customers could only see the glorious beds of Asters, Salvias, Phlox, Sweet Peas and other flowers growing on the Fairfield Farm they would grow more flowers.

There are no more satisfactory flowers in the garden than those grown from seed, especially the easily grown and brilliant flowering annuals. The beautiful shrubs and lillies, of course, have their place, but are far more expensive than a package of seed which will furnish a large number of plants with usually enough for one's garden and some to spare.

While the old-fashioned flowers are still popular, new and improved varieties have been developed, with larger and finer blossoms.

FLOWERS GROWING FOR SEED AT FAIRFIELD SEED FARM

JUNG'S SUPERB ASTERS.

INVINCIBLE

MIKADO SHELL-PINK
CHRYSANTHEMUM FLOW'ERED

SUPERB LATE BRANCHING

Giant Comet Asters.

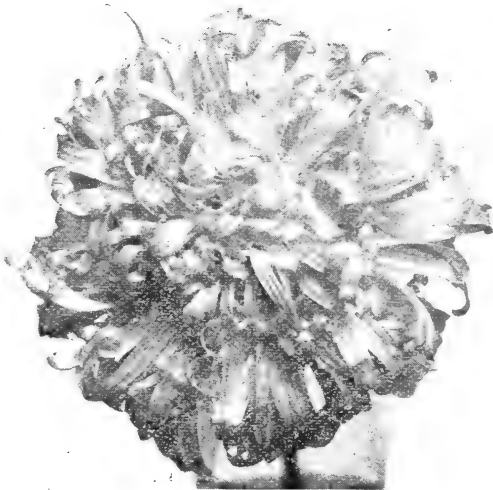

This is undoubtedly the finest strain of *Chrysanthemum* flowered Asters. The plants attain a height of about twenty inches and bear their large graceful flowers on stems from fifteen to eighteen inches long. The immense flowers are from four to five inches across, while the long petals are curled and twisted, forming perfect half-globes. The blooming season is most opportune, coming between the Extra Earlies and the Late Branching sorts, thus enabling the Aster growers to have a fine display from mid-summer until frost. **White, Rose-Pink, Shell-Pink, Purple, 10 cts. per pkt. One pkt. each color for 25 cts. Mixed colors 10 cts.**

Superb Late Branching.

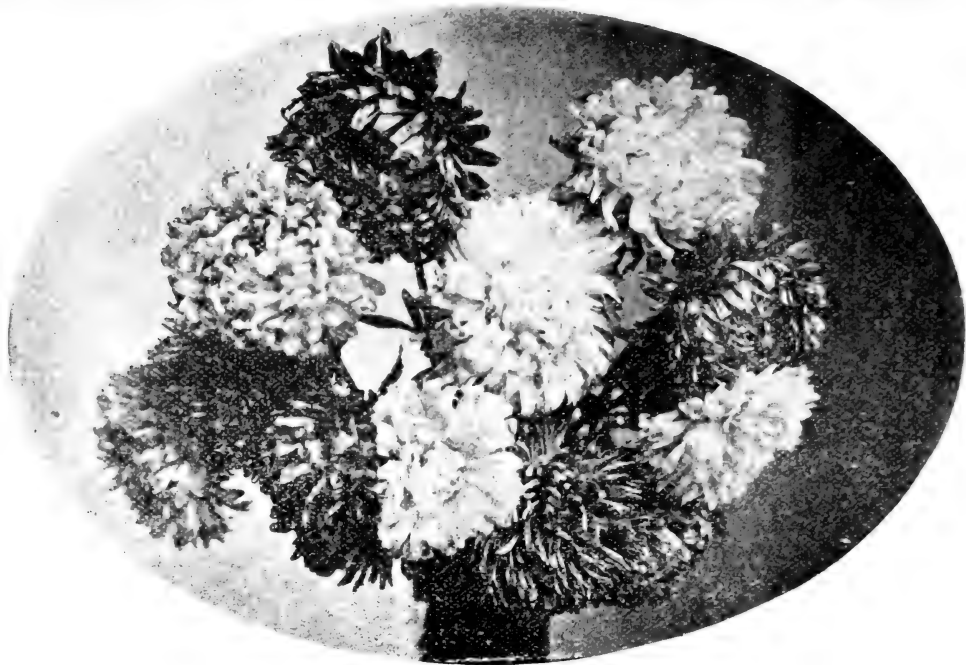

After a number of years of careful selection we have brought this Aster to a state of perfection where it is unexcelled. The plants form strong stocky bushes about two feet in height, bearing on long stiff stems their handsome flowers, which measure from four to five inches across. The petals are gracefully curved towards the center and do not have an exposed yellow center. This variety is unexcelled for bedding or bouquets. **White, Shell-Pink, Rose-Pink, Purple, 10 cts. per pkt. One pkt. each color 25 cts. Mixed colors 10 cts.**

Invincible. A superior type, of strong, robust growth, producing on long stems, flowers of immense size and unsurpassed beauty. The flowers are perfect in outline and have the petals well curled over the center. Petals are of thick durable substance, making it invaluable for cut flowers, as they last a long time before wilting. **White, Pink, Shell-Pink and Purple, Each 10 cts. per pkt. One pkt. each color 25 cts. Mixed 10 c.**

Mikado Shell-Pink. Petals are narrow, very long and gracefully reflexed. The outer petals show to their full extent, while gradually towards the center they bend and curl across each other in such magnificent disorder as to make the fullest Aster we have ever seen. In color it is the most exquisite shade of pink. It is not uncommon to find plants with a dozen long, strong graceful stems, each crowned with flowers from four to six inches across. **Pkt. 10 cts.**

CREGO—From a photograph
Crego Aster.

A new variety. The plants are vigorous and productive of from ten to fifteen strong flower stems, frequently two feet or more in length. The flowers are large and full with the crowns well covered. The petals are of medium width but very long, and curl across each other so fluffily as to enhance the beauty and attractiveness of the flower, and increase its value as a long keeping and good shipping variety. **White and Shell-Pink. Each 10 cts. per pkt. Two pkts. for 15 cts.**

JUNG'S INTERNATIONAL MIXED ASTERS

Jung's International Mixed Asters.

The finest mixture of **ASTERS** ever offered by any seedsmen. This superb mixture is composed of the very best varieties and contains practically every shade and color known in Asters, such as pure white, white changing to rose, shell-pink, rose-pink, red, carmine, violet, crimson and purple.

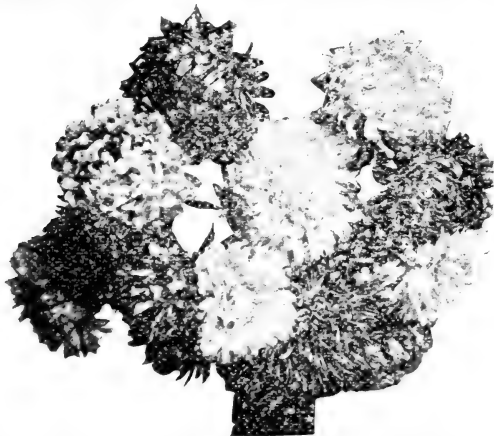

It includes, New Fairfield, American Beauty, Vick's Mikado, Violet King, Chrysanthemum Flowered, Superb Late Branching, Invincible and many other varieties.

It is truly an **UNRIVALED MIXTURE** of these the most showy and beautiful of all flowers. Pkt. of 200 seeds only 10 c.

Chrysanthemum Flowered **ASTER.**

This grand new Aster is in a class by itself, being formed altogether different than any other variety. The flowers are truly gigantic in size, and closely resemble chrysanthemums, hence their name.

Well grown flowers measure five inches across and are borne on long stems making them invaluable for cut-flowers and bouquets. Petals are long and twisted. The color is a very delicate sea-shell pink. Plants are strong and robust. See illustration on page 33. Pkt. 10 cts.

Special Aster COLLECTION.

The following six grand varieties will be sent to any address postpaid for only 30 cents.

Late Branching White	10
" " Shell-Pink	10
Giant Comet White	10
" " Purple	10
Invincible Pink	10
Mikado Shell-Pink	10

Catalogue value .60

From no other seedsmen can such a fine assortment of Asters be bought for only 30 cents.

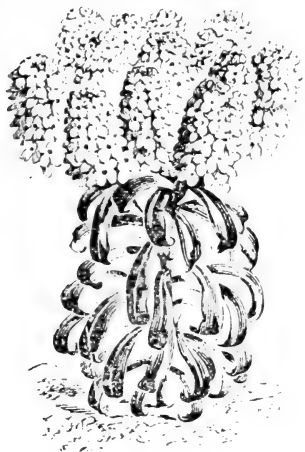

BALSAM. Defiance Mixed.

A favorite quick growing annual. The plants form symmetrical, well branched, erect bushes about two feet high. The branches are well covered with the beautiful double flowers. The color includes white, rose, red, scarlet, crimson, purple, lilac and violet.

Although such generous bloomers, they are shy seeders. Our strain of these is unsurpassed for size of blooms, glossiness, and beauty of flowers. Pkt. 5 cts

CANDYTUFT

Candytuft. Empress.

This is the largest flowered, pure white variety in cultivation. Strong, free growers, from six to ten inches high, producing large trusses of flowers on candle-labra formed branches. Excellent for bedding and ribbon borders, remaining in bloom throughout the summer. Pkt. 5 cts.

COSMOS

Cosmos. Early Summer Flowering.

They are of compact bushy growth, about four feet high, with flowers fully as large as the old variety. Flowers are of various shades, ranging from pure white to purplish crimson. It blooms profusely until frost. Pkt. 5 cts.

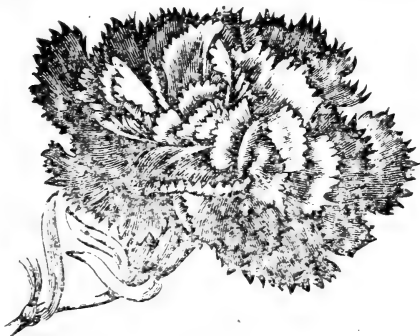

DIANTHUS.

Fairfield Finest Mixed.

These hardy annuals may be ranked among the fairest gems of our flowers, as few flowers can equal them in beauty or profusion of blooms. They are of the richest and most varied colors. The plants spread rapidly, and make ornamental masses of growth. They may be sown in the open ground when danger from frost is over, and in a few weeks they are masses of bloom, continuing so until frost. Our mixture includes the best single and double sorts. Pkt. 5 cts.

DIANTHUS

FIREBALL

DIANTHUS. Fireball.

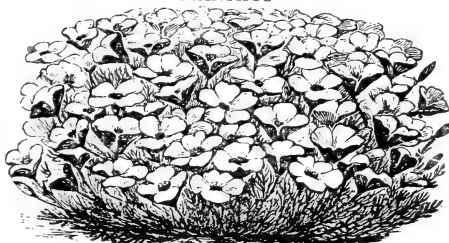

Flowers are double crimson and their beauty is scarcely surpassed by any other flower. Plants grow dwarf and bushy. It is very fine for bedding or cut flowers. Pkt. 5 cts.

DAISY. German Double Mixed.

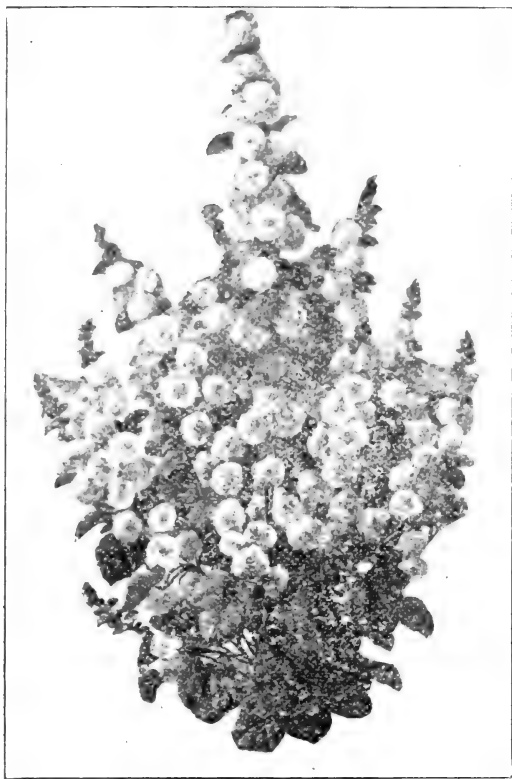

These famous little double daisies are held in universal esteem. They bloom profusely, especially in cool weather. They are easily grown from spring-sown seed, and come into bloom in a short time. They do best in a cool shady place. They are held in high favor for open air edgings and borders. Height six inches. Pkt. 5 cts.

California Poppy. Golden West.

Extremely handsome, low and quick growing annual plants, with finely cut foliage and cheerful blossoms. The flowers are light canary yellow with a large rayed blotch of orange at the base of each petal. They are beautiful and variously formed. Plants are about one foot high and easy to grow. They bloom until killed by frost. Pkt. 5 cts.

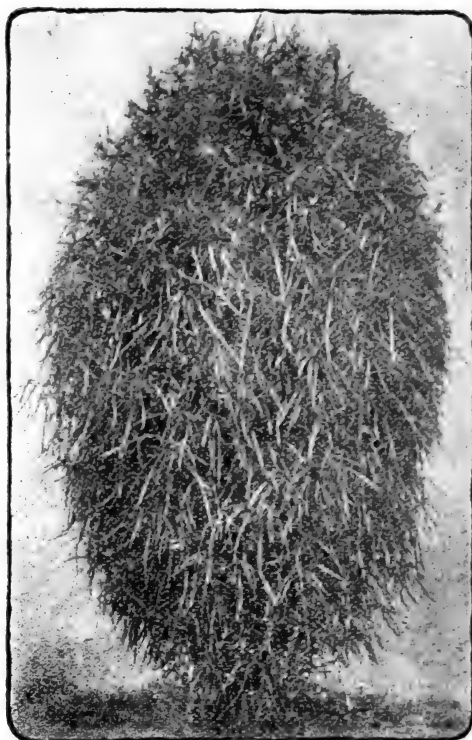

CALIFORNIA POPPY

HOLLYHOCK

Annual Hollyhocks.

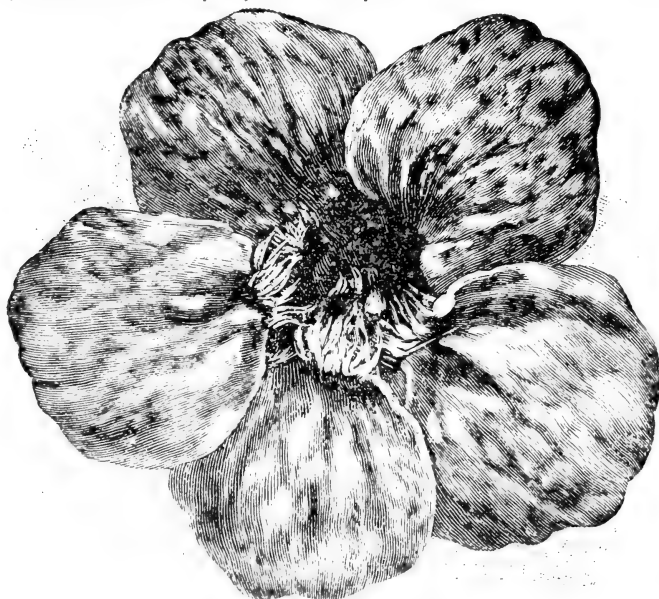

These glorious hybrids may be grown from seeds and will flower the same year as quickly as any garden annual. The plants are of healthy vigorous growth and naturally branching in habit, the center spike attaining a height of from 5 to 7 feet. The diversity of forms and colors among the flowers affords many delightful surprises. Plants flower uninterruptedly until killed by frost. Pkt. 10 cts.

KOCHIA

Kochia Tricophylla.

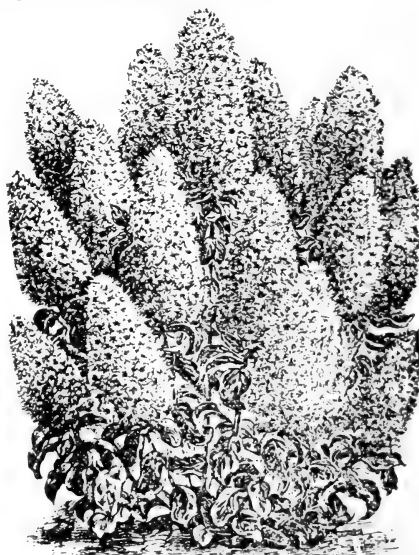

A GRAND HEDGE PLANT. An annual hedge which has become very popular. It makes a beautiful specimen plant, or grown in hedge form it is equally attractive. It grows about three feet tall, forming a perfect pyramidal-shaped cypress bush, with fine feathery light green foliage. About the beginning of September it changes to a lovely crimson hue and for this reason is often called "Burnin' g Bush." Pkt. 5 cts.

GIANT FLOWERED TALL NASTURTIUM

Tall or Climbing Nasturtiums.

GIANT FLOWERED MIXED. These beautiful and luxuriant climbers have no equal for quickly covering with the most brilliant flowers, trellises, arbors, stumps and fences. Of the easiest culture, bearing their gorgeous blossoms until killed by the frost. Vines grow from 6 to 10 feet high. Pkt. 5 cts.

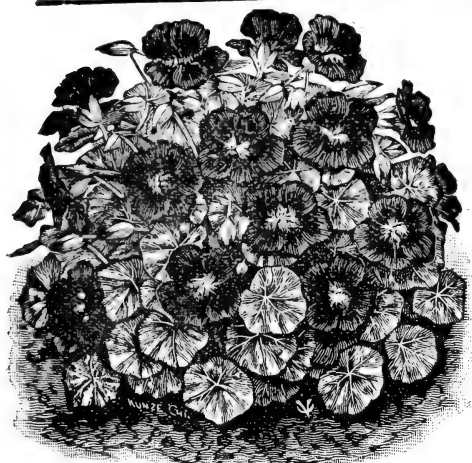

BISMARCK MIGNONETTE

Mignonette. Bismark.

A grand new variety, bearing red flowers, nearly double the size of the popular Machel variety. The flowers are pyramidal in shape, from 6 to 8 inches long, well colored and highly perfumed. Pkt. 5 cts.

SPECIAL MIXED. Contains seed of all the standard sorts and latest introductions, there being red, yellow and white colors. Pkt. 5 cts.

B 1

150

TOM THUMB MIXED

TOM THUMB MIXED NASTURTIUMS.

This mixture is composed of choice flowering varieties and is properly blended. They are of dwarf compact rounded growth, about 9 inches in height and slightly greater in diameter.

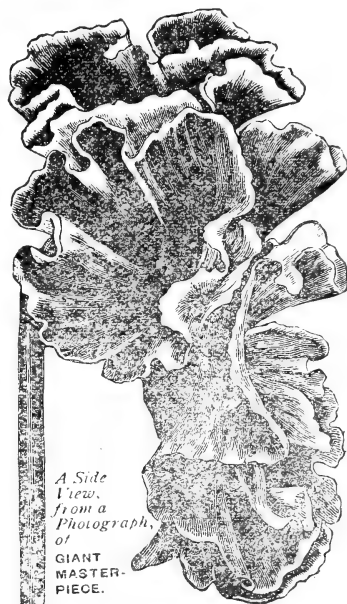

Flowers are of many different colors, and are shown to great advantage among the richly variegated leaves.

They flower freely all summer and fall. Pkt. 5 cts.; oz. 10 cts.

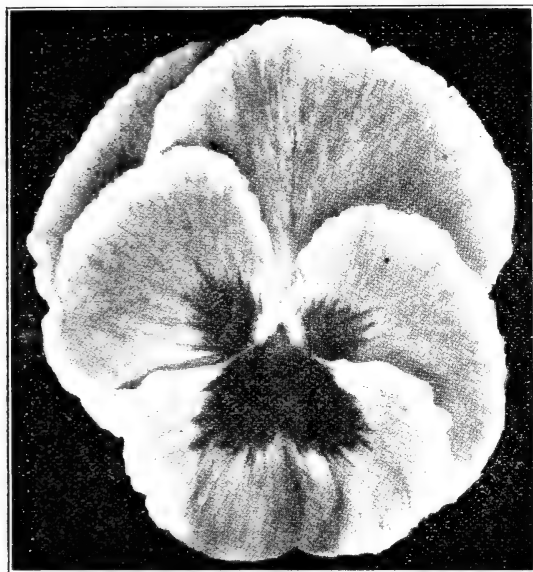

BRILLIANT BEAUTIES. NASTURTIUMS.

The plants are of strong vigorous growth, erect habit and beautiful rounded form. The leaves on different plants range from light green to a rich purplish tint. Of quick growth; they begin to bloom early in the summer and continue to flower profusely until frost. So greatly diversified are the colorings that it seems almost impossible to find two plants bearing flowers alike.

Pkt. 5 cts.; oz. 20 cts.

A Side View, from a Photograph, of GIANT MASTER-PIECE.

BEST GIANT FANCY

Giant Masterpiece.

This grand pansy is remarkable for having its petals waved or folded, giving it the appearance of a double flower.

The truly giant-sized flowers are of the most striking character; the petals being of a thick velvety substance and heavily ruffled. The colors are mainly dark rich shades, bordered, blotched or marked in ray-like veinings with contrasting colors.

The mammoth size, richness and beauty of colorings, combined with the distinctly ruffled character of the petals, makes the Masterpiece one of the finest novelties in pansies ever developed.

Pkt. 10 cts.

Hercules Giant.

The wonderful size, colors and veinings of this lovely large pansy are simply unsurpassable. The flowers are of thick heavy substance. The colorings and markings are widely varied, some flowers being nearly self-colored in the richest tints of purple-carmine and brown; others are boldly margined with white, cream, golden yellow or rose; while still others have silvery grounds heavily blotched at the base of each petal with a dark rich shade. Plants are of strong stocky growth.

Pkt. 15 cts.

Giant Fancy Mixed Pansies.

This Fancy Mixture contains seed of the largest, richest and handsomest pansies known to the horticultural world. The well formed expanded flowers are uniformly of the largest size and of fine substance; they are borne on long stiff stems well above the heavy deep-green foliage. Colors are rich and varied.

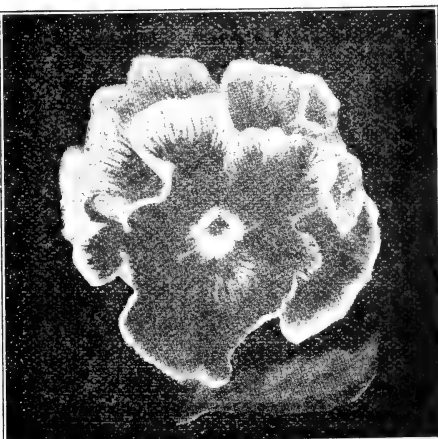

Pkt. 15 cts.

Large Flowering Mixed.

This mixture is composed of the finest large flowering varieties and contains some of the richest colors. The plants make a strong growth and bloom freely.

Pkt. 5 cts.

PANSIES.

HERCULES GIANT $\frac{1}{2}$ natural size

ICELAND POPPIES.
POPPIES.

Double Featherball.

These double-fringed annual Poppies are very beautiful; they belong to the carnation-flowered type. The large flowers, extending to same globe-shaped formation, with gracefully fringed petals like big balls of stretched tissue paper. Plants are of long, solid, stocky growth, 15 to 18 inches high, each plant carrying several of these exquisite flowers. The great variety of coloring ranges from the most gorgeous down through shades of pure white. They are of the easiest culture. Mixed colors. Pkt. 5 cts.

ICELAND POPPIES. These Poppies are perennials and bloom the first season from seed. The fragrant, elegant, crushed-satin-like flowers are produced continually from June until frost.

They are of graceful neat habit, with bright green foliage, formed in tufts, from which issue slender stalks, about twelve inches long, bearing their brilliant flowers in endless profusion. They are invaluable for cut flowers. White, Yellow, and Orange. Pkt. 5 cts.

RE-SELECTED SHIRLEY.

The most showy of all Poppies. Flowers about three inches across, exceedingly graceful and elegant; the colors are pure, soft and varied and range from pure white, rose, pink and carmine, to scarlet and crimson. All who admire the delicate beauty of Shirley Poppies will be delighted with this strain. Pkt. 5 cts.

PETUNIA. Large Flowering Mixed.

It begins to bloom early, and lasts the whole season, until killed by frost. Most of the flowers are exquisitely ruffled or fringed on the edges, and are of enormous size, but their great merits lie in the tremendous variety of colors, markings, blotches and stripings, in the most grotesque and beautiful combinations. Some of the colors are rich others are of delicate shades. Pkt. 10 cts.

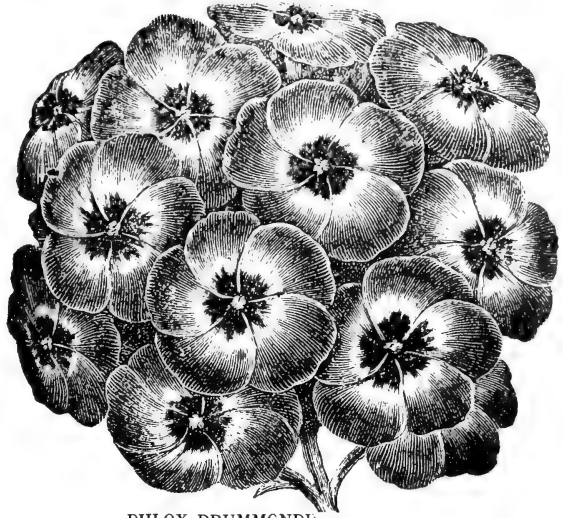

SALVIA BONFIRE

Phlox Drummondii. Grandiflora Mixed.

THE BEST OF ALL BEDDING PLANTS.

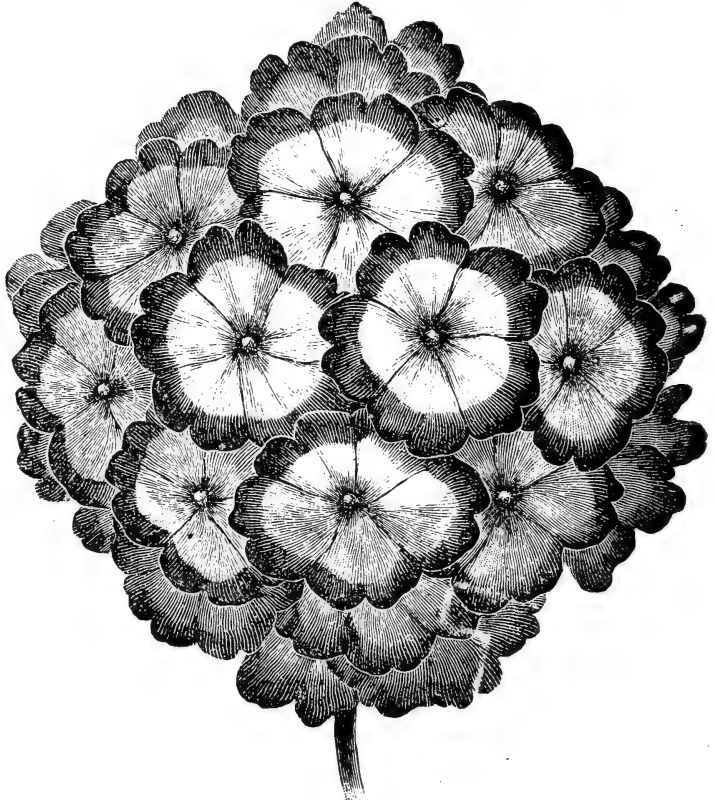

This superb strain is notable not only for variety and brilliancy of colors, but for the perfection and size of the flowers. The colors range from pure white to the deepest blood-purple or crimson, while the clear eye of some of the flowers is peculiarly marked. In good rich soil they will grow 18 inches high, and for a mass of splendid colors no flower will give more satisfactory return for so little cost. Many of the single flowers are so large that they will nearly cover a fifty cent piece. The flower type is shown in the illustration. Pkt. 5 cts.

PHLOX DRUMMONDII

New Dwarf PHLOX. Nana Compacta.

This splendid race of annual phloxes cannot be overpraised for brightness and beauty. The plants are always lavishly covered with large flowers of the most brilliant hues. Nothing better for bedding purposes is listed in this catalog. They succeed everywhere, and are in universal favor for summer flowering purposes. Bushes are dwarf and compact, six to eight inches high, forming dense masses of bloom all summer. They are very desirable for edgings and ribbon beds and useful for pot culture. The colors include pure white, deep and showy red, rose with white eye and other shades. They are quite hardy and are to be treated as annuals. Pkt. 5 cts.

VERBENA

VERBENA.

FAIRFIELD FAMOUS MIXED.

A choice perennial, six to twelve inches high, indispensable for bedding purposes. The average trusses measure nine to twelve inches in circumference and the individual florets on properly grown plants over one inch across.

They bloom freely, are vigorous in growth, and contain beautiful new colors and shades.

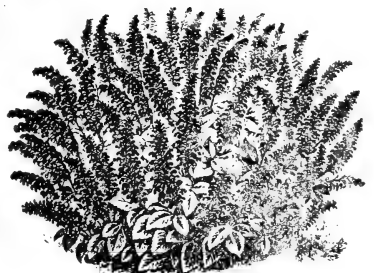

For garden beds and massing these verbenas are unrivalled; flowers of the most brilliant colors produced continually from spring until late in the fall. Pkt. 5 cts.

SALVIA. Bonfire.

A GRAND BEDDING PLANT. One of the grandest varieties in cultivation. A bed of them will surpass the finest scarlet geraniums in brilliancy and continuous bloom. The plants are compact growers, attaining a height of about thirty inches. Single plants sometimes carry two-hundred spikes measuring from eight to twelve inches in length. Flowers are a brilliant dazzling scarlet. From the time they first begin to flower the plants are never out of bloom until killed by frost. We know of nothing that will equal the gorgeous effect of a row or bed of these Salvias when in full bloom; the waving masses of glistening scarlet against green surroundings of lawn or foliage is matchless. Pkt. 10 cts.

SALVIA. Splendens.

"The most dazzling scarlet flower." The handsome bushes are three feet high and as much in diameter when of full size. Single plants often bear one-hundred spikes of flowers, each about eight inches long. It is excellent for filling large beds or for borders in the garden. It blooms continuously from early in August until the first killing frost. Nothing is equal to a bed of these flowers which for months is a blaze of intensely brilliant scarlet. Pkt. 5 cts.

SALVIA SPLENDENS

SUNFLOWER

SUNFLOWER. CHRYSANTHEMUM FLOWERED.

Grows seven feet high. Perfectly double; the color is the brightest golden yellow. The plants branch and afford fine long stems for cutting. The flowers are so perfect in form that they resemble Chrysanthemum flowered Asters with long stems. They are invaluable for a hardy garden border.

Pkt. 5 cts.

SWEET WILLIAM. FINE SINGLE MIXED.

Well known, hardy, free-blooming perennial plants.

They produce masses of lovely, brilliant, sweet-scented flowers through a long period, making a splendid effect in beds. The plants grow about one foot high and form fine clumps. It produces very large florets in great profusion and in a great variety of colors.

Pkt. 5 cts.

SWEET PEAS.

White Spencer. It produces in the greatest profusion pure white flowers of large size.

The standard measures one and three-quarter to two inches across by one and a half inches in depth. The wings are fully an inch wide and nearly as deep as the standard. Flowers are borne three and four on a stem and are uniformly well placed. The vines are almost completely covered with blooms.

SUPERFINE MIXED SWEET PEAS

Stems are extra long. Pkt. 5 cts.; oz. 20 cts.

Apple Blossom Spencer.

Of true Spencer type. The flowers are heavily shaded and edged with deep rose and soft pink on silvery white. The form is very beautiful; the petals are waved or crinkled to a remarkable degree. The vines are very thrifty and the handsome flowers are borne in profusion on long stiff stems, often with four blossoms to a stem.

Pkt. 5 cts.; oz. 20 cts.

Helen Lewis Spencer.

This is a grand seedling of Countess Spencer. It is of the same wavy appearance and bears four large blossoms to a single stem. Color is an intensely brilliant bright orange pink, and now supersedes all others in this shade on account of its size and long stems. The blossoms measure two inches across. Excellent for cut flowers.

Pkt. 5 cts.; oz. 20 cts.

True Countess Spencer.

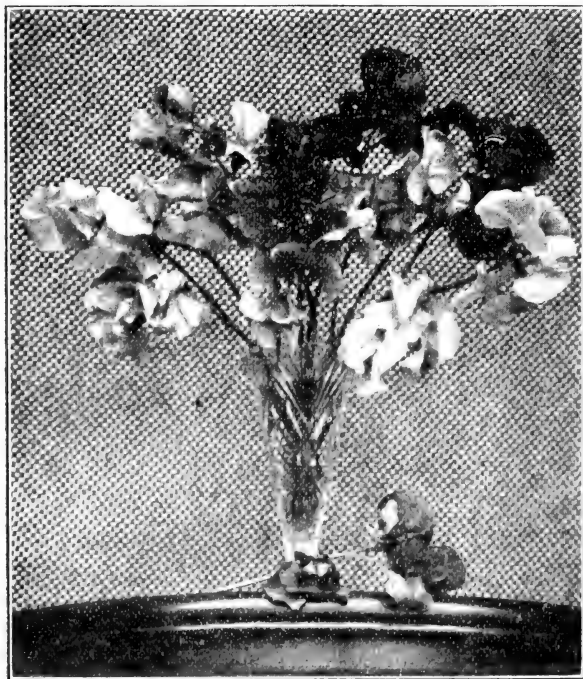

It combines all the good qualities of the best Sweet Pea. Color is a delightful soft pink shading a little deeper at the edge of the petals. Stems are very long and generally bear four blossoms, all facing one way. The edges of wings and standard are just wavy enough to give it a graceful fluffy appearance. Blooms continuously.

Pkt. 5 cts.; oz. 20 cts.

Earliest White.

The earliest White Sweet Pea. Comes into bloom in 45 days after sowing. The hardy vines are 16 to 20 inches tall, and bear a profusion of pure white flowers. Flowers are borne on stems 6 to 8 inches long each stem having two or three blossoms.

Pkt. 5 cts.; oz. 20 cts.

ORCHID FLOWERED SWEET PEAS

COUNTESS SPENCER

Gigantic Orchid Flowered Mixed Sweet Peas.

Never before has the public been enabled to secure such a superb mixture of truly giant flowered Sweet Peas at the low price of 10 cents per pkt. It includes all the finest colors. Flowers are of extremely large size, beautifully waved or fluted on the standard. Plants are strong vigorous growers and bear flowers in profusion on long wiry stems.

Pkt. 10 cts.; oz. 20 cts.

SUPERFINE MIXED SWEET PEAS.

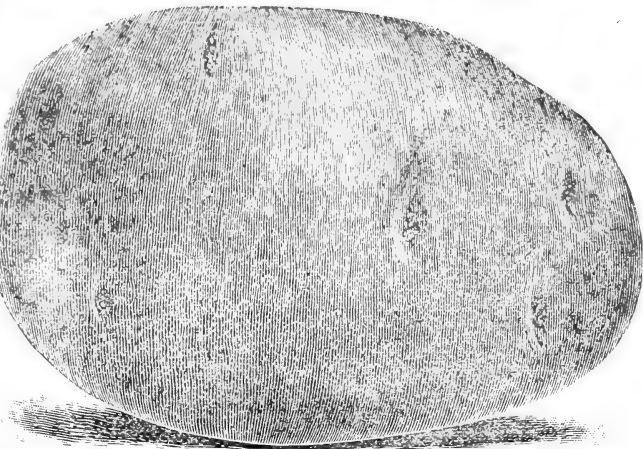

This is not grown in mixture but is carefully blended of the finest large flowering varieties including some of the most beautiful recent introductions. Flowers are of delicate colors, varying from pearly white to the richest reds and purples.

Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 20 cts.

Northern Grown Seed Potatoes.

The seed potatoes we send out were strictly grown for seed purposes. They were grown in the North from the finest select stock and are sure to produce large crops; all are carefully hand sorted. Our seed potato stocks should not be compared with potatoes picked up on the market, named at a guess and sold for seed. **IT PAYS TO CHANGE SEED POTATOES.**

Early Acme. Very similar to Early Ohio. Acme is a little earlier than Ohio and perhaps a little more productive. It grows strong, upright vines, tubers compact in the hill, flesh very white and of high quality. Our supply is limited. Lb. 25 cts., postpaid. By freight or express: Pk. 55 cts.; bu. \$2.00.

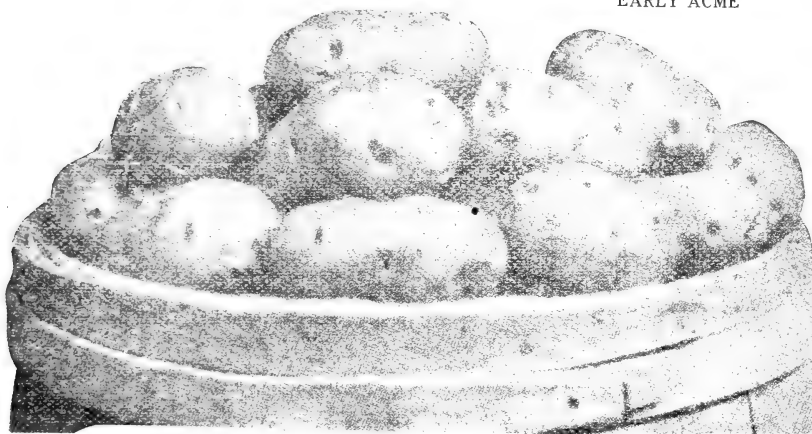

EARLY ACME

Early White Ohio.

Early White Ohio is identical in every way with Red Early Ohio except in color, which is a fine white, or nearly so.

The sprouts are very strong, the vines grow erect and are easy to cultivate. Maturing early, it brings the highest prices, and the land can be used for another crop.

The tubers grow compact in the hill, are very easily dug, and of fine quality. As our supply is limited we advise our friends and customers to order early. Lb. 25 cts.; postpaid. By freight or express: Pk. 55 cts.; bu. \$2.00.

EARLY OHIO

Early Ohio.

Early Ohio is without doubt the most popular early potato in the country. They are smooth, clean and free from prongs and scabs. They grow strong and vigorous, mature a crop in a short time and yield.

Color of the skin is rose-pink. Lb. 25 cts.; postpaid. By freight or express: Pk. 55 cts.; bu. \$1.75.

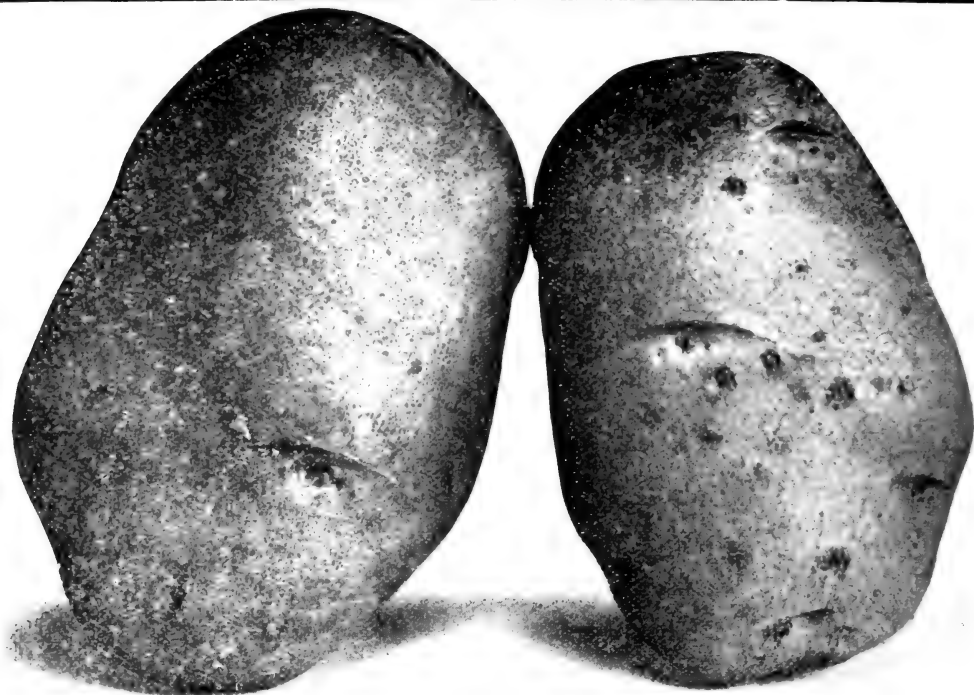

White Victor.

Most profitable of all varieties for main crop. It is also the most productive potato, outyielding all other sorts. It is very uniform in size, being almost round, it makes a good looking variety. The skin is white well netted and russeted, with few and shallow eyes.

It is of unusually strong vitality as each cutting seems to make a large strong vine. It is hard to beat for good cooking qualities, as a heavy yielder, and as a splendid keeper. Lb. 20 cts., postpaid. By freight or express: Pk. 50 cts.; bu. \$1.75. Second size: Bu. \$1.00.

WHITE VICTOR

HARVEST KING
Harvest King.

A MONEY MAKER MAIN CROP POTATO.

We take pleasure in offering our customers this grand Potato, and are sure that everyone who tries it will be more than pleased with its fine quality, vigorous growth, and great productiveness. It has proved itself to be of great value on account of its tremendous yield together with the fact that it produces but very few small potatoes.

It is a magnificent sort, nice large, sound, white tubers which are of excellent quality for cooking or baking. Harvest King will bring the highest prices on all markets. Lb. 25 cts., postpaid. By freight or express: Pk. 50 cts.; bu. \$1.75. Second size: Bu. \$1.00.

BRITISH QUEEN
British Queen.

A GRAND NEW MAIN CROP POTATO RECENTLY INTRODUCED FROM ENGLAND.

It is an extraordinary yielder, possesses exceptionally fine table qualities, always cooking dry and mealy with no sign of hollow-ness. The tubers are uniformly large and handsome in appearance, oval and smooth, with very few and shallow eyes; skin and flesh white; has no tendency to disease. As an exhibition potato we consider it superior to all others. Lb. 25 cts., postpaid. By freight or express: Pk. 50 cts.; bu. \$1.75. Second size: Bu. \$1.00.

Jung's Northern Grown Farm Seeds.

The Farm Seeds which we offer are uniformly of the VERY BEST grade, while the EARLI-NESS and TREMENDOUS PRODUCTIVENESS of NORTHERN GROWN SEEDS needs no comment. The greater part of these seeds were grown on the Fairfield Seed Farm.

Swedish Select Oats. THIS IS THE FINEST, STRONGEST, HEAVIEST, LARGEST YIELDING, MOST PLUMP WHITE OAT EVER GROWN IN AMER-

ICA. This variety is of Swedish origin, it was introduced in this country by Prof. Carlton of the U. S. Dept. of Agriculture. Prof. Carlton sent a sample of these oats to Prof. R. A. Moore, Madison, Wis., who after testing them for four years with 36 other varieties pronounced them THE MOST SATISFACTORY OF ALL.

A FIELD OF SWEDISH SELECT OATS AT FAIRFIELD FARM

The great root development is one of the chief characteristics of the Swedish Oats which enables it to withstand drought better than any other variety. The straw is coarse and is noted for its power to withstand lodging. It is early; the kernels are large and thick, white, plump and heavy, weighing from 36 to 40 pounds per measured bushel, with an exceptionally thin hull. This variety seems to be well adapted to high land, the best results being obtained on clay loam. Lb. 25 cts., postpaid. Not prepaid: Pk. 30 cts.; bu. \$1.00; 2½ bu. \$2.25; 10 bu. \$8.50.

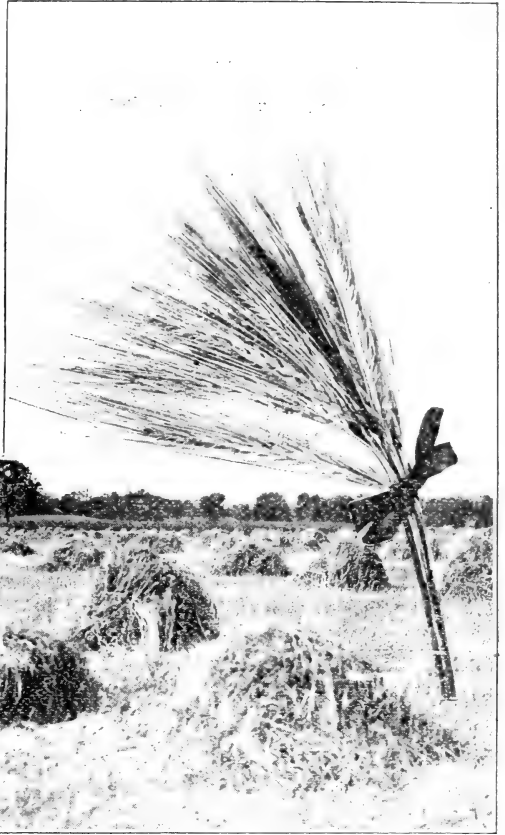

Write for prices on larger quantities. Samples sent on request. Bags free.

WISCONSIN PEDIGREE BARLEY.**The Champion Barley of the World.**

THIS IS THE BARLEY THAT ALWAYS WINS THE FIRST PRIZES AT ALL GRAIN SHOWS. It has been thoroughly tested at the Wis. Experiment Station and throughout Wisconsin and proved to be superior to any other variety.

We have grown this Barley two years and are satisfied that it is the best variety. It will outyield all others, has the stiffest straw, and the plumpest berry.

The heads are of great length and a remarkable characteristic is that all the kernels are uniform in size. This barley will yield from five to twenty bushels more per acre than any other, and it will pay any farmer handsomely to buy enough seed to sow all his barley land. The kernels are brighter and whiter than any other barley making it more attractive. We have a nice lot of this barley that was grown on Fairfield Farm which we offer at the following prices: Lb. 30 cts., postpaid. By freight or express, Pk. 60 cts., bu. \$2.00; 2½ bu. \$4.50. Write for special prices on larger quantities. Bags free. Samples sent on request. Our stock of this Barley was treated for smut which makes it worth at least 10 c. per bu. more than that which is not treated.

ODERBRUCKER

A FIELD OF WIS. PEDIGREE BARLEY AND HEADS AS GROWN AT FAIRFIELD

ODERBRUCKER BARLEY.

ONE OF THE GREATEST, HEAVIEST, FINEST APPEARING, BIGGEST STOOING, LONGEST EARED, BEARDED, SIX-ROWED VARIETIES OF BARLEY ON THE MARKET TODAY. It was introduced by the Wisconsin Agricultural Experiment Station in 1906.

At that time Prof. Moore says: The most satisfactory Barley from all points of view grown on the station farm.

It is a great improvement on the Manchuria, yielding from three to five bushels more per acre.

It has a protein content of fifteen per cent, or nearly double the amount of protein found in many other varieties.

This makes a very valuable feeding barley, which is an important consideration with the leading farmers and stockmen, who are now appreciating more and more the value of barley as a feed for all kinds of stock.

The straw is strong and stiff which gives it more power to withstand lodging.

It will certainly be of great value to every farmer who tries it. Lb. 25 cts., postpaid. By freight or express: Pk. 50 cts.; bu. \$1.75; 2½ bu. \$4.25. Write for prices on larger quantities, Bags free.

Jung's Northern Grown SEED CORN.

We wish to call special attention to our stocks of Clark's Yellow Dent and Wisconsin No. 8 Early Yellow Dent Corn. Our entire stock of these varieties was grown on the Fairfield Seed Farm and a finer bred lot of seed corn cannot be found. It is all carefully selected, fire-dried, of high germination and guaranteed to grow. We have a large stock but seed corn is in great demand this year so we advise our friends and customers to order early.

Early Longfellow Flint Corn.

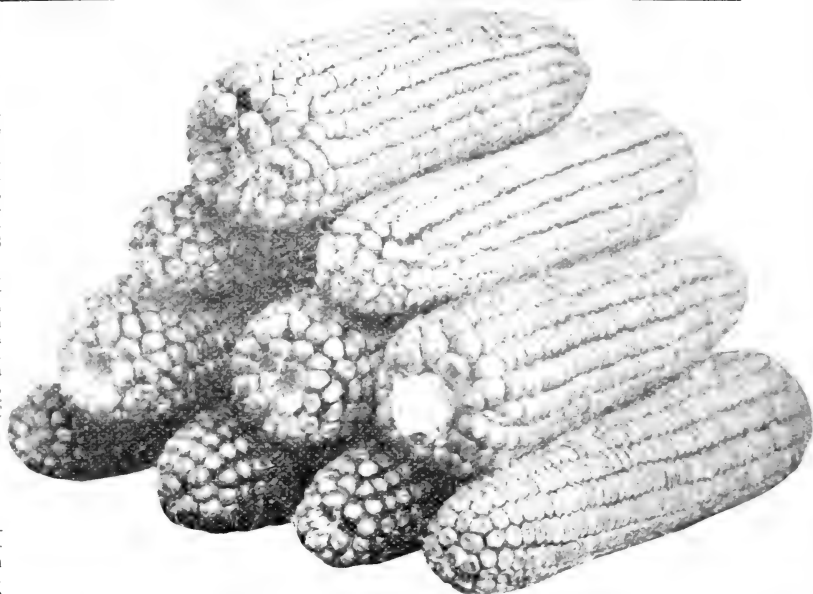

The most popular of all flint varieties. It is a beautiful eight rowed flint, with straight, slender ears, ten to fifteen inches long. Kernels are large and wide, cob very small. Ripens in 75 to 80 days, and is very prolific. A valuable variety for the northern states. Shelled: Pk. 60 cts.; bu. \$2.25; 2½ bu. \$5.25. Nebraska grown.

Wisconsin No. 8**Early Yellow Dent.**

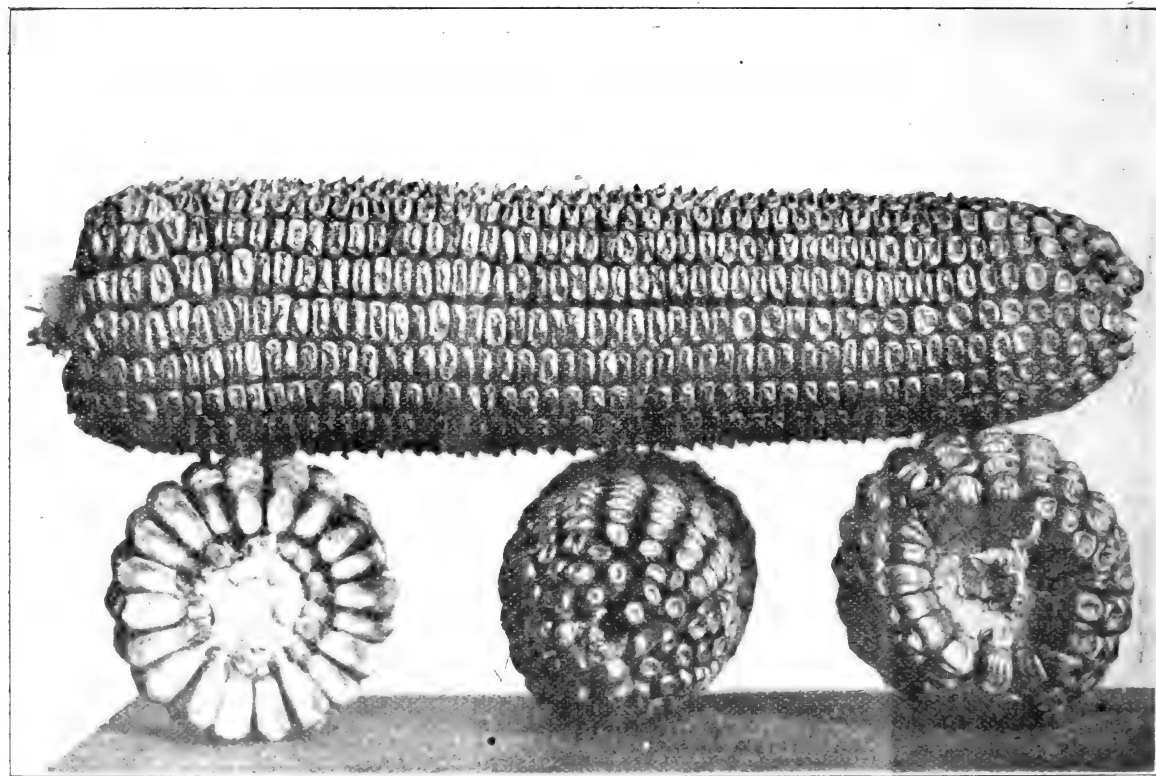

This is the corn for Northern Wisconsin and similar latitudes. The commanding points for northern planting are: earliness, its enormous productiveness, its adaptability to a great variety of soils and climates. It fully matures on the shores of Lake Superior and ripens anywhere in Wisconsin. Ears average 7 to 8 inches in length, with long kernels, very uniform in type and color. It grows a medium-sized stalk with good leaf development and with practically no barren stalks. It will thoroughly mature in about 90 days on favorable soil and a good location and yield from 40 to 60 bu. per acre, producing often two ears to a stalk. Price—on the ear: Bu., 70 lbs., \$3.50. Crates free. Shelled: Pk. 80 cts.; ½ bu. \$1.55; bu. \$3.00. Sample ear by mail 25 cts. postpaid.

Silver King.**Wisconsin No. 7.**

An excellent white dent variety, maturing early, and suited to Wisconsin conditions. It was originally brought from northern Iowa, and developed at the Wis. Experiment Station. The ears are large and closely set with deep snow-white kernels. Ears average 8 to 9 inches in length and are always filled out clear to the tips. This corn is a strong grower and is especially adapted to resist cold weather. It has a decided double-ear characteristic, one reason for its fine yield records. Prices—on the ear: Bu., 70 lbs., \$3.50. Crates free. Shelled: Pk. 80 cts.; ½ bu. \$1.55; bu. \$3.00. Sample ear by mail 25 cts. postpaid.

WIS. NO. 8 AS GROWN AT FAIRFIELD FARM

TYPICAL EAR OF CLARK'S YELLOW DENT AS GROWN AT FAIRFIELD FARM

Clark's Yellow Dent.**Wis. No. 1.**

The largest-eared, the deepest-kerneled, Yellow Dent Corn that was ever originated in Wisconsin. Prof.

Moore thinks Clark's Yellow Dent comes as near being a PUREBRED Corn as anything yet introduced. It matures in from 100 to 115 days. The stalks are strong vigorous growers, generally bearing one good ear, being well supplied with long broad leaves, which make excellent fodder. The corn always breeds very true of type, uniform in color, size and shape of ear. Kernels are of a bright golden color, compactly set on the cob, and of unusual length for so early a corn; See cut. A very noteworthy characteristic of this corn is that the ears hold their size almost to the tip instead of tapering out to a long slim point, or showing a bare cob. Our strain of Clark's Yellow Dent is a great improvement over that generally sold, as it has been critically bred under rules approved by Prof. Holden, the noted corn expert. A heavy yielder, and a good sheller, shelling from 60 to 62 lbs. of corn from 70 lbs. of ears.

We have grown this corn on the Fairfield Seed Farm, Randolph, Wis., for the last seven years and it has always ripened. Price—on the ear: Bu., 70 lbs., \$3.50. Crates free. Shelled: Pk. 80 cts.; ½ bu. \$1.55; bu. \$3.00. Sample ear by mail 25 cts., postpaid.

German Millet.

In the North Millet is grown almost altogether for hay, and for that purpose Southern grown seed is much the best. It grows taller than does that from Northern seed, and that means more hay. It is finer than that from Northern seed, and that means better hay.

We offer genuine SOUTHERN GROWN SEED. German Millet is very sweet, palatable, and when fed to dairy cows produces a large amount of milk. On good rich soil it grows four to five feet high.

It is very tender if cut at the right stage, which is when it is in full bloom. A good yield is from three to five tons of hay to the acre. Lb. 20 cts., postpaid. Not prepaid: pk. 50 cts.; bu., 50 lbs., \$1.75. Write for prices on larger quantities. Samples free.

Japanese Millet.

Japanese Millet is one of the most remarkable forage plants we have; remarkable for its marvelous luxuriant growth, often growing six feet tall; remarkable for the immense amount of hay it produces from each acre, and remarkable for its feeding value. It is adapted to all climates; does well on low ground; makes more hay than any other Millet, and requires less seed per acre. Sow in May for best results, 15 to 20 pounds per acre. If desired for hay, cut just before it heads out. Lb. 20 cts., postpaid. Not prepaid: pk. 45 cts.; bu., 40 lbs., \$1.50; 100 lbs. \$3.60.

White Kaffir Corn.

An excellent fodder corn. It grows 5 to 6 feet high, with a straight upright growth and numerous broad leaves. The stalks are brittle and juicy, not hardening like other varieties of sorghum. It makes excellent fodder, either green or dry, which is highly relished by all kinds of stock. The seed crop is also heavy, sometimes 50 to 60 bushels per acre. Can either be sown broadcast or in drills. Five to ten pounds will sow an acre in drills. Lb. 20 cts., postpaid. Not prepaid: lb. 10 cts.; 10 lbs. 40 cts.; 100 lbs. \$2.50. Write for special prices on larger quantities.

EARLY AMBER CANE

Early Amber Cane.

For Fodder—One of the leading fodder plants. It can be easily grown on any good corn ground, is sweet and tender and greedily eaten by cattle, horses and hogs. It is excellent for pasture; when grazed down it will quickly spring up again, thus a large amount of pasture may be obtained when other forage is scarce. Sow any time from May to July, 12 to 15 pounds per acre in rows, and cultivate the same as corn. Or if sown broadcast, use 50 lbs. per acre. Northern Grown Seed. Lb. 10 cts., postpaid. By freight or express: lb. 10 cts.; 10 lbs. 50 cts.; 100 lbs. \$4.00. Price subject to change.

WHITE KAFFIR CORN

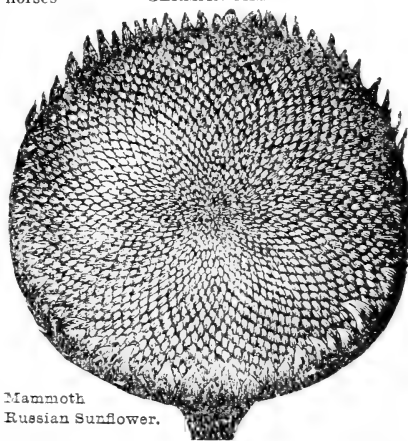

GERMAN MILLET

Sunflower.

MAMMOTH RUSSIAN.

Single heads measure twelve to twenty-two inches in diameter and contain an immense quantity of seed, which is highly valued by all farmers' and poultry breeders who have tried it as an excellent and cheap food for fowls. They eat it greedily, fatten well on it, and attain a bright, lustrous plumage and strong healthy condition better than on almost any other food. It is the best egg-producing food known. Every farmer should plant some of the seed in any waste piece of ground, any time from early spring to the middle of July. Four quarts of seed will plant an acre. The seed is also recommended as an excellent food for horses, and it is claimed that a fine quality of oil can be manufactured from it. Oz. 5 cts.; 1 lb. 20 cts.; 10 lbs. 30 cts., postpaid. By freight or express: 10 lbs. \$1.00; 100 lbs. \$6.00.

Mammoth Russian Sunflower.

Whenever this Trade Mark appears on a package of seeds it is a guarantee that the seeds therein are unexcelled for QUALITY. It appears on every package of seeds we send out.

JUNG'S FARM SEEDS ARE PURE. THEY ARE FREE FROM FOUL WEEDS. THEY COMPLY WITH THE PURE SEED LAWS. THEY ARE RE-CLEANED. THEY ARE OF HIGH GERMINATION. THEY ARE TRUE TO NAME. THEY WILL PRODUCE ENORMOUS CROPS. Does That Mean Anything to YOU?

Field Peas. White Canada.

ive. Excellent for hog pasture or when fed green to milch cows.
Write for prices if wanted in larger quantities.

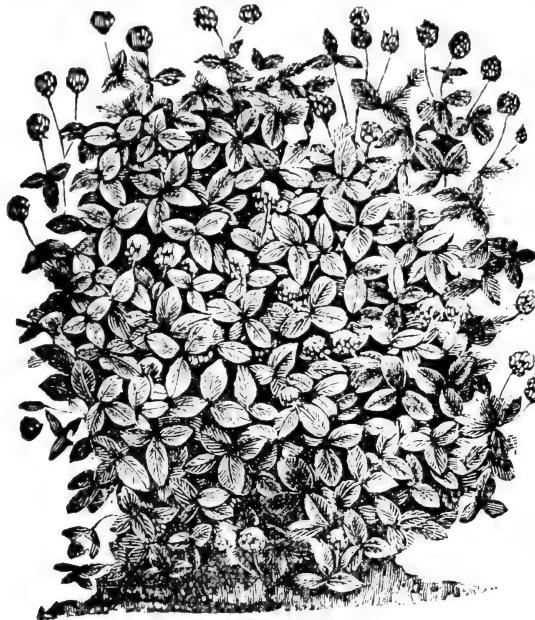

This is the best known variety and the one usually sown.
They grow from three to four feet high and are very product-
Price while our stock lasts: Pk. 75 cts.; bu. \$2.50.

Dwarf Essex Rape.

The greatest of all forage plants. It is ideal for sheep pasture, and is now
also largely sown for cattle and hogs. It furnishes an immense amount of
green feed, and its nutritive value is nearly twice that of clover. Under favorable circumstances it is ready for pasturage in
six weeks from the time of sowing. Dwarf Essex Rape thrives best on good soil, rich in vegetable matter. Some firms ask
less for their Rape seed than we do, but we handle only **THE VERY BEST SEED**, which is sure to give satisfaction. Lb.
20 cts., postpaid. Not prepaid, lb. 10 cts.; 5 lbs. 40 cts.; 25 lbs. \$1.75; 100 lbs. \$6.25.

Soy Beans.

The Soy Beans have attracted much attention in recent years on account of their great value as
a feed, being much richer in protein than flaxseed, oilmeal, bran or oats, and can be used to bal-
ance a feed ration to good advantage. By its use a dairyman can make a combination that is wholesome, economical and a
completely balanced ration for milch cows. They also equal or surpass clover as a soil enricher, gathering nitrogen from the
air. It is also used for ensilage, clover crop or fed in matured state. Sow just after corn planting, when the ground is warm.
in drills 30 inches apart and three or four inches apart in the drill. From one to two pecks will seed an acre. Qt. 35 cts.,
postpaid. Choice Northern Grown. Not prepaid, pk. 85 cts.; bu. \$3.00.

MEDIUM CLOVER

Japanese Buckwheat.

This new sort has proven to be much earlier and more pro-
ductive than any other variety. Grains are large and of a
rich brown color. It excels all in yield and earliness.
Sow from June 10 to July 10, using from 3 to 4 pecks of seed
per acre. Lb. 25 cts., postpaid. Not pre-paid; Pk. 50 cts.;
bu., 50 lbs., \$1.50.

**Jung's Fancy Recleaned
CLOVER and GRASS SEED.**

Nothing is more important to the farmer
than that the seed he sows be **PURE** and
free from **FOUL WEEDS**; the seed should
also be plump and of strong vitality to in-
sure a good stand.

We handle only **ONE GRADE** of these
seeds and that is our famous
FAIRFIELD BRAND

which is pure and free from weeds. Bags
FREE, remember this when comparing
prices. Samples of all Farm Seeds free.

**Wisconsin Grown Red or
Medium Clover.**

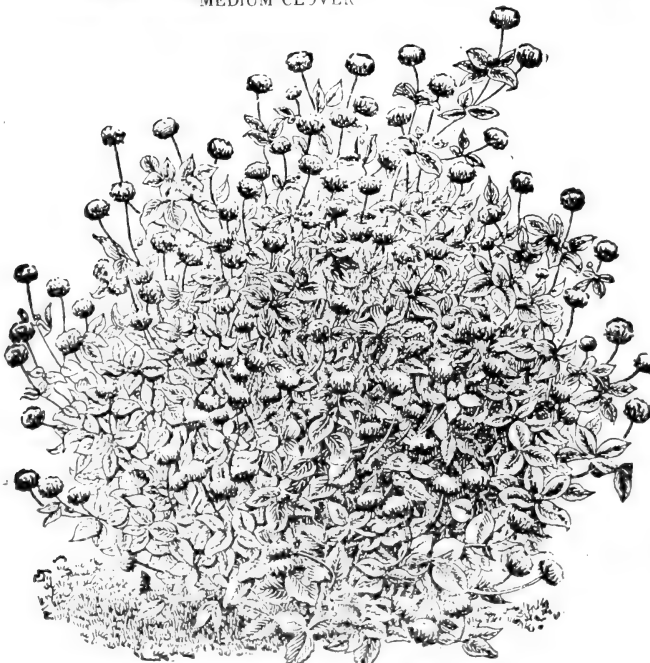

We have an unusually fine stock of
Medium Clover Seed. It is bright, pure
of high germination and free from foul,
weeds. This is the standard Red Clover and
a dependable all-round variety for farmers and
stockmen. It makes two crops a year. The
first is usually cut when in bloom for hay; the
last crop may be harvested for seed, cut for hay,
or plowed under to add fertility to the soil.
Lb. 35 cts., postpaid. Not prepaid: lb. 30
cts.; pk. \$3.50; bu. \$13.50. Price subject to
change. Write for prices on larger quantities.

**Wisconsin Grown
Alsike Clover.**

**WE HAVE THE FINEST STOCK OF
ALSIKE SEED EVER GROWN. THIS
SEED HAS BEEN RAISED ON OUR
FAIRFIELD FARM AND IS ABSOLU-
TELY PURE AND FREE FROM WEEDS.**

**BE SURE TO SOW JUNG'S GENUINE
ALSIKE.** Alsike is the hardiest of all Clovers.

It adapts itself to all kinds of soils, and resists
extremes of wet or drought alike. It is more
leafy than Red Clover and makes a finer and bet-
ter hay, especially when sown with timothy. It
is deliciously fragrant and highly nutritious.
On good soil it will grow four feet high. Alsike is
the only clover that will produce a good crop and
not kill out on wet land. Lb. 35 cts., postpaid.
Not prepaid: lb. 30 cts.; pk. \$3.40; bu. \$12.50.
Price subject to change. Write for prices if
wanted in larger quantities. Samples free.

ALSIKE CLOVER

Montana Grown

Alfalfa Seed.

A clover-like leguminous plant of great importance as a hay and forage crop, nutritious and rich in protein elements. It grows two to five feet high and roots eight to twelve feet deep.

It needs one season to become established, after which it yields enormous crops annually for many years. Two to six cuttings per season, aggregating three to eight tons cured hay, are harvested, according to conditions and locality. It does well on all good rich soils, except heavy clay, if well drained. It is a perennial plant, lasting many years under good treatment.

It should be grown by every farmer and dairyman. **We offer Montana grown seed which is recommended by the Wis. Agr. Experiment Station as being the best for all localities.** Lb. 35 cts.; 3 lbs. \$1.00, postpaid. By freight or express: Pk. \$3.00; bu. \$11.00. Price subject to change.

ALFALFA

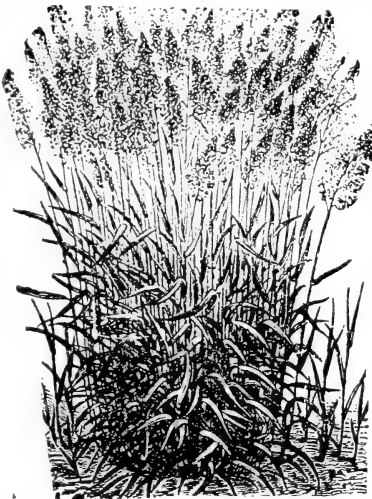

TIMOTHY

Wisconsin Grown TIMOTHY.

As a crop for hay Timothy is probably unsurpassed by any other grass. It is greatly relished by all kinds of stock, especially horses. It yields more nutritive matter than any other grass or forage plant. It is not suited for a permanent pasture as it will run out in the course of a few years. The largest crops of hay are raised on rich land. It is not suited for light, sandy soil so well as some other grasses.

The most important point in the growing of Timothy is the selection of **GOOD SEED. POOR SEED** besides containing weed seed **WILL NOT ALL GROW.** We have a choice stock of **PURE HOME GROWN SEED.**

Lb. 25 cts., postpaid. Not prepaid: Lb. 18 cts.; pk. \$1.90; bu. \$7.00. Price subject to change. Write for prices on larger quantities.

RED TOP

RED TOP.

A valuable grass for moist, rich soils where it thrives most luxuriantly. It is a good variety to sow with Timothy or Clover for meadows or pasture and is more permanent than either of the other two. It should be fed close, as if it is allowed to grow up to seed the cattle dislike it. On good soil it grows about three feet high. It has been grown successfully even on alkali soil where other grasses failed. Lb. 35 cts., postpaid. Not prepaid: Lb. 27 cts.; 10 lbs. \$2.60; 50 lbs. \$12.50. Subject to change.

Kentucky Blue Grass.

Also known as June Grass. Well suited for pasture and lawns. Sow in fall or spring at rate of 30 to 40 lbs. per acre. Lb. 40 cts., postpaid. Not prepaid: lb. 32 cts.; 10 lbs. \$3.00; 50 lbs. \$14.50. Price subject to change.

Orchard Grass.

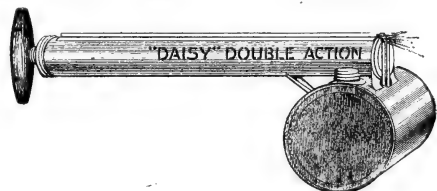

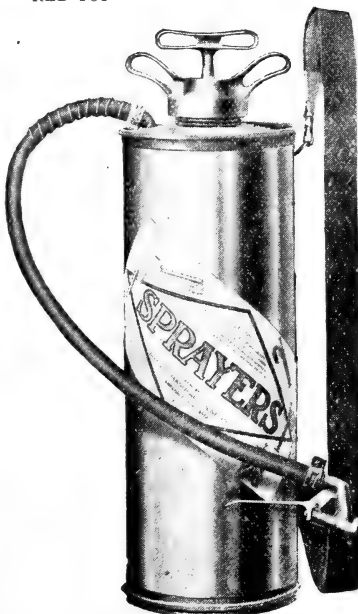

Extremely hardy and widely known. One of the earliest to start in the spring; grows rapidly; furnishes an abundance of pasture all season. Withstands droughts, will grow in the shade. Sow 20 to 30 lbs. per acre. Lb. 30 cts., postpaid. Not prepaid: lb. 22 cts.; 10 lbs. \$2.00; 50 lbs. \$9.00. Price subject to change. Sample sent on request.

The Brandt "Perfection" SPRAYER.

This is a Sprayer of the high pressure type. It is larger, stronger and more powerful than any other sprayer made. The barrel is 7½ in. in diameter and 20 inches high. The pump is 1½ in. seamless brass tubing. The valves are metal. The hose is 5-ply cloth inserted. The nozzle is the well known Brandt Automatic type. Capacity of sprayer 3½ gallons. Weight 9½ lbs. All sprayers tested to 60 lbs., before leaving factory. This Sprayer will handle white-wash, water, paints, Bordeaux mixtures, etc., perfectly. For whitewash and other heavy mixtures use the No. 2 nozzle, which is furnished with sprayers. Prices: Built of brass \$6.75. Galvanized steel \$6.00.

"Daisy" Double Action.

Works both ways of stroke, giving twice the results with half the work. Will not turn over on its side and allow the liquid to run out. Holds one quart. Prices: Built of brass \$1.00. Galvanized steel 75 c

GOLDEN QUEEN

GLADIOLUS.

There is no flower of such easy culture, embracing the great range of color with endless combinations and variety, to equal the Gladiolus. It is rightfully named the people's flower. Our bulbs are of the finest quality and will give bountiful satisfaction the first season.

The bloom is continuous from end of July until frost. Any good garden soil will grow Gladiolus. Cultural instructions with each order.

Golden Queen.

A new variety of great beauty. It is of a rich lemon yellow color, having a crimson spot on the two lower petals, forming one of the most handsome Gladiolus known. Flowers are of truly gigantic size and a large number of them are open at a time. The plants are strong and healthy, of the branching type, and grow about two and one-half feet high. 10 cts. each; \$1.00 per dozen.

America.

A beautiful shell-pink. By far the most vigorous and easily grown Gladiolus known. Very strong and healthy, with luxuriant dark green foliage and a freedom of growth and flowers surpassing all others. Spikes are 2 to 3 feet long, with a great number of large spreading blossoms all facing one way and showing an exquisite shade of glistening soft lavender pink. 10 cts. each; \$1.00 per dozen.

Augusta.

A splendid new Gladiolus. Flowers are of perfect paper-white, with a slight pink shade on lower half of the petal. The spike is set solid with perfect flowers from top to bottom. Plants are strong and healthy. 5 cts. each; 45 cts. per dozen.

George Paul.

A superb variety. Flowers are a deep rich crimson, slightly stained with yellow, spotted with crimson. Flowers measure 5 inches across. 10 cts. each \$1.00 per dozen.

Brenchleyensis.

This is an old standard sort, and one of the best for bedding where one good shade of scarlet is desired. Blooms profusely. 5 cts. each; 45 cts. per dozen.

May.

Lovely pure white flowers, finely flaked bright rosy crimson; strong spike; good forcing variety. 5 cts. each; 45 cts. per dozen.

American Hybrids.

Composed of the choicest named varieties, including the finest, showing large flowering seedlings and latest introductions. 4 cts. each; 35 cts. per dozen.

Special Offer.

One good sized bulb of each of the above seven excellent varieties for only 35 cts., postpaid.

AMERICAN HYBRIDS

Wisconsin Grown Nursery Stock.

We are offering below a list of very choice small fruits that are Northern Grown and very hardy. Rather than offer a long list, which only confuses the purchaser, we are offering a select list of the very best varieties. You can send in your order for Nursery Stock at any time, shipment will be made as soon as the weather is favorable in the spring. All Nursery stock is shipped direct from the Nursery. All orders for Nursery Stock should amount to at least \$1.00. At prices quoted all plants will be shipped by express, not prepaid, and for this reason have made prices very reasonable for good strong plants.

STRAWBERRIES.

Brandywine. Perfect. Plant a luxuriant grower, healthy, hardy and productive; fruit good shape, large size, good quality, sweet and tender, firm, and what makes it more valuable, it is late, thus bringing higher prices in the market.

Senator Dunlap. Perfect. The greatest all-round variety now on the market. The plant is perfect, not large, but tough, bright, a rampant runner, and ready to grow under any circumstances. It is wonderfully productive and bears perfect fruit. The fruit is beautiful, bright red and glossy, and of delicious quality. It begins to ripen early and continues a long time in bearing. Fruit is large in size, firm, a good shipper and a splendid keeper. Needs plenty of room.

Glen Mary. Perfect. Large and choice; very handsome and of fine flavor. The color is a bright glossy crimson, very handsome and sells readily in all markets. Large in size and superior in quality. Very vigorous and productive.

Beder Wood. Perfect. A very desirable early variety for home use. It is a very strong vigorous grower and an enormous cropper. Fruit is of large size, regular form, bright scarlet in color and of excellent quality. One of the best Strawberries grown.

Price of above Strawberry Plants: Doz. 25 cts.; per 100 70 cts.; per 1000 \$5.25.

RASPBERRIES.

Cumberland. The largest and best black Raspberry in cultivation as it has been thoroughly tested and is giving universal satisfaction. The quality is all that can be desired, although of great size the fruit is very solid; ripens mid-season.

Columbian. The strongest growing variety. Fruit large, dark purple and of fine quality; splendid for canning. One of the most desirable varieties known.

Brilliant. A new red Raspberry of special merit. Ripens early and the entire crop can be gathered while prices are high. Berries large, of a brilliant red color and good quality. A splendid variety to grow for market.

Marlboro. A superb variety. Berries are of very large size, brilliant red color, firm, and of excellent flavor. Canes very strong; perfectly hardy; enormously productive, and commences to ripen early.

Price of above Raspberry Plants: Dozen 50 cts.; per 100 \$3.00

BLACKBERRIES.

Eldorado. The most valuable variety for our Northern latitude. Berries are very large, jet black, ripen well together and bear the fruit in large clusters. The fruit is sweet and delicious, has no hard core and stands shipping well. Doz. 50 cts.; per 100 \$3.00

Snyder. A well known popular variety; hardy and productive. It is quite early and for this reason valuable to grow for market. A good variety for cold climates as it leads where hardness is a leading factor. Doz. 50 cts.; per 100 \$3.00.

CURRENTS.

Perfection. A seedling of Foy's and White Grape. Color is a bright red. Berries are large and the size is maintained well to the end of the bunch. Very productive. Ripens about mid-season. Rich sub-acid flavor; plenty of pulp and few seeds. Vigorous in bush with large healthy foliage. The best current lately introduced. 25 each; \$2.50 per dozen.

White Grape. The best table variety, large and luscious. A good prolific grower producing large clusters of yellowish white currants of excellent quality. 10 cts. each; \$1.00 per dozen.

Pomona. A new early variety, very desirable, medium to large, bright crimson, very productive, of good quality, a good shipper and a leading market sort. 10 cts. each; \$1.00 per dozen.

GRAPES.

Concord. The most popular grape in America. Bunch and berry large and of good quality. Vine vigorous, healthy, hardy, and productive. Skin tender; flesh sweet and juicy. Color blue black.

Brighton. Bunch medium to large, long, compact, shouldered. Berries are of medium size, thin, flesh tender and of best quality. Vines hardy, vigorous and productive; ripens with Concord. Should be planted near other varieties in order to fertilize properly. Fruit is dark brownish red.

Moore's Early. One of the very best early black Grapes. Clusters medium size; berry very large. Ripens nearly two weeks before Concord, and of the same quality. Vines hardy.

Niagara. Strong grower; bunches very large and compact; berries large, mostly round, light greenish white, slightly amber in the sun. Skin thin but tough and does not crack, quality good.

Price of above Grape Vines: 10 cts. each; \$1.00 per dozen; \$3.00 per 100.

Jung's Ideal Fruit Collection.

For only \$1.50 we will send you, by express, our great Ideal Fruit Collection as follows:

50 STRAWBERRY, Senator Dunlap.
6 CURRENTS, Pomona.

12 BLACKBERRY, Eldorado.
12 RASPBERRY, Marlboro.

DUE BILL.

This Due Bill will be accepted the same as ten cents if your order amounts to twenty five cents or more. In other words: if your order, for seeds, amounts to twenty five cents or more, you may select 10 cts. worth free if the varieties wanted are mentioned on the space below. We make this exceptional offer as we want every one who receives our catalogue to plant **Jung Quality Seed**, the seed that never disappoints.

Void after June 1. 1912.

RARE PREMIUMS.

In addition to the low prices and special offers in this catalogue, and besides the thousands of novelty packets which we annually distribute with all orders, we make these special inducements of Rare Premium Offers to increase our business and give our customers an opportunity to test, at no cost to themselves, these new Specialty Seeds.

We cannot offer them in our catalog because of scarcity of stock. With all seed orders amounting to 25 cts. you may select one pkt.; with a 50 cent order any two pkts.; with a dollar order any four packets. Only four packets will be given each customer no matter how large the order. We want you to try these varieties that's all.

This Offer applies only on orders for Vegetables and Flowers selected by the purchaser from this catalogue at prices quoted therein named and will be sent only if asked for. Remember, we also allow you to select 25 cts. worth of seed free for each \$1.00 sent for seeds in packets and ounces.

SUCCESSFUL FARMING

DECEMBER

1913

Help Yourself to Successful Farming

Every farmer should be a subscriber to this splendid farm paper, published for the busy practical working farmer of America.

Successful Farming treats each branch of farming, agriculture, live stock, dairying, poultry raising, fruit-growing, trucking, floriculture and the Home.

Successful Farming is condensed. Its articles go to the very heart of things. It is filled with common sense. It is profusely illustrated. It teaches carefulness and economy. Perhaps the most important qualities are its good faith, its sincerity, and frankness. It is a paper that caters to the real interests of the farmers and his family with a thoroughness that makes it a model of usefulness in the farm home. Every issue teems with good ideas, telling more things in fewer words than any agricultural paper published.

Such men as Coburn, Holden, Henry, Wm. C. Smith and many others of national reputation not only endorse Successful Farming but are contributors to its columns.

If you wish to help yourself to the best possible reading that will do you the most good along agricultural lines in all its phases, accept the offer made you on the opposite side of this WINNING CERTIFICATE. (OVER)

This is

THE WINNING CERTIFICATE

Allow us to congratulate you. You are surely fortunate to have found this certificate. Your finding it must mean an omen of good future for you. Anyone who finds this certificate is entitled to get a years subscription to Successful Farming, at the extremely low price of 25 cents for one whole years subscription.

If you will put your name and address on the lines below and send this WINNING CERTIFICATE to us, together with the amount mentioned above, we will have Successful Farming sent to you for one full year.

We endorse Successful Farming, and we know that if every farmer in the United States would conscientiously read and listen to and act on the suggestions and directions given each month by Successful Farming that there would be the biggest yield of all kinds of crops ever recorded in the world's history.

Are you going to take this WINNING CERTIFICATE as an omen of your own good future in your particular branch of farming, or are you going to let this opportunity slip by?

Very truly yours, J. W. JUNG SEED CO.

J. W. JUNG SEED CO., RANDOLPH, WIS.
